

# REGIONAL CULTURAL HERITAGE TOURISM

During the Spring 2017 semester, University of Nebraska-Lincoln, The College of Architecture partnered with Willa Cather Foundation, Nebraska Extension Center for Rural Entrepreneurship, Red Cloud Community Foundation Fund, City of Red Cloud, Red Cloud Chamber of Commerce and Webster County to develop a strategic plan to bring more economic value and interest to the area. This portfolio of work is a compilation of all the work the vertical studio produced.

The National Heritage Area Initiative for north Kansas and South Nebraska will begin to collectively bring Cultural Heritage Tourism Assets into an alliance of organizations. This alliance will be able to discuss the future of Cultural Heritage Tourism in a manner that equally benefits all stakeholders, communities, and visitors. Common ideas that should be thought of when creating new ideas and designs are as follows:

- Phase I: Project Definition**
1. Cultural Heritage Tourism
  2. Sense of Place
  3. Authenticity, Quality, Interpretation
  4. Tourist Experience
  5. Community Engagement

- Phase II: Inventory**
1. Road Based Tourism
  2. Communities and Assets
  3. Environmental Timeline

- Phase III: Analysis**
1. Landscape Sense of Place
  2. Road Experience
  3. User Analysis
- Phase IV: National Heritage Area Initiative**
1. National Heritage Areas
  2. Little Colorado River National Heritage Area Initiative Precedent
  3. Alignment Analysis
  4. Synergies
  5. Community Engagement
  6. Prototype

- Visual connections
- Spatial Sequences

- Native Landscapes
- Significant Views
- Cultural Assets
- Supporting Amenities
- Conservation of Land
- Community Involvement
- Sense of Place

- Primary Goals**
1. Give a Sense of “Brand Identity”
  2. Integrate, Guide, and Focus Place Management
  3. Establish Connection Between Landscape Character and Assets
  4. Be able to Experience the Natural Landscape
  5. Identify and Communicate Qualities of Place

**Acknowledgments:**

# CULTURAL HERITAGE TOURISM

## Introduction

### Abstract

#### Importance of Cultural Heritage Tourism:

- Tourism and hospitality create more jobs
- Attracts foreign capitals and potential investors
- Attracts more visitors
- Has a positive economic and social impact
- Destinations become culture-oriented

#### Define:

##### Cultural (noun):

- relating to the ideas, customs, identity, and social behavior of society

##### Heritage (noun):

- property that is or may be inherited; an inheritance
- a special or individual possession; an allotted portion

##### Tourism (noun):

- the commercial organization and operation of vacations and visits to places of interest

#### Cultural Heritage Tourism:

- Cultural heritage tourism involves visiting places that are significant to the past or present cultural identity of a particular group of people

#### Related Terms:

- **Travel (verb):** make a journey, typically of some length or abroad

- **Exploration (noun):** the action of traveling in/through an unfamiliar area in order to learn about it

- **Journey (noun):** an act of traveling from one place to another

- **Sight-Seeing (noun):** the activity of visiting places of interest in a particular location

- **Excursion (noun):** a short journey or trip, especially one engaged in as a leisure activity

- Murphy, Peter E. "Tourism: A Community Approach." McQuinn, Inc. (1995) 1-200.

#### Principles:

##### 1. Collaborate:

Heritage tourism requires effective partnerships. Much more can be accomplished by working together than by working alone. Pooling resources at a regional level can vastly increase effectiveness and can motivate real cooperation between individuals.

##### 2. Find the Fit Between Community and Tourism

Heritage tourism should make a community a better place to live as well as a better place to visit. Recognizing local history by communities and sharing with others will benefit the community and its visitors.

##### 3. Make Sites and Programs Come Alive

Look for ways to make visitor experiences exciting, engaging, and interactive. Sites and exhibits are more effective by being visually stimulating and allowing visitors to directly interact with them.

##### 4. Focus on Quality and Authenticity

Today's heritage traveler is more sophisticated and will expect a high level of quality and an authentic experience they will remember. An area that presents a "real" experience is more likely to produce long-term heritage tourist interest.

##### 5. Preserve and Protect Irreplaceable Resources

Many community historic and natural resources cannot be replaced if they are not lost. Take good care of them because once they are gone, they are gone forever.

### Cultural Heritage Tourism

#### Historical Significance:

Cultural heritage and tourism have gone hand-in-hand since the very first days of leisure travel. The earliest tourism experiences were often religious. As Europeans began touring the world in the 1700s, and infrastructure of hotels, restaurants, and transportation began to emerge with the purpose of traveling to experiences a different culture and learn about different countries. Because of cultural heritage tourism, travelers have been able to see various different countries and experience their customs and culture while benefiting the country they are visiting.

#### Popular Attractions to Visit

Travelers who are interested in Cultural Heritage Tourism would visit or take part in any of the following:

##### Tangible Attractions

Military

Historic Buildings

Dark

Industrial

Religious

Historic Settlements

Environmental

##### Intangible Attractions

Arts

Religion

Performing Arts

Festivals & Events

Languages

Sports

Folkways

#### Four Categories of Cultural Tourists

The demand for heritage can be subdivided. Some 15% of the general population would not visit heritage sites, which leaves 85% who would.

**Greatly Motivated:** These are people who travel to a specific destination purposefully to experience the culture and heritage of the region.

**Partly Motivated:** These are people who travel both because of the heritage appeal of the destination and other reasons, such as playing golf or visiting relatives.

**Adjunct:** These are people who are motivated primarily by other factors, such as trekking in a rainforest, relaxing at a beach resort or attending a sport event, but will also plan a side-visit to a cultural site while they are in the area.

**Accidental:** These people have no plans to visit historic sites or cultural events but might stumble onto an opportunity or accompany friends or relatives who insist on going.

### Benefits of Heritage Tourism

Tourism industry generates both direct and indirect employment

Regional income growth due to amount spent from tourists as well as gifts wanted to be brought home from place visited

Tourists also donate money to the communities if the communities want to renovate or preserve one of their attractions

When communities realize their culture is of interest due to all of the tourists they get coming to see their culture

Social empowerment in a community which helps bring the community closer together

Creates public awareness of the need to preserve the built environment

### Challenges of Heritage Tourism

Property taxes tend to rise as well when tourism grows which makes it difficult for people to pay their property taxes

Inflation due to increase in tourists which then increases prices as well making everything more expensive for the visitors

Regions and countries starting to become over-reliant on built and living culture as their primary attraction

Cultural change due to the tourists that come to town, bringing their own values and behaviors, and influencing the values and behaviors of the destination residents

Literal stealing of historic artifacts and the misappropriation of culture from

When villages and neighborhoods are moved to make way for tourism development which creates forced displacement

### Steps to Cultural Heritage Tourism Success

#### 1. Assess the Potential

##### Goal:

Assess your area's ability to both attract tourists and support the influx of visitors and provide the associated services they require

##### Factors to Consider:

- Presence of historical, cultural, and natural attractions
- Lodging, food and other assorted services
- Sufficient infrastructure
- Means of marketing the area of region

#### 2. Plan and Organize

##### Goal:

Get both the community and business behind heritage tourism as well as collaborate with or obtain support from organizations in higher levels of government

##### Factors to Consider:

- Securing adequate funding
- Having a well-developed financial plan in place
- Individuals involved in the travel and tourism industry

#### 3. Prepare, Protect, Manage

##### Goal:

To maintain exceptional cultural and historical experiences as well as having a clear, yet comprehensive management plan

##### Factors to Consider:

- Take account of the availability of visitors of information about attractions and services
- Guidebooks and websites
- Maps and signage
- Zoning ordinances

#### 4. Market for Success

##### Goal:

Reach your target market and seize opportunities with local, regional, state, or national groups by developing a multi-year marketing plan.

##### Factors to Consider:

- Public Relations
- Advertising
- Graphic Materials
- Promotions

#### SUCCESS!

- **Economic Development**
- **Preserve Historic Assets**
- **Improve Quality of Life**

CULTURAL HERITAGE TOURISM
Program

Attractions

TANGIBLE Definition: Something that is physically there

01 Military
Definition: Places that have historic or current significance with the military.
1- Battlefield
2- Museum
3- Military Installation
4- Cemetery
5- War Memorial

02 Dark
Definition: Places that are identified with death and suffering.
1-Sites of Terrorism
2-Concentration Camps
3-Deaths of Famous People
4-Prisons

03 Historic Settlements
Definition: Places that were once uninhabited where people established a community.
1- Historic Cities
2- Rural Settlements
3- Villages
4- Redeveloped Waterfronts

04 Historic Buildings
Definition: Places that have significance to a person or place in history.
1- Churches
2- Historic Homes
3- Museums
4- Archaeological Digs
5- Ancient Ruins

05 Industry
Definition: Places of economic activity concerned with manufacturing a specific product.
1- Breweries
2- Factories
3- Quarries
4- Railways
5- Mines

06 Religious Places
Definition: Places that are significant to a specific religion.
1- Churches
2- Cathedral
3- Temples
4- Rivers
5- Grottos

07 Environmental
Definition: Places in the natural world that hold significance to a community or group of people.
1- Prairie
2- Rivers
3- Vegetation
4- Mountains
5- Forests

INTANGIBLE Definition: not having a physical presence

08 Arts
Definition: The various branches of creative activity.
1- Handicraft Skills
2- Art Traditions
3- Foodways and Gastronomy

09 Languages
Definition: Systems of communication used by communities or countries.
1- Unique Languages
2- Music

10 Folkways
Definition: The traditional way of life of a particular community or group of people.
1- Dress
2- Stories
3- Farming Methods
4- Behavior
5- Folklore

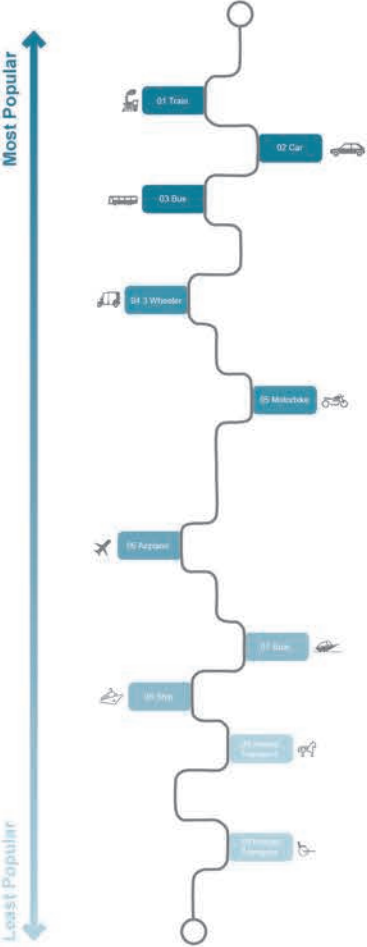

11 Music and Performing Arts
Definition: Forms of creative activity that are performed in front of an audience.
1- Opera
2- Dance
3- Music

12 Religion
Definition: A particular system of faith and worship of a controlling power.
1- Ceremonies
2- Beliefs
3- Gender Roles
4- Practices

13 Sport
Definition: An activity involving physical exertion and skill in which an individual or team competes against another or others.
1- Play
2- Rules and Methods

14 Festivals and Pageants
Definition: Day or period of celebration or public entertainment.
1- Religious Pageants
2- Food Festivals
3- Ethnic Festivals

Ways of Travel

Most popular ways to travel in the world

Ways that one may travel when at a destination

Travel to Destination

01 Trains
Trains are the most common mode of transportation around the world. They are unique because they can travel large distances but are cheaper than airplanes and take less time than ships. This makes trains the ideal form of transportation for people when they want to travel long distances. Metro rails are used for quick travel between cities. Trains are also used for transporting goods and raw material.

02 Cars
The mode of transport that we use most is the personal vehicle of a car. Cars have become a status symbol in societies and the more one has the richer they appear. There are many different forms of the car that are used around the world for personal transport.

03 Buses and Trucks
Roads are an important infrastructure of a country and buses and trucks are the main form of transport that unites the country through its road network. Trucks carry goods while buses carry passengers. It is the cheapest form of mass public transport available in any country.

04 Three Wheeler
A three wheeler is what is typically found in a developing country. It revolutionized the way people travel in larger cities. It is the motorized form of a rickshaw, bicycle, motortaxi, etc. It's mostly used for personal transport but also can be used to carry goods.

05 Motorbikes
This is preferred by the adventurous type and lonely explorer. One can travel long distances or just use it for fun. Around the world motorbikes are used to carry goods and sometimes as a single person taxi.

06 Airplanes
Airplanes decreased travel time significantly and made the world a smaller place. They are widely used for public transport and carrying goods.

07 Boats
Boats paved the way for people to travel along rivers and lakes. They have mostly been used for fishing, personal transport and trading. They are still widely used in port cities and along canals.

08 Ships
Decades ago, ships were the only way to travel large distances. This is how the world was explored. Shipping is the most common way of trading. Passenger ships and ferries still operate in some areas of the world as a cheaper way to flying.

09 Animal Powered Transport
This is common form of transport in developing countries and some developed countries. It can be relatively cheap in developing countries and a novelty in developed countries.
Examples:
- Horse drawn carriage
- Bullock cart
- Dog sled
- Donkeys

10 Human Powered Transport
This form of transportation is still used in many parts of the world. They have been used for centuries and are the most eco-friendly mode of transport designed.
Examples:
- Rickshaw
- Human drawn carriage
- Bicycles

Travel Within Destination

Bike: A vehicle composed of two wheels held in a frame one behind the other, propelled by pedals and steered with handlebars attached to the front wheel.

Walk: An act of traveling or an excursion on foot.

Car: A road vehicle, typically with four wheels, powered by an internal combustion engine and able to carry a small number of people.

Bus: A large motor vehicle carrying passengers by road, especially one serving the public on a fixed route and for a fare.

Scooter: A light two-wheeled open motor vehicle on which the driver sits over an enclosed engine with legs together and feet resting on a floorboard.

Segway: A two-wheeled motorized personal vehicle consisting of a platform for the feet mounted above an axle and an upright post surmounted by handles.

Ferry: A boat or ship for conveying passengers and goods, especially over a relatively short distance and as a regular service.

Trolley: A device that carries electric current from an overhead wire to an electrically driven vehicle.

Taxi: A type of vehicle for hire with a driver, used by a single passenger or small group of passengers.

Subway: An underground rapid transit rail system.

Tram: A rail vehicle which runs on tracks along public urban streets, and also sometimes on a segregated right of way.

SENSE OF PLACE
Introduction

"The essence of the place is the center of meaning constructed in the life experience, which includes the activity of the person in the place and the memory accumulated from it."
- Edward Relph

Terms and Principles

Definition
Sense of Place: noun
Sense of place is a concept which is changing a typical space to place with special behavior and sensory characteristics for certain people. It meant connect to place by understanding of everyday activities and symbols associated to it. This sense can be created in an individual living place and be expanded along her life

Related Terms
Character: the tangible and intangible qualities distinctive to an individual place.

Historic Preservation: an endeavour that seeks to preserve, conserve and protect buildings, objects, landscapes or other artifacts of historical significance.

Place Making: a multi-faceted approach to the planning, design and management of public spaces. It capitalizes on a local community's assets, inspiration, and potential, with the intention of creating public spaces that promote people's health, happiness, and well being.

Perception: the ability to see, hear, or become aware of something through the senses.

Reality: the world or the state of things as they actually exist, as opposed to an idealistic or notional idea of them.

Importance of Sense of Place to Cultural Heritage Tourism
The cultural heritage sites often contain pieces of history that elicit a specific aura which is vital to the importance of the place. Properly identifying and preserving the attributes that define a place is a difficult task but the communication of those details are what define a place and keep people coming back. A place that lacks any sort of authenticity or importance is not place that is attractive or unique. By properly taking inventory of place's cultural uniqueness we can use it to show the rare traits that define a place.

Principles

1 Legibility: A place must have distinguishable attributes as well as being comfortable and safe. Places that exhibit a sense of history also attribute to its character.

2 Permeability: A place must be easily accessible with supporting infrastructure that reaches to nearby attractions and other cities.

3 Variety: A place must promote community in a welcoming and non-exclusionary manner so that connections between people can be made.

4 Robustness: A place must have a range of activities and attractions throughout the year to invite people to back but that doesn't interrupt everyday life.

5 Context: A place must be fully integrated to the surrounding area so that it does not appear out of place while also taking existing ecosystems in to consideration.

Sensing Place

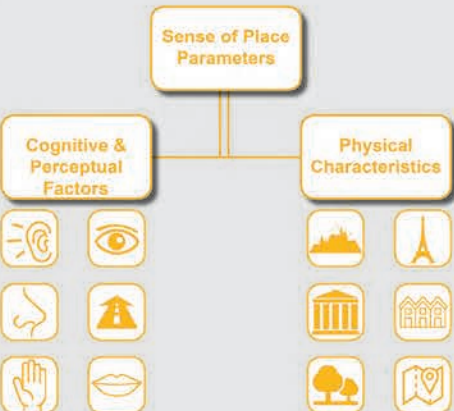

Factors in Affecting Place

The structure of place without people is just only a geographical location and the concept of place is signified only with existence of human. Thus, we can define place with two main characteristics. The first definition is affected by spatial structures and second definition is affected by people routine experiences.

Factors in Forming a Sense of Place

Sense of place is the relationship between man, his image and environmental characteristics. The concept of sense of place on the one hand is rooted in subjective experience of people (memories, traditions, history, culture, and society) and in other hand is affected from objective and external influences of the environment (landscape, smell, sound) that these lead to various association of a place.

Types of Place

Place is regarded as the center of sense of value and meaning and exit in individual or public. As you know, sense of place gives meaning to space with authenticity and reality. From European squares, markets and street landscapes, by the twentieth century, to the main streets of the United States, settlements, to the cities like New York, Boston, Chicago, San Francisco and other cities in the city center, parks, and boulevards. According to different spatial form and social complexity, Place is divided into three levels, each bringing us different feelings.

Paley Park, New York City

Smithsonian Museum, New York City

Unit: The basic carrier of urban life, where the vitality of the place, and is the flash point of human memory. Although, modern transportation expands the scope of people's activities, too fast line of sight movement speed can not give people enough information of space. People have to stay in Unit with slow speed walk which can help them understand the surroundings.

Vinton Neighborhood, Omaha, NE

Granville, Vancouver

Toronto

New York City Metro Area

Group: Architecture and open space together constitute the cluster structure. Compared to a unit, a group can give more complex social functions just like shopping, recreation and office. The atmosphere of group depend on the connection of open space, architecture and surrounding context.

System: Compared to unit and group, the form of the system is composed of a network of groups and have a deeper form and content. The basic form of system is a variety of routes that connect the variety of groups in the system.

Process of Identifying Sense of Place

1 Explore

- Goals:
- Develop and determine the idea of sense of place
- Compare image with visual reality to learn what forms make for strong images
- Suggest some principles for forming sense of place

Points:
The work was done in the conviction that analysis of existing form and its effects on the citizen, and in the hope that some useful techniques for field reconnaissance and citizen interview might be developed as a by-product.

2 Collect

- Goals:
- To help observer understand the location of place and determine main research routes and main districts.

Points:
Observers need to collect data just like
1) Maps: a general aerial view of the region, outline map of the place of investigation,
2) Population: sex, age, amount,
3) Culture: history, culture, tradition.

3 Observe

- Goals:
- Trained observers map the presence of various elements, their visibility, their image strength or weakness, and their connections, disconnections, and other interrelations and who noted any special successes or difficulties in the potential image structure.

Points:
A systematic field reconnaissance of the area was made on foot by a trained observer, who need to accepted concepts of sense of place

4 Interview

- Goals:
- To evoke interviewers their own images of their physical environment. The interview included requests for descriptions, locations, and sketches, and for the performance of imaginary trips.

Points:
The amount of sample need to be large. To help generalize from these, and to say that a true public image of the place has been uncovered.

5 Identify

- Goals:
- To find out the common or related features of place, by information getting from interviews.
- Consider the impact of cultural, physical factors

Points:
Make sure the methods are reliable.

SENSE OF PLACE  
Process

Explore & Collect

Characters in Sense of Place

Place, in some studies, mentioned to the quality of place or personal valuable Judgment about physical properties of place which is used in contrast with "placelessness". In general, place is a space which take meaning in cultural, individual and social process. In fact people change space to the concept of place based on their social bonds, feeling and emotions. Gieryn explains place in three characters as: geographical location, physical parameters and identity which is composed of meaning and value.

**Physical Parameters** - Effect on sense of place as: Size, Scale, Components, Diversity, Texture, Decoration, Color, Odor, Noise, Temperature. This is often influenced by a place's program and culture.

**Geographical Location** - A particular place or position. This character has nothing to do with human activity so it is essentially the base of a place. A location can usually be tangibly found and shared.

**Identity** - The most important character in sense of place is identity because it attaches to the emotional side of humans and becomes more recognizable. This is achieved through experiences, memories and history.

Human-Place Interaction

In general, interaction between humans and places is in three dimensions: **Cognitive, behavioral and emotional.**

- Cognitive aspects of the interaction are led to **spatial perception** and during that, people know the **environmental elements** and use them to navigate their way.
- Behavioral aspects of the interaction are mentioned to **activities and functional relationship** between people and environment.
- Emotional interaction with place points to **satisfaction and attachment** to place.

This relevance can be so strong that create a tie between individual and components. In this regard, **people experiences are the main tools** of their perception. Cognition interaction pointed to **formal aspects of places**. In behavioral interaction, perception of the **functional aspects and the types of activities** on the environment are considered. Finally, in relation to emotional interaction, **emotional and meaning** of places are considered.

Different Scales of Sense of Place

Sense of place as a collection of symbolic meanings, attachment, and satisfaction with a spatial setting help by a group or individual.

**Knowledge of being located in a place:** in this level people are familiar with the place, they identify the symbols of the place but they do not have any particular emotional connection to the place and its symbols. Therefore, they do not integrate themselves with the place.

**Belonging to a place:** in this phase, people not only are familiar with the place but they have an emotional connection with the place. In this stage, people distinguish the symbols of the place and in contrast to the previous stage those symbols are respected.

**Attachment to a place:** people have a strong emotional relationship with the place. The place is meaningful and significant to people. In this regard, the place has unique identity and character to the users via its beloved symbols.

**Identifying with the place goals:** in this level, people are integrated with the place, moreover the goals of the place are recognizable by the people. The users also are very satisfied with these goals; hence they have a deep attachment to the places.

**Involvement in a place:** in this level people have an active role in the place. They would like to invest their own resources such as money, time, or talent in the activities of the place. Therefore, as opposed to previous levels that were mostly based on attitude, this stage is probed mainly through the real manners of the people.

**Sacrifice for a place:** this level is the last and also the highest point of Sense of place. Deepest commitment to a place is the main aspect of this phase. People would like to sacrifice of important attributes and values such as prosperity, freedom, or, life itself.

Observation & Interview

Main goals:

Two different questions are contained within this general one: (a) how reliable are the methods, how truthful are they when they indicate a certain conclusion? and (b) how useful are they? Are the conclusions valuable in making planning decisions, and is the effort expended worth result.

Observation

The observation covered the following content:

1. Trained observer instructed in the concept of sense of place
2. Map the area, indicating the presence, visibility, and the interrelations among the physical parameters and culture and spirit.
3. The Observer divided the elements into categories of major or minor significance, "major" elements being those exceptionally strong or vivid, and continually asked himself why this element had strong or weak identity to help form sense of place, why this connection seemed clear or obscure.

Interview

The interview covered the following questions:

1. What first comes to your mind about this district sense of place, what symbolizes the word "Red Cloud" for you? How would you broadly describe "Red Cloud"
2. We would like you to make a quick map of central Red House, inward or downtown. Make it just as if you were making a rapid description of sense of place of this city to a stranger, covering all the main features. We just need a rough sketch.
3. Do you have any particular emotional feelings about parts of your city? How long would it take you?
4. What kind of elements of the city you think are most distinctive. They may be larger or small, but tell us those that for you are the easiest to identify and remember.
5. Free discussion

The interview covered the following principles:

1. The interviewers are supposed to large enough to help form a true public sense of place. Otherwise, the small size was made necessary by the broad type of inquiry that was made, and by the lengthy time required for the elephantine and experimental technique of analysis.
2. It shouldn't be the unbalanced nature of the samples chosen. The interviewers should well balance as to age and sex. And we also need to collect the basic information.

Basic Information of Interviewees

Gender	Female Male
Age	Under 30 30-40 40-50 above 50
Race	White African-American Latino Native American
Religion	Catholic Protestant Jewish
Place of origin	City County State
Education	Uneducated Primary Junior Senior Undergraduate
Residence Length	Under 1 year 1-3 year 3-5 year 5-10year above 10year

Route Edge Node District Landmark

Public Sense of Place

The interview was conducted first in order to test the hypothesis of sense of place; second, to gain some rough approximation to the public sense of place, which might be compared to the findings of the field reconnaissance

Sketch Map

A sketch map of the city, for the detailed description of a number of trips through the city, and for a listing and brief description of the parts felt to be most distinctive or vivid in the subject's mind.

Most Distinctive Elements

To develop a short-cut method for eliciting the sense of place, and see what kind of elements contribute the sense of place mostly.

Basic Information of Interviewees

Gender	Female Male
Age	Under 30 30-40 40-50 above 50
Race	White African-American Latino Native American
Religion	Catholic Protestant Jewish
Place of origin	City County State
Education	Uneducated Primary Junior Senior Undergraduate
Residence Length	Under 1 year 1-3 year 3-5 year 5-10year above 10year

Identification

Among accounts of critical scholar, the term 'place' is defined as space states between people and the environment setting. Interpretations of reviewed studies engaged to better understand on how to discover people's perception, experience and responses towards their surroundings based on elements that relate to their culture and norms. These components will form the skeletal framework of the study in establishing individual understanding of sense of place. There are three dimensions of spiritual, cultural and visual aspects for identifying it.

Spiritual Cultural Visual

1.Sense of place in relation to spiritual dimension

The ideas of spirit within the place or character of place make up the sense of place, and how feelings like stimulated, excited, joyous are an example of this experience which is felt through all the sense such as sight, hearing, taste and touch.

A place is just not an object, but through the area and experience of meaningful activities. In the relationship to places and people's experience that relating to the human characters, the experience help people form attachments to home and surroundings, their feelings about space and place that affected by the sense of time.

As " Being in" the old cities can also bring people back in reminiscent of younger days. The definition "sense of place" includes where the meaning and physical elements similar to people experiential place representing beliefs and about their memories.

Sight Hearing Taste Touch Experience stimulated excited joyous Sense of Place feelings for place place attachment

2.Sense of place in relation to cultural dimension

While an inventory of place provides the initial context for building sense of place and establishing community identity, the combination of context and the reinforcement of the current climate and culture of a place create community character or identity.

The creative characteristics of a community or neighborhood may include the following:

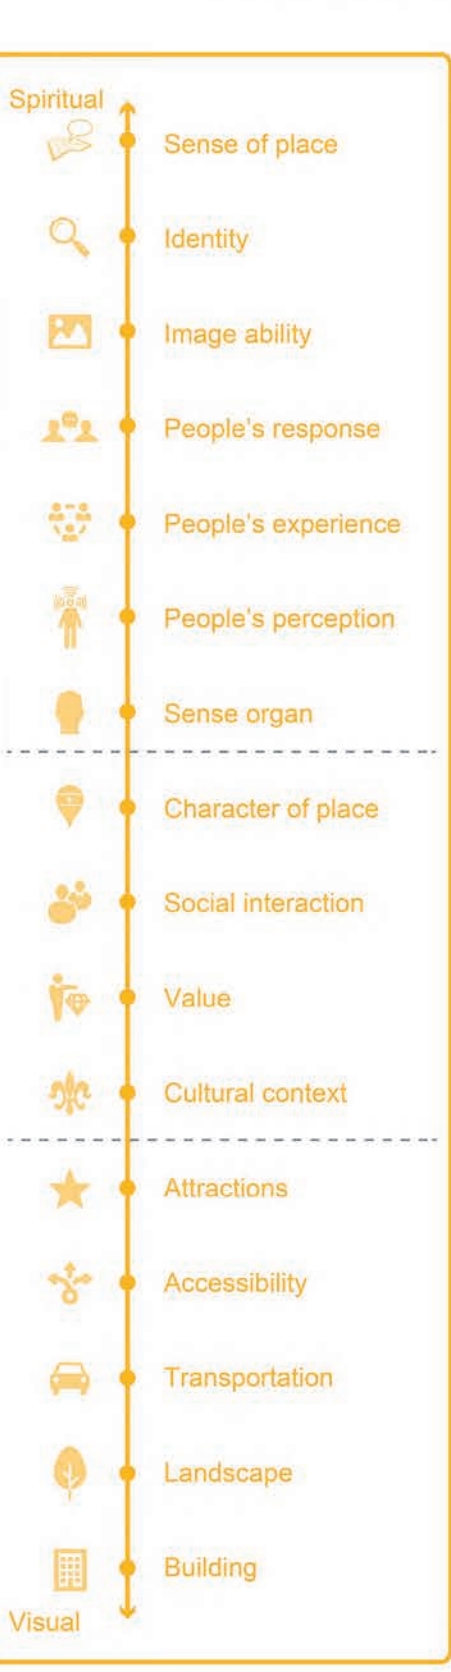

- population and demographic information
- local social and architectural history
- languages spoken
- food culture
- unique customs
- current landscape
- scale of existing buildings (residences, as well as commercial, governmental, and institutional buildings)

3.Sense of place in relation to visual dimension

The idea of five elements such as landmarks, districts, buildings, sites and monuments as necessary image visually needed to test the mechanism and attributes of these elements for a city landscape

The visual dimension such as buildings has become very popular topic to bring up the character of the place. Preliminary work on visual was undertaken by Thwaites how important the building heights in the design of the city and with the certain image of the city affected.

Resources Buildings Districts Landmarks Monuments Sites Forms Attractions Identity of place Sense of Place Spatial structure

SENSE OF PLACE

Case Study---Sense of Place Identity in Wilber

Wilber Immigration History

Why they came to US:

- 1. There was a shortage of farm land in their country. Farms were too small to make a good living. For many peasant farmers the thought of owning land was only a dream. People often sold their small land holdings to pay for the trip to America. Czechs also left their homeland due to political and religious prejudice and to avoid military service.
- 2. Political.
- 3. Religious prejudice
- 4. Avoid military service.
- 5. Magazines like the Hospodár (husbandman or farmer), an Omaha agricultural journal, helped promote Czech settlement in the United States. Many families emigrated on the basis of information.

The reason why they came to Nebraska

- 1. Advertisements like this one influenced Czechs to come to Nebraska. Nebraska was a new state and needed people to increase its population.
- 2. The Burlington and Missouri Railroad, which had large areas of Nebraska land for sale, printed advertisements in the Czech language. It showed the first six years on an American farm and the "ease" with which success could be achieved. Most of the Czechs who came to Nebraska were farmers, but tradesmen and professional people came, too.

Wilber Czech Assets---Visual Dimension

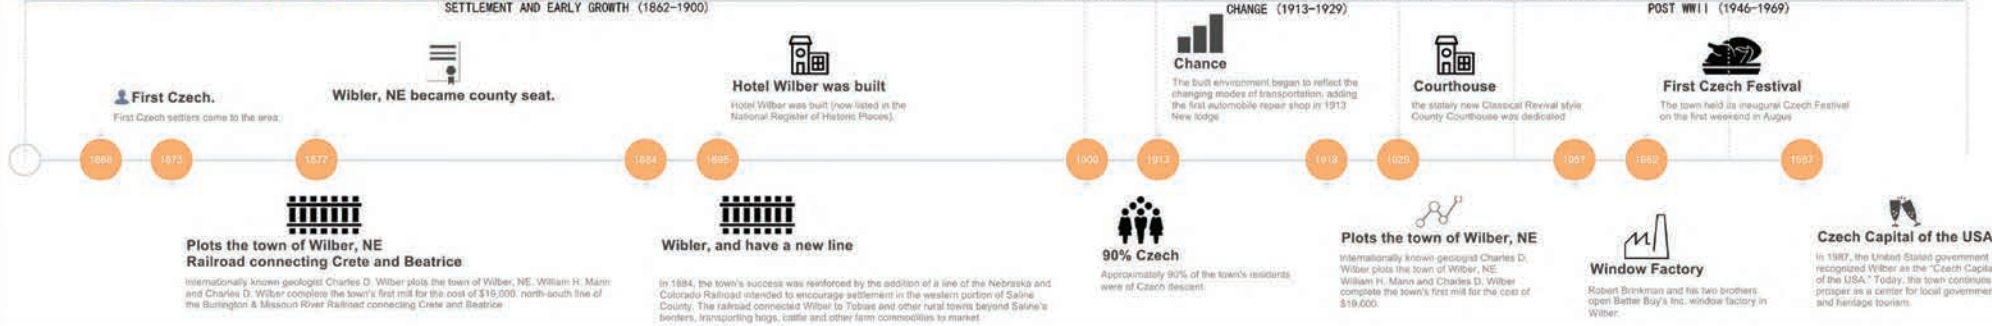

1. Wilber Marker  
Czech Capital of Nebraska - Wilber features one historical marker, located at the junction of Nebraska Highways 103 and 41 downtown, which depicts Wilber as the Czech Capital of Nebraska.

2. Wilber Czech Museum  
The Wilber Czech Museum was established to preserve Czech artifacts that pertain to the heritage and culture of the Czech pioneer settlers in Nebraska. The museum exhibits collections of Czech dolls, Czech dishes, quilts, replicas of early immigrant homes and Wilber businesses, agriculture, paintings, specialized laces and Czech costumes, medical items, guns and antiques.

Wilber Czech Memory---Spiritual Dimension

Wilber Czech Festival---Cultural Dimension

- Formation**  
Since 1962, it founded principally by Walter and Helene Novak Baer, with cooperation from state and many local leaders, interest in the Czech heritage has been revived.
- Feature**  
Authentic costumes worn by participants, workers, and some visitors. Czech food, a beer garden, bands, decorated store fronts, Czech and American flags, an old-world atmosphere, free parking, and free admission for nearly all events make it a remarkable family and fine arts affair.
- Influence**  
The largest ethnic festival in Nebraska, held annually the first full weekend in August, attracts an average of 40 to 50 thousand visitors.
- Activities**  
It includes the activities of Wilber-Clatonia Czech Alumni Band; all kinds of entertainments, like music and dancing, quilt show, talent contest; children's parade and grand parade.

1. Wilber-Clatonia Czech Alumni Band  
In 1988, approximately 90 Wilber and Wilber-Clatonia alumni band members assembled to celebrate Wilber's 25th annual Czech Days. Besides having a lot of fun reuniting with former classmates and band members, the organization has continued to meet every year to march in both Saturday and Sunday parades, present a concert, and play for the pure enjoyment of preserving and promotion of local Czech heritage and music.

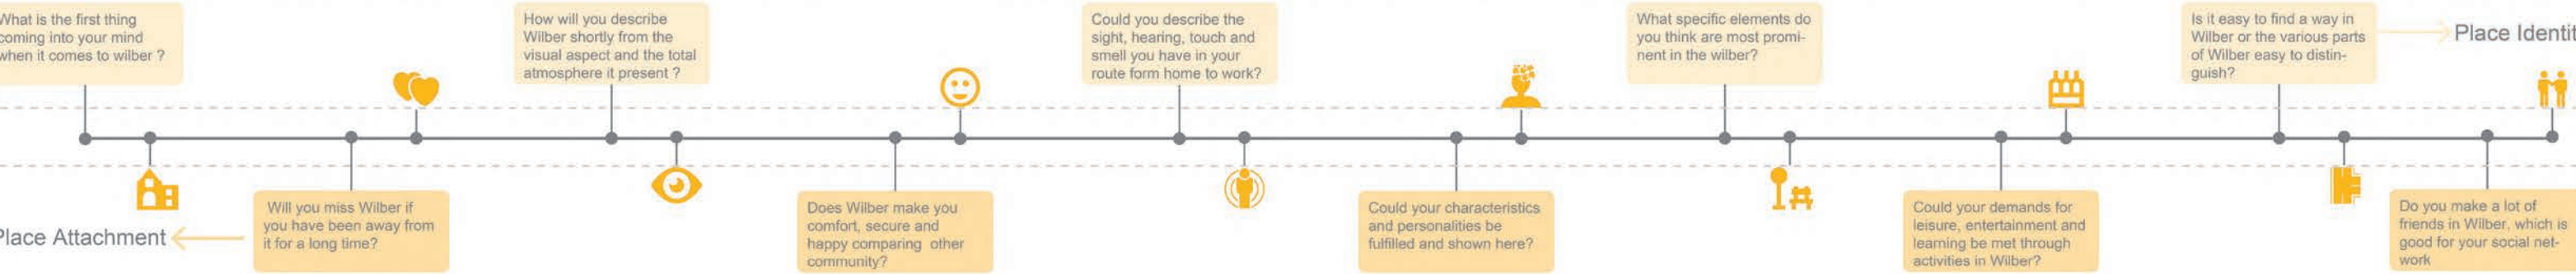

2. Entertainment  
Music and Dancing  
Music is and always has been an important part of the Czech culture. The "Tales of the Czechs" can be seen at the Outdoor Theatre both Friday and Saturday nights at about 9pm.  
Quilt Show  
Visit the Extension Office Saturday and Sunday from 10am to 5pm to view beautiful, handmade quilts from around the country.  
Talent Contest  
It will be held at the Outdoor Theater south of the Wilber Swimming Pool on Saturday at 3:30 p.m.

3. Parades  
Children's Parade  
The Children's Parade is Friday night at 7:00 pm. The parade route will go East down 3rd Street starting at School Street and ending at Main Street.  
Grand Parade  
The Grand Parade begins at 2:00 pm both Saturday & Sunday. Parade forms in Legion Park at 12:30 p.m. and follows the arrowed route.

# AUTHENTICITY+QUALITY+INTERPRETATION

## Introduction

“When you open your mind, you open new doors to new possibilities for yourself and new opportunities to help others.” - Roy T. Bennet

### Authenticity

**Synopsis**  
“Nothing is original. Steal from anywhere that resonates with inspiration or fuels your imagination. Devour old films, new films, music, books, paintings, photographs, poems, dreams, random conversations, architecture, bridges, street signs, trees, clouds, bodies of water, light and shadows. Select only things to steal from that speak directly to your soul. If you do this, your work (and theft) will be authentic. **Authenticity** is invaluable; **originality** is non-existent. And don't bother concealing your thievery - celebrate it if you feel like it. In any case, always remember what Jean-Luc Godard said: “It's not where you take things from - it's where you take them to.” -Jim Jarmusch

**Define Term**  
1a : conforming to an original so as to reproduce essential features  
1b : made or done the same way as an original  
2 : not false or imitation : real, actual  
3 : true to one's own personality, spirit, or character

**Cultural Heritage Tourism Criteria**  
There are eight basic criteria in which we can judge authenticity..  
1. esthetics  
2. uniqueness  
3. cultural and historical integrity  
4. workmanship  
5. local care and attention  
6. cultural community interactions  
7. current functionality  
8. certification

**Basic Principles**  
1. User Empathy  
2. Honest to Origin  
3. Rich in Culture

**Self Authentic Person**  
One whose demeanour is true to self value and moral not wavering by social surroundings but environmentally aware.

**Physically Authentic**  
A recognizable and valid thing that can be of value.

### 1A Self Authenticity

**Goals:**  
Promote user authenticity by encouraging them to interact with the Environmental Surroundings that create the sense of self being.

**Examples:**

### 1B Physical Authenticity

**Goals:**  
Design approaches must be centered upon historical meaning and aesthetic tradition. Using new technology to bring it forward to a more sustainable future.

**Examples:**

### Quality

**Synopsis**  
“Quality means doing it right when no one is looking.” -Henry Ford

“Raise your **quality** standards as high as you can live with, avoid wasting your time on routine problems, and always try to work as closely as possible at the boundary of your **abilities**. Do this, because it is the only way of discovering how that boundary should be moved forward.” -Edsger Dijkstra

**Define Term**  
1a : peculiar and essential character  
1b : an inherent feature : property  
1c : capacity, role  
2a : degree of excellence  
2b : superiority in kind

**Basic Principles**  
1. Visitor Involvement  
2. Piece of Mind  
3. Educational Experience

**Cultural Heritage Tourism Criteria**  
Quality of tourist experience can be judged through five basic criteria.  
1. immersion  
2. surprise  
3. education  
4. peace of mind  
5. satisfaction

**Quality Experience**  
The standard of something as measured against other things of a similar kind; the degree of excellence of something.

**Qualities of Experience**  
The individual components that make up the overall experience

### 2A Quality Experience

**Goals:**  
Experience should be immersive, safe, educational, unique, and enjoyable leading to an experience that meets or exceeds user expectations.

**Examples:**

### 2B Qualities of Experience

**Goals:**  
Users should have access to all necessary amenities required to achieve a complete experience

**Examples:**

### Interpretation

**Synopsis**  
“Interpretation refers to the act of **revealing** the significance of a place, person, artifact, or event. It is **telling the story** in such a way that people will want to **learn** and perhaps return again and again.” -Dallon Timothy

“A work survives its readers; after a hundred or two hundred years, it is read by new readers who impose on it new modes of **reading** and **interpretation**. The work survives because of these interpretations, which are, in fact, **resurrections**; without them, there would be no work.” -Octavio Paz

**Define Terms**  
1 : the act or the result of interpreting : explanation  
2 : a particular adaptation or version of a work, method, or style  
3 : a technique that combines factual with stimulating explanatory information

**Cultural Heritage Tourism Criteria**  
These are six criteria in which interpretation can be judged.  
1. reliable  
2. educational  
3. combination of arts  
4. provoke thought  
5. present whole information  
6. adaptive strategies

**Basic Principles**  
1. Create Meaning  
2. Establish a Connection  
3. Elevate information

**Formal Interpretation**  
Occurs in a controlled environment such as a museum or historic site.

**Informal Interpretation**  
Occurs outside of the formal educational zone and is more dependant on user participation

### 3A Formal

**Goals:**  
Educate visitors in an entertaining way to reveal the significance of a place, person, artifact, or event.

**Examples:**

### 3B Informal

**Goals:**  
Establish a personal connection with the visitor to prevent a sterile experience

**Examples:**

AUTHENTICITY+QUALITY+INTERPRETATION

Authenticity

**Self Authenticity**

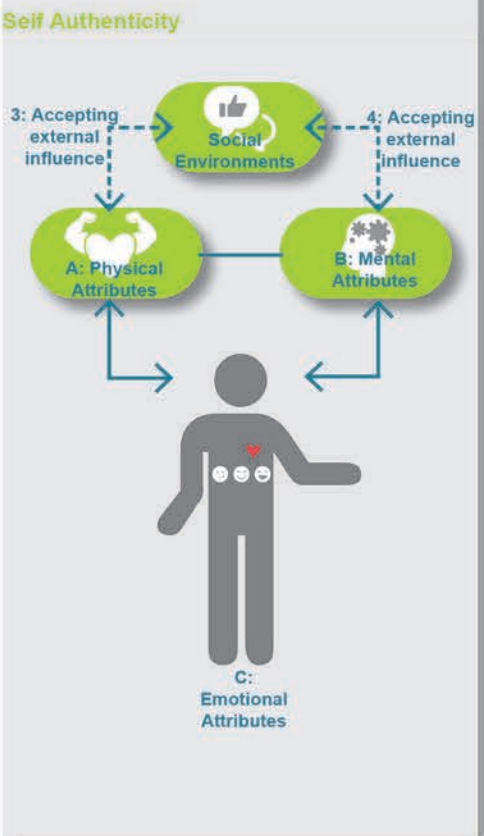

**Quotes**

"Nothing is original. Steal from anywhere that resonates with inspiration or fuels your imagination. Devour old films, new films, music, books, paintings, photographs, poems, dreams, random conversations, architecture, bridges, street signs, trees, clouds, bodies of water, light and shadows. Select only things to steal from that speak directly to your soul. If you do this, your work (and theft) will be authentic. Authenticity is invaluable; originality is non-existent. And don't bother concealing your thievery - celebrate it if you feel like it. In any case, always remember what Jean-Luc Godard said: "It's not where you take things from - it's where you take them to."

-Jim Jarmusch

**Define Terms**

**Authenticity:** 1a : worthy of acceptance or belief as conforming to or based on fact  
1b : conforming to an original so as to reproduce essential features  
1c : made or done the same way as an original  
2 : not false or imitation : real, actual  
3 : true to one's own personality, spirit, or character

**User to User Authenticity**

**Basic Principles**

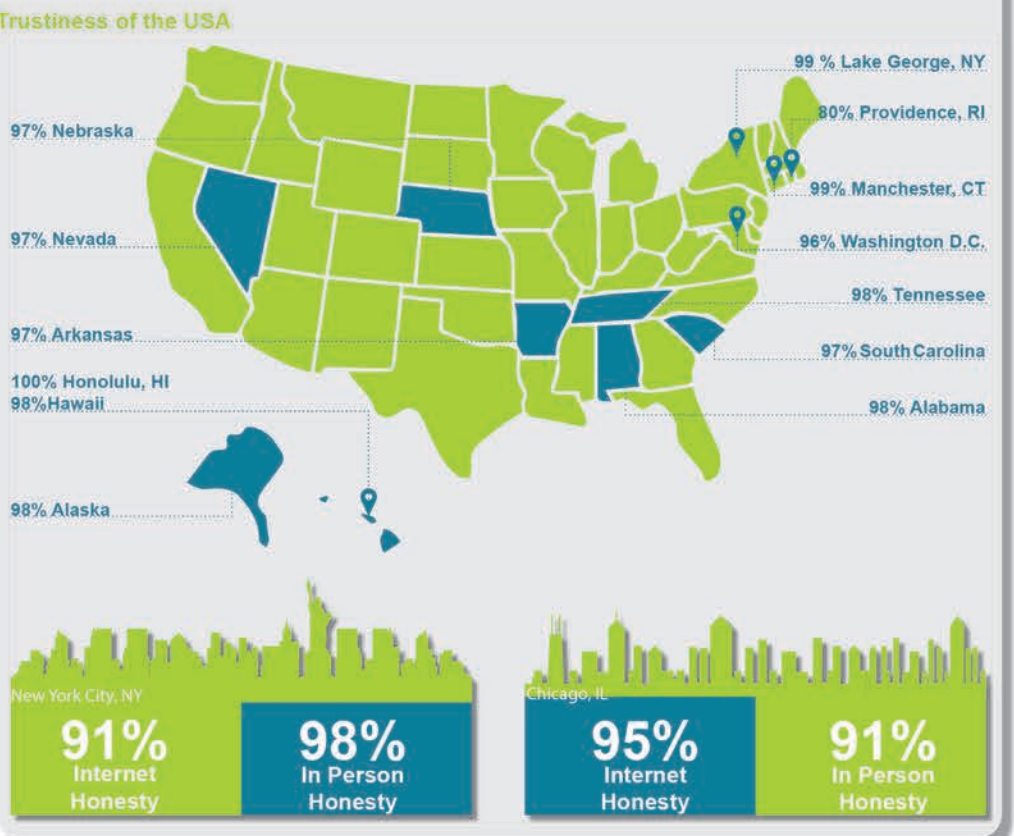

- 1. User Empathy**  
The user always seeks out something. Within design there should be opportunity for adventure and mystery to be able to fulfill feeling of self authenticity.
- 2. Honest to Origin**  
Heritage and Culture are built upon the idea of origin. Design should be based upon historical background of the place. This improves the idea of authenticity and create a deeper meaning.
- 3. Rich in Culture**  
Culture is the identity of a group of people. Keeping in mind culture during design will influence the way spaces are created and how nature interacts with them.

**Related Terms**

**Faithful** : true to the facts, to a standard or to an original.  
**Ventable** : being in fact the thing named and **not false**, unreal, or imaginary.  
**Dependable** : capable of being **trusted**.  
**Certain** : of a specific but unspecified character, quantity, or degree.  
**Actual** : **not false** - existing in fact or reality : used for emphasis.  
**Accurate** : conforming exactly to truth or to a standard.

Authenticity Measurement: 3/4ths of these must be met to be authentic.

- 1. Aesthetics** : Tourist determine if things are authentic by what seems to be beautiful.
- 2. Uniqueness** : When fewer of something exists it creates a scarcity value.
- 3. Cultural and Historical Integrity** : Being able to truthfully tell the historical past.
- 4. Workmanship** : Legitimacy of a place can be equated by the creativity of work.
- 5. Local Care and Attention** : Shared culture through mutual respect.
- 6. Local Community Interactions** : Able to observe the processes of handiwork.
- 7. Current Functionality** : If it is in current use tourist observe this as truly authentic.
- 8. Certification** : Physical and legal documentation of authenticity.

**Physical Authenticity**

**Historical Significance**

Latin Roots of Authenticity: mid-14c, "authoritative," from Old French autentique (13c, Modern French authentique) "authentic; canonical," and directly from Medieval Latin authenticus, from Greek authentikos "original, genuine, principal," from authentēs "one acting on one's own authority," from autos "self" (see auto-) + hentes "doer, being," from PIE \*sene- "to accomplish, achieve." Sense of "entitled to acceptance as factual" is first recorded mid-14c.

**Traditionally in modern use**, authentic implies that the contents of the thing in question correspond to the facts and are not fictitious; genuine implies that the reputed author is the real one; but this is not always maintained: "The distinction which the 18th c. apologists attempted to establish between **genuine** and **authentic** ... does not agree well with the etymology of the latter word, and is not now recognized" [OED].

**In art**, authenticity is perception of art that is based upon the faithful **genuine** self in contrast to conformity to external influences and values. Compromising and conforming is a path to becoming inauthentic in art, music, writing and design.

**Importance to Cultural Heritage Tourism**

**Commodifying the Self**

The human mind has a tendency to constantly search out and reconfigure itself based upon new environments that it engages. Current tourism only allows so much as a "fake" stay away from home in prefabricated living quarters with no value to them. This is deemed as "lacking" which causes the mind to want more to eliminate the lacking feeling. This is due to the theory of the mirror. This theory asks how can we expect to feel fulfilled in prefabricated unvalued hotel spaces when we live in the meaning of our individual lives. When we look into a mirror we see the same thing in reality and in reflection meaning as we travel and experience tourism we want to experience the authentic reality of other peoples lives.

**The Market Construction of Meaning**

Due to the "McDonaldization" (Ritzer 1993) of capitalist societies people have begun to **desire** more. The culture today emphasizes consumption and a commitment to globalization of the economy. This consumption is linked to everything about **ones self**, it is our social distinction. Although we are often defined by social constructs such as **class, work, church, civil society, family, and home**, it can be argued these are intertwined with what we consume. These non-instrumental and surface level relations have found people to desire going **deeper** into **self meaning**.

**Historic Authenticity**

The diagram shows a central green circle labeled 'Residents' and 'Town Center'. Surrounding it are concentric circles labeled 'Agriculture', 'Residents', and 'Town Center'. Below the diagram are eight numbered items: 8: Certification, 2: Uniqueness, 5: Local Care, 1: Aesthetics, 4: Workmanship, 3: Cultural/Historical Integrity, 6: Cultural Community Interactions. Below these are four images: a street scene, a church, a castle, and a group of people.

**Contrived Authenticity**

The diagram shows a central green circle labeled 'Castle'. Surrounding it are concentric circles labeled 'Agriculture', 'Residents', and 'Town Center'. Below the diagram are four numbered items: 2: Uniqueness, 1: Aesthetics, 2: Uniqueness, 1: Aesthetics. Below these are four images: a castle, a castle, a castle, and a castle.

**Great Plains Authenticity**

The figure shows a map of the Great Plains region. Callouts indicate authenticity percentages for various locations: 97% Nebraska, 97% Nevada, 97% Arkansas, 100% Honolulu, HI, 98% Hawaii, 98% Alaska, 99% Lake George, NY, 80% Providence, RI, 99% Manchester, CT, 96% Washington D.C., 98% Tennessee, 97% South Carolina, 98% Alabama.

AUTHENTICITY+QUALITY+INTERPRETATION

Quality

**Qualities of Self**

**Quotes**

"Quality means doing it right when no one is looking." -Henry Ford

"Raise your quality standards as high as you can live with; avoid wasting your time on routine problems, and always try to work as closely as possible at the boundary of your abilities. Do this, because it is the only way of discovering how that boundary should be moved forward." -Edsger Dijkstra

**Define Terms**

**Quality:**

- 1: peculiar and essential character
- 2: degree of excellence
- 2b: superiority in kind
- 3: a distinguishing attribute or characteristic

**Qualities of User Satisfaction**

**1. Immersion**  
Involvement of visitor during consumption  
Interaction between visitor and service

**2. Surprise**  
Experience is unique, special, fresh

**3. Education**  
Significance of experience revealed  
Visitor returns after initial visit

**4. Peace of Mind**  
Physical and physiological safety + comfort

**5. Satisfaction**  
Experience meets expectations  
Experience is entertaining

**Emotion Wheel**

**Qualities of Tourism**

**Basic Principles**

**1. Involvement**  
The user should have choice and control over the service or experience that is being offered. There should be a sense of mutual cooperation between the experience and the user.

**2. Peace of mind**  
Physical and psychological safety and comfort should be felt by the user during their experience

**3. Educational experience**  
Education insures the user gains something from their experience. The visitor should be feel personally invested.

**Related Terms**

**Aspect:** a particular part or feature of something.

**Character:** the mental and moral qualities distinctive to an individual.

**Condition:** the state of something, especially with regard to its appearance or working order

**Element:** a part or aspect of something abstract, especially one that is essential or characteristic.

**Kind:** a group of people or things having similar characteristics.

**Trait:** a distinguishing quality or characteristic, typically one belonging to a person.

**Distinction:** a difference or contrast between similar things or people.

**Historical Significance**

Latin Roots of Quality:  
C.1300, "temperament, character, disposition," from Old French qualite "quality, nature, characteristic" (12c.; Modern French qualit ), from Latin qualitatem (nominative qualitas) "a quality, property, nature, state, condition" (said [Tucker, etc.] to have been coined by Cicero to translate Greek poiot s), from qualis "what kind of a," from PIE pronominal base \*kwo- (see who). Meaning "degree of goodness" is late 14c. Meaning "social rank, position" is c. 1400. Noun phrase quality time first recorded 1977. Quality of life is from 1943. Quality control first attested 1935.

**Qualities of Place**

Top 10 countries To Live In

**Importance to Cultural Heritage Tourism**

**User Experience**

A quality user experience is one that meets or exceeds the visitor's expectations. This quality of user experience is the primary target when examining tourism. It is paramount that the user has the best possible experience from the moment their experience begins to the moment it ends. A quality experience should be unique and interactive so that a connection is made between the visitor and whatever they may be seeing or doing. All necessary amenities should be provided so that safety and comfort is felt.

Quality not only impacts the user experience, but through Cultural Heritage Tourism, quality also has a major influence on the quality of life for the citizens of the town. Tourists have the same needs as those living there. For the citizens of the town, this means increased revenue, and increased quality of life. Quality also refers to the qualities of an area that give it sense of place.

**Regional Quality**

top ten cities to live in

# REGIONAL CULTURAL HERITAGE TOURISM

## Tourist Experience

### Spending and Amenities Preferences

- All tourists are different but their actions can be projected based upon the ability to categorize them economically and demographically
- Tourist independent variables such as income, life-stage, and background all factor in to how much money someone will spend as well as on what they will spend:
- Through analyzing Esri's 14 Life Mode Groups via the lens of tourism, groups can be identified as prime targets for Regional Heritage Tourism
- Looking at **weekend escapes** as the primary travel motivation for people to visit this region, we are able to categorize life mode groups in terms of

#### Spending and Amenities Groups

- Budget Tourism
- Mid-range tourism
- High End tourism

### Motivation:

- The reason for which someone justifies doing something: the **driving factor in why a tourist plans and seeks out certain experiences**
- Tourist motivation is **driven by a person's demographics, lifestyle, income, background, ability to adapt to new or challenging experiences**, and other personal factors.
- Common Motivations**
  - Leisure
  - Learning
  - Historical Ties
  - Outdoor activity and recreation
  - Weekend escapes
  - Family Bonding

### Budget Tourist

- Budget visitors are either couples on a budget or older couples possibly traveling with grandchildren.
- Often travel by RV
- They want **affordable activities**
- They want a nice RV camp to serve as their lodging and base of operations.
- They are looking for a **mix of activities suitable for both youth and older adults**
- Combine their meals by making/taking their own and eating at local family dining options.
- Doesn't plan itinerary heavily

### Mid-Range Tourist

- Boomer and GenX couples **likely without children**
- May travel with friend
- Often a classic couples outing
- Need **affordable lodging**
- They prefer family dining options
- Dining options that are **healthy and quality are valued**
- Often will be happy **visiting sites without a docent or guide**
- Itinerary** creation through site research is **prepared in advance** so they can make it easier to meet everyone's expectations.

### High-End Tourist

- Primarily Boomer and older GenX couples without children
- They may **travel with friends** to enhance the get-away experience.
- looking for a nice and relaxing **few days getaway from home and work**.
- Hardworking professionals and business owners
- Short **high-value trips** are appealing
- They are more affluent and they are willing to **spend more for better lodging, food, drink and experiences**
- They appreciate **concierge-level service and experience docents**

### Needs vs Desires

- Need:** a physiological or psychological requirement for the well-being of an organism
- Necessary for full tourist engagement**
- Something required for another thing to function or occur
- Desire:** to express a wish for, to long or hope for, to want
- Non-essential but beneficial to tourist satisfaction**

## Tourist Experience History

### Spending and Amenities Preferences

The reason for which someone justifies doing something: the driving factor in why a tourist plans and seeks out certain experiences

### Accommodations

- RV's and Campsites**
- Electricity
  - Sewer access
  - Water Access
  - Area Guides

- Affordable Motels and Bed and Breakfasts**
- Safe and comfortable
  - Clean
  - Continental Breakfast
  - Free Parking
  - Guides in the Lobby

- Hotels and High End Bed and Breakfasts**
- Room Service
  - In-building bar or dining
  - Mini-bars
  - Gym
  - Pool
  - Elevators
  - Concierge Service
  - Luggage and Valet Services

### Food

- Family Friendly Dining**
- Other traveling with kids, budget tourists will often need family friendly dining options to supplement their own meals
  - Chain restaurants
  - Local favorites

- Family Friendly Dining**
- This group prefers affordable dining venues and dining experiences that provide numerous options as well as healthy eating options.

- High-End Dining**
- Appreciate Quality Service and a Variety of menu options
  - Wine/drink variety
  - Steak Houses
  - High quality craft restaurants

### Information Access

- This group will get most of their information from casual sources such as:
- road signs
  - brochures, journals
  - Friends
  - prone to "wing it"

- This group values **itinerary** making before hand in order to meet the needs and desires of everybody involved.
- Travel Guides
  - Pamphlets
  - Internet Articles and Reviews
  - Board of Tourism Resources

- This group prefers concierge level service in both accommodation as well as experience
- This group often hires travel agents and trip packages
  - This group likes to have docents available in order to best be immersed in the experience
  - Trip Guides and Docents

### Esri Life Modes

- The Esri lifemodes categorize people in the united states in 67 different categorizations
- The groups lie within a spectrum of lifemodes which speak generally to the: character, habits, demographics
- The Esri system is based off of large data and works to take geographic and demographic data to categorize these people in a way in which their actions can be forecasted

### Heartland Community

Motivation: Leisure, Escape, Education, Physical Activities

Key Elements: Likely to spend money with small businesses. Favors American made products and experiences.

#### Profile:

"Well settled and close-knit, Heartland Communities are semirural and semi-retired. These older householders are primarily homeowners, and many have paid off their mortgages. Their children have moved away, but they have no plans to leave their homes. Their hearts are with the country; they embrace the slower pace of life here but actively participate in outdoor activities and community events. Traditional and patriotic, these residents support their local businesses, always buy American, and favor domestic driving vacations over foreign plane trips."

### Parks and Rec

Motivation: Leisure, Education, Escape, Family bonding

Key Elements: Budget wisely, but enjoy indulging on experiences that enhance family conditions.

#### Profile:

"These practical suburbanites have achieved the dream of home ownership. They have purchased homes that are within their means. Their homes are older, and town homes and duplexes are not uncommon. Many of these families are two-income married couples approaching retirement; they are comfortable in their jobs and their homes, budget wisely, but do not plan on retiring anytime soon or moving. Neighborhoods are well established, as are the amenities and programs that supported their now independent children through school and college. The appeal of these kid-friendly neighborhoods is now attracting a new generation of young couples."

### The Great Outdoors

Motivation: Education, Leisure, Outdoor Activities, Escape vacations

Key Elements: May buy vacation units where they enjoy visiting and have their needs met

#### Profile:

"These neighborhoods are found in pastoral settings throughout the United States. Consumers are educated empty nesters living an active but modest lifestyle. Their focus is land. They are more likely to invest in real estate or a vacation home than stocks. They are active gardeners and partial to home-grown and home-cooked meals. Although retirement beckons, most of these residents still work, with incomes slightly above the US level."

### Exurbanites

Motivation: Cultural exploration, Arts related experiences, escape from urbanity

Key Elements: Generous spenders, enjoy learning, enjoy social atmospheres, they are willing to travel to explore or experience something new.

#### Profile:

"Exurbanites residents are now approaching retirement but showing few signs of slowing down. They are active in their communities, generous in their donations, and seasoned travelers. They take advantage of their proximity to large metropolitan centers to support the arts, but prefer a more expansive home style in less crowded neighborhoods. They have cultivated a lifestyle that is both affluent and urbane."

# TOURIST EXPERIENCE

## Attributes of Tourist Experience

### Nostalgia Theory

**Nostalgia** noun [nəˈstæljə] a positively toned evocation of a lived past in the context of some negative feeling toward present or impending circumstance

Differentiates itself from other subjective states oriented to the past such as remembrance and reminiscence

It is comparative and value-laden in its metrics because it involves the filtering of certain memories

It involves juxtaposing particular constructions of the past (e.g., beauty, pleasure, joy) with constructions of the present (e.g., wretched, ugly, frightening).

Scholars have perceived that the current trend of cultural heritage tourism is being driven by a longing for past conjured by discontent over present conditions

Nostalgia can be extended beyond the lived experience to include the longing for a culturally remembered past that occurred before someone's birth

One criticism of this theory is that these cultural sites don't present a "true past," they give "fantasies of a world that never was."

### Great Outdoors

### Gaining Historical Insight

Users of these destinations need to be able learn some significance of the places that they are traveling to

Users can learn new information by being proactive and reading about destinations before actually arriving

The relating of personal experience to a destination helps to put into perspective how vastly different times were previously compared to the present

Informative placards that are located at various placards paraphrase important history that is relevant to visitors

Different modes of transportation helps to compare travel in the past to the present and how these technological advances have helped shaped human interaction in the grand scheme of socialization

### Experience of Driving

Driving through different regions allows the user to establish unique connections to the landscapes they pass through

Low traffic levels allows users the opportunity to fully experience the sequence to their destination because there is no rush in getting there

There are unique experiences that can be had when driving to a destination (e.g., riding with the top down and having 360 degree view)

There is an increase in the amount of sensory activity while driving that makes a driver more aware and careful of their surroundings

### Visiting Unique Places

There are unique attractions at each destination that each user can find and create a connection with

The mixture of man made and natural attractions that are located along specific routes gives the opportunity to create personal and social connections

Different attractions offer their own uniqueness and individuality

Some attractions offer ordinary life activities in one sitting (e.g., Big Texan Steak Ranch offers a free 72-ounce steak to anyone who can eat it. This interaction offers food, novelty, humor, sociability, and adventure.)

Tourist specific destinations offer a unique perspective into the daily lives of the residents that reside in these regions

### Interacting with People

Genuine connections can be established with residents of the region out of the commoditized and rigid social roles that are a social norm

There are shared social groups that help promote social interconnectivity between different groups of users (e.g., a friend of a friend)

The residents of certain regions are their true selfs all the time, there is no fake persona that is put on display to show to the public

The lack of profit in some regions helps to foster genuine relationships between tourists and service providers

A shared goal between different user groups helps to create a unique relationship and connection to the destination they're heading to

### Undertaking an Odyssey

The journey that users take can change them as a person because of the obstacles they had to face while on that trip

Life changing experiences can make some user reevaluate where they are in life and how they want to move forward with it

Undertaking a journey with traveling companions can help users grow as they have to stop and look at things from a different perspective

There is progress to be made as a person physically and mentally when undertaking a journey in cultural heritage tourism

"There was this one place where the whole town was deserted . . . You felt like you were alone, and for me, I tried to imagine back in the thirties or something going across country, and of course they didn't have modern vehicles—just to try to put yourself there. For me, that was the most interesting [thinking about] just the vastness of it. How big the country is. How far it must have seemed."

- Carol

There's nothing fake there . . . There's just real stuff. You can go and have a lot of fun and go to Disney World and see big shows in New York, but it's not the same. I guess there are shows [on Route 66], like in Oatman, but it's different to me. These guys that do this [wild west] show, they live in Oatman. I think one is even the mayor. And the money they make, it goes to a children's hospital. You know, it makes it a lot more real.

- Liv

### Heartland Communities

### White River State Park

For the Heartland Communities user, White River State Park appeals to them because this destination is very much geared toward **family activities** and the quality of them, such as: the Indianapolis Zoo, the White River Gardens, and the Farmer's Insurance Lawn that is located to the east of the White River. There are **biking and walking trails** that cross from the east side of the park, across river, all the way to the zoo. All the activities that are possible on this site are **affordable** and inclusive of all walks of people.

### Broad Ripple

The Broad Ripple Cultural District has a variety of amenities that can appeal to the Heartland Communities' user budget. There are a **variety** of eateries that are centrally located that range in taste from American to Mediterranean. The **Broad Ripple Park** that is located on the eastern side of the district is the perfect destination to take the family and relax after a long day of exploring. In addition, there is an **affordable motel** that is **family owned** located directly adjacent to the White River, that has a **fantastic view** of the historic river.

### Massachusetts Avenue

For the Heartland Communities user, Massachusetts Avenue appeals to them because this destination has **many lodging options** that are affordable and **inclusive** of all tourists that visit the areas. There are various **trail systems** that surround the Avenue, so all users need to do is take a short walk to the nearest one to begin that journey. There are about **7 restaurants** that cater to this user's group budget.

### Fountain Square

Fountain Square is one of the more **inclusive** cultural districts that has amenities that all user groups can utilize whenever they wish. There are **parks and trails** located to the south of the district that of **allow pets** in as well. The restaurants here are indicative of the inclusivity that is apparent here because the menus of these places all have **affordable** options for diners. There are a restaurants ranging in tastes from Chinese food all the way to Tex-Mex. There are also a number of motels and hotels in the area that are of **sound quality and affordability**.

### Parks and Recreation

For the Great Outdoors user, White River State Park appeals to them because this destination has some attractions that can accommodate to the somewhat **cultured** tastes that they have acquired. The **Eiteljorg Museum** offers users an opportunity to explore the **historical and social backgrounds** of Americans and Native Americans in the context of the Old West. **The White River Trail** across the river also offers art pieces to look at while going across. This user group would get the most **value** for their dollar coming to this cultural District.

The **art scene** in the Broad Ripple District has come to prominence in the last decade. This district is starting to cater to Indianapolis' **creative class** of citizens by offering more galleries and theaters for these people to commune. For the more reclusive and **passive** user there are a number of activities that can be done here such as: walking trails, **swimming**, and going to the park. There is also the opportunity to go kayaking, **paddleboarding**, and boating down the White River. For lodging there are only two **mid priced motel** that can accommodate their needs.

Massachusetts Avenue is located at the heart of the city of Indianapolis' arts district. It offers some of the most visible art **galleries and theaters**. There are a number of restaurants that have a **range of tastes** that can cater to this user groups budget. There are also a number of parks right off of the Avenue that users can utilize during their operating hours. This avenue was one of the **four original diagonal streets** that led to the heart of Indianapolis' downtown, so there is also a **historical connection** can also explore themselves from at the various **plaques** that are located along that explain some of the **historic architecture**.

There are a large number of theaters in a concentrated area in this district. Fountain Square has had more **operating theaters** than other district in the city of Indianapolis. This fact helps to boost the already vibrant arts scene of the city of Indianapolis. This is Indianapolis' Southside's **primary commercial district** so there are **shops and boutiques** that are down here can accommodate this user groups tastes and still help them **save some** of their money. There are **no lodging areas** that are up to this user groups standards so they have to travel outside of the district to accommodate that need. There is a value in this district that is hard to get in other places because of the personal connections that people make while visiting here.

## Case Studies

### Inform

#### P Street Corridor

Lincoln, NE

**Project:** P St. Corridor  
**Location:** P St. Lincoln, NE  
**Designer:** Design Workshop  
**Date:** 2012  
**Size:** \$6.6 million  
**Size:** 12 city blocks  
**Client:** City of Lincoln  
**Tools used:** Social media, websites, newsletters, mindmixer

**Background:**  
In an effort to welcome new shoppers and visitors to the Corridor, the Master Plan includes a re-design of the P Street streetscape as a priority catalyst project. This project will connect the adjacent Historic Haymarket District to the Lincoln Center Business District and east downtown's Antelope Valley for Lincoln residents and visitors. In 2012, the City released the Downtown Lincoln Master Plan Update.

- Goals:**
1. Improve conditions for pedestrians and bicyclists in the P street district
  2. Enhance district roadways for motorized transit
  3. Enhance environmental integrity of the P street district
  4. Encourage local economic growth and investment

#### Principles:

**What We Learned**  
Citizens can easily access the newest information, but the information is more likely to be what planners want them to know, not the whole thing. And most pieces of the information is fragmented, just used to attract people. Planners use lots of ways to tell public what they have done, it's not a process of two way communication rather, it is just informative. We think that this is the first step of public participation, and it leaves much to be desired.

### Consult

#### Your Utah. Your Future

Salt Lake City, Utah

**Project:** Your Utah Your Future  
**Location:** Utah  
**Designer:** Envision Utah  
**Date:** 2013  
**Size:** State of Utah  
**Client:** Governor Gary Herbert  
**Tools used:** Letters, websites, newspaper and radio advertisements, media coverage, public events, etc.

**Background:**  
To understand our neighbors' hopes for the future, Envision Utah conducted public values research, held over 200 workshops, and listened to more than 20,000 residents between 3 years. We heard a common dream: safe, close-knit communities; opportunities for our children; time to do what matters most; and the security of a good job. To achieve the public's aspirations, in 2013 we created the your Utah your future, which provides voluntary, locally-implemented chances to public sharing their thoughts.

- Goals:**
1. Create and sustain communities that are beautiful, prosperous, healthy and neighbourly for current and future residents
  2. Establish "Baseline" Scenario by Coordinating with Jurisdictions
  3. Ensure the entire path forward to future is chosen by the public

#### Principles:

**What We Learned**  
Planners can know more about what citizens mainly like through consulting. The premise of the Envision Utah process is that the public has the right to decide the future, and the entire process is designed to allow the public to choose the path forward. But in the other side, planners spend a long time to collect public's thinking, as it's not a face-to-face instantly talking.

### Involve

#### Washington Reality Check

Washington D.C.

**Project:** Washington reality check  
**Location:** Washington D.C.  
**Designer:** ULI  
**Date:** 2005  
**Size:**  
**Client:** City of Washington D.C.  
**Tools used:** Social media, websites, focus groups

**Background:**  
In the Washington reality check, planners let citizens sit around a map. 300 participants were divided into 30 groups, each group had members of different occupation, community groups, representatives of different interest groups in the area. Then the event of a hands-on building blocks started. Each team has the same amount of building blocks; different color blocks represent different growth forecasts: the blue building blocks represent 6000 jobs, and the yellow building blocks represent the 3000 residential units. Participants can settle all the new residents and jobs only by stacking the building.

- Goals:**
1. Identifying the vision of a community
  2. Encourage local economic growth and investment

#### Principles:

**What We Learned**  
Sometimes it's hard for public to know how to articulate how they see the appearance and operation of a place. Identify what works and what doesn't. Small group discussion is an effective way to make sure every participant has a voice.

### Collaborate

#### Planning for Florida's Rising Tides

Guana Tolomato Matanzas Reserve, FL

**Project:** Planning for Florida's Rising Tide  
**Location:** Guana Tolomato Matanzas Reserve, FL  
**Stakeholders:** UF, Florida Sea Grant, Northeast Florida Sea Grant, O.U. Matanzas Basin Steering Committee, City of St. Augustine  
**Date:** 2016  
**Client:** Guana Tolomato Matanzas Reserve  
**Tools used:** Focus groups, public meetings, steering committees, surveys

**Background:**  
The Guana Tolomato Matanzas reserve collaborated with researchers at the University of Florida to engage diverse stakeholders in developing a model process for sea level rise planning. Local scientists provided the technical information needed for adaptation planning, including storm surge modeling, mapping products, and development scenarios. Landowners, government officials, business owners, and other stakeholders participated in a steering committee that met quarterly to provide input on the planning scenarios, communication products, and workshop formats.

- Goals:**
1. Maintain coastal communities by protecting the infrastructure and habitats that are the foundation of the state's quality of life.
  2. Support other coastal communities facing similar challenges, the team has presented at various events throughout Florida.
  3. Share the tools and results on a National level

#### Principles:

**What We Learned**  
Working collaboratively allows both the community and the stakeholders to have a say in the final decision. This project is unique in that it involved two Universities. The University of Florida and the University of Oklahoma both worked on this project. We believe this is a useful in getting people together and also allowing students a chance to learn.

### Empower

#### Denver Urban Gardens

Denver, CO

**Project:** Denver Urban Gardens  
**Location:** Denver, CO  
**Stakeholders:** Denver Urban Gardens  
**Date:** 2013  
**Size:** 14 community gardens  
**Client:** Residents  
**Tools used:** Surveys, workshops, educational classes, construction and design, public meetings

**Background:**  
Denver Urban Gardens (DUG) joins residents and community partners to grow community - one urban garden at a time. In concert with the People's Garden Grant Program goals, we will work with communities in five Metro Denver counties to establish fourteen new, sustainable, produce-focused community gardens. These gardens will be located in high-need areas, suffering from hunger and food insecurity, and provide an extraordinary place for learning and healthy living.

- Goals:**
1. Engage Local Residents and Community Partners Project Objectives
  2. Work with educators and community gardeners to determine the most beneficial ways to incorporate garden-based educational opportunities.
  3. Elevate Community Health and Nutrition Project
  4. Ensure the community garden engages diverse stakeholders

#### Principles:

**What We Learned**  
Empowering the community enables them to have the power to actively participate in a change in their community. The community gets to see first hands the benefits that they are participating in.

### Cultural Heritage Tourism

#### National Park Service

USA

**Project:** National Park Service  
**Location:** United States of America  
**Date:**  
**Size:** more than 400 national parks  
**Stakeholders:** NPS.gov  
**Tools used:** Surveys, workshops, focus groups, public meeting, advertisement

**Background:**  
The National Park Service cares for America's more than 400 national parks. Public are invited into America's towns and cities to work with those planners to share their commitment to conservation, preservation, and recreation. Finding out what's interesting in their community. National Park Service professionals offering advice, technical assistance, recognition, and cash to help communities across the country preserve their own history and create close-to-home recreation opportunities. Finally, they designated more than 1,000 National Recreation Trails.

- Goals:**
1. Conserve rivers, plan, build, and preserve open spaces and outdoor recreation places.
  2. Highlight local history at national historic landmarks, national historic trails, and national heritage areas with a teaching with Historic Places, lesson plan or discover shared heritage travel itinerary.
  3. Join forces with Indian tribes, state and local governments, nonprofit organizations, private citizens, and other partners, to build playgrounds, return historic buildings to use, revitalize neighborhoods.

#### Principles:

**What We Learned**  
They value dynamic conversations that enhance public engagement. Public mostly honor their nation's history, we can just guide them to tell. With the public involvement, it's easier to find and keep those individual tourism places.

PLANES, CRANES, AND TRAINS: A LIVING HISTORY OF RURAL AMERICA

Auto-Based Tourism

Auto-Based Tourism  
Top 10 Most Popular Road Trips in the US

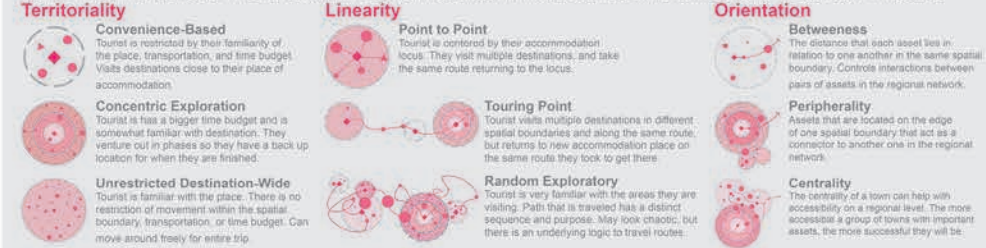

User Types

**Definition:** Traveling away from home for at least one night, on holidays or visiting friends and relatives, in their own, a rented or borrowed vehicle as the primary mode of transport.

**Movement Types**  
Auto-based tourism focuses more on the sequence of the trip from a multidestination approach, rather than a singular trip. The two movement types of territoriality and linearity, and they each occur in tourist movements. Each path is significant to the characteristics of the tourist as well as the geography of the place.

User Psychology

Region + Culture + Routes  
Regional Context

Data Collection Methods

- Region split into 4 quadrants, one team per quadrant
- Quadrant areas based on major highways that cross the region, meeting in Red Cloud
- Reduced amount of information for each team to gather, such as assets and amenities
- From our research we found that auto-based tourism is the most viable option for our region

# PLAINS, TRAINS, AND CRANES: A LIVING HISTORY IN RURAL AMERICA

Environmental: Land Influence (1800s - 1850s)

**1800s - 1810s**

**1803: Louisiana Purchase**  
The U.S. purchased 828 million square miles of territory from France

**1820s**

**1804 - 1806: Lewis & Clark**  
Lewis and Clark paved the way for opening Kansas and the rest of the West

**1820s: First Settlement**  
Kansas area is set aside as Indian Territory by the U.S. Government and closed to

**1821: Santa Fe Trail**  
Opened across Kansas as country's transportation route to the Southwest, connecting Missouri with Santa Fe

**1830s**

**1830: Indian Removal Act**  
Resulted in the settlement of more than 10,000 American Indians to what is now Kansas

**1830: Rocky Mountains**  
Traders took the first wagons to the Rocky Mountains on the Oregon Trail

**1840s**

**1846: Migration of the Mormons**  
Start of western migration of Mormons from Nauvoo, IL following the Oregon trail which then became the Mormon trail

**1850s**

**1848: Burlington Railroad**  
Chicago, Burlington & Quincy Railroad established in Aurora, IL which was precursor to Burlington Railroad

**1848: Fort Kearny**  
Fort Kearny is established along the Oregon Trail

**1854: Indians on Reservation**  
Nearly 10,000 Indians were on reservation and in the territory once Nebraska was admitted into the Union

**1854: Kansas Nebraska Act**  
Kansans people in the territories of Kansas and Nebraska to decide for themselves whether or not to allow slavery within their borders.

**1854: White Settlement**  
Kansas was open to white settlement to help increase their population

**1858: Children's Aid Society**  
Used trains for more than 250 orphaned children who left New York to live in Kansas and Nebraska

# PLAINS, TRAINS, AND CRANES: A LIVING HISTORY IN RURAL AMERICA

Environmental: Land Influence (1800s - 1850s)

**Ecoregions**

**Smoky Hills**  
Square miles: 7,834  
Description: Undulating to hilly dissected plain. Broad belt of low hills formed by mature dissection of Cretaceous rock layers.

**Rolling Plains and Breaks:**  
Square miles: 24,730  
Description: Dissected plains with broad undulating to rolling ridge tops and hilly to steep valley sides.

**Central Nebraska Loess Plains**  
Square miles: 6,617  
Description: Rolling dissected plains with deep loess layer. Perennial and intermittent streams.

**Rainwater Basin Plains**  
Square miles: 7,370  
Description: Flat to gently rolling loess-covered plains. Historically, extensive rainwater basins, and wetlands.

**Platte River Valley**  
Square miles: 3,061  
Description: Flat, wide alluvial valley. Shallow, interfacing streams on a sandy bed.

**Flint Hills**  
Square miles: 9,783  
Description: Undulating to rolling hills, cuestas, cherty limestone, and shale outcrops. Perennial streams and springs common.

**Nebraska/Kansas Loess Hills**  
Square miles: 3,333  
Description: Glaciated. Deep, rolling loess-covered hills. Perennial streams.

**Glacial Drift Hills**  
Square miles: 6,460  
Description: Glaciated. Rolling low hills. Perennial streams.

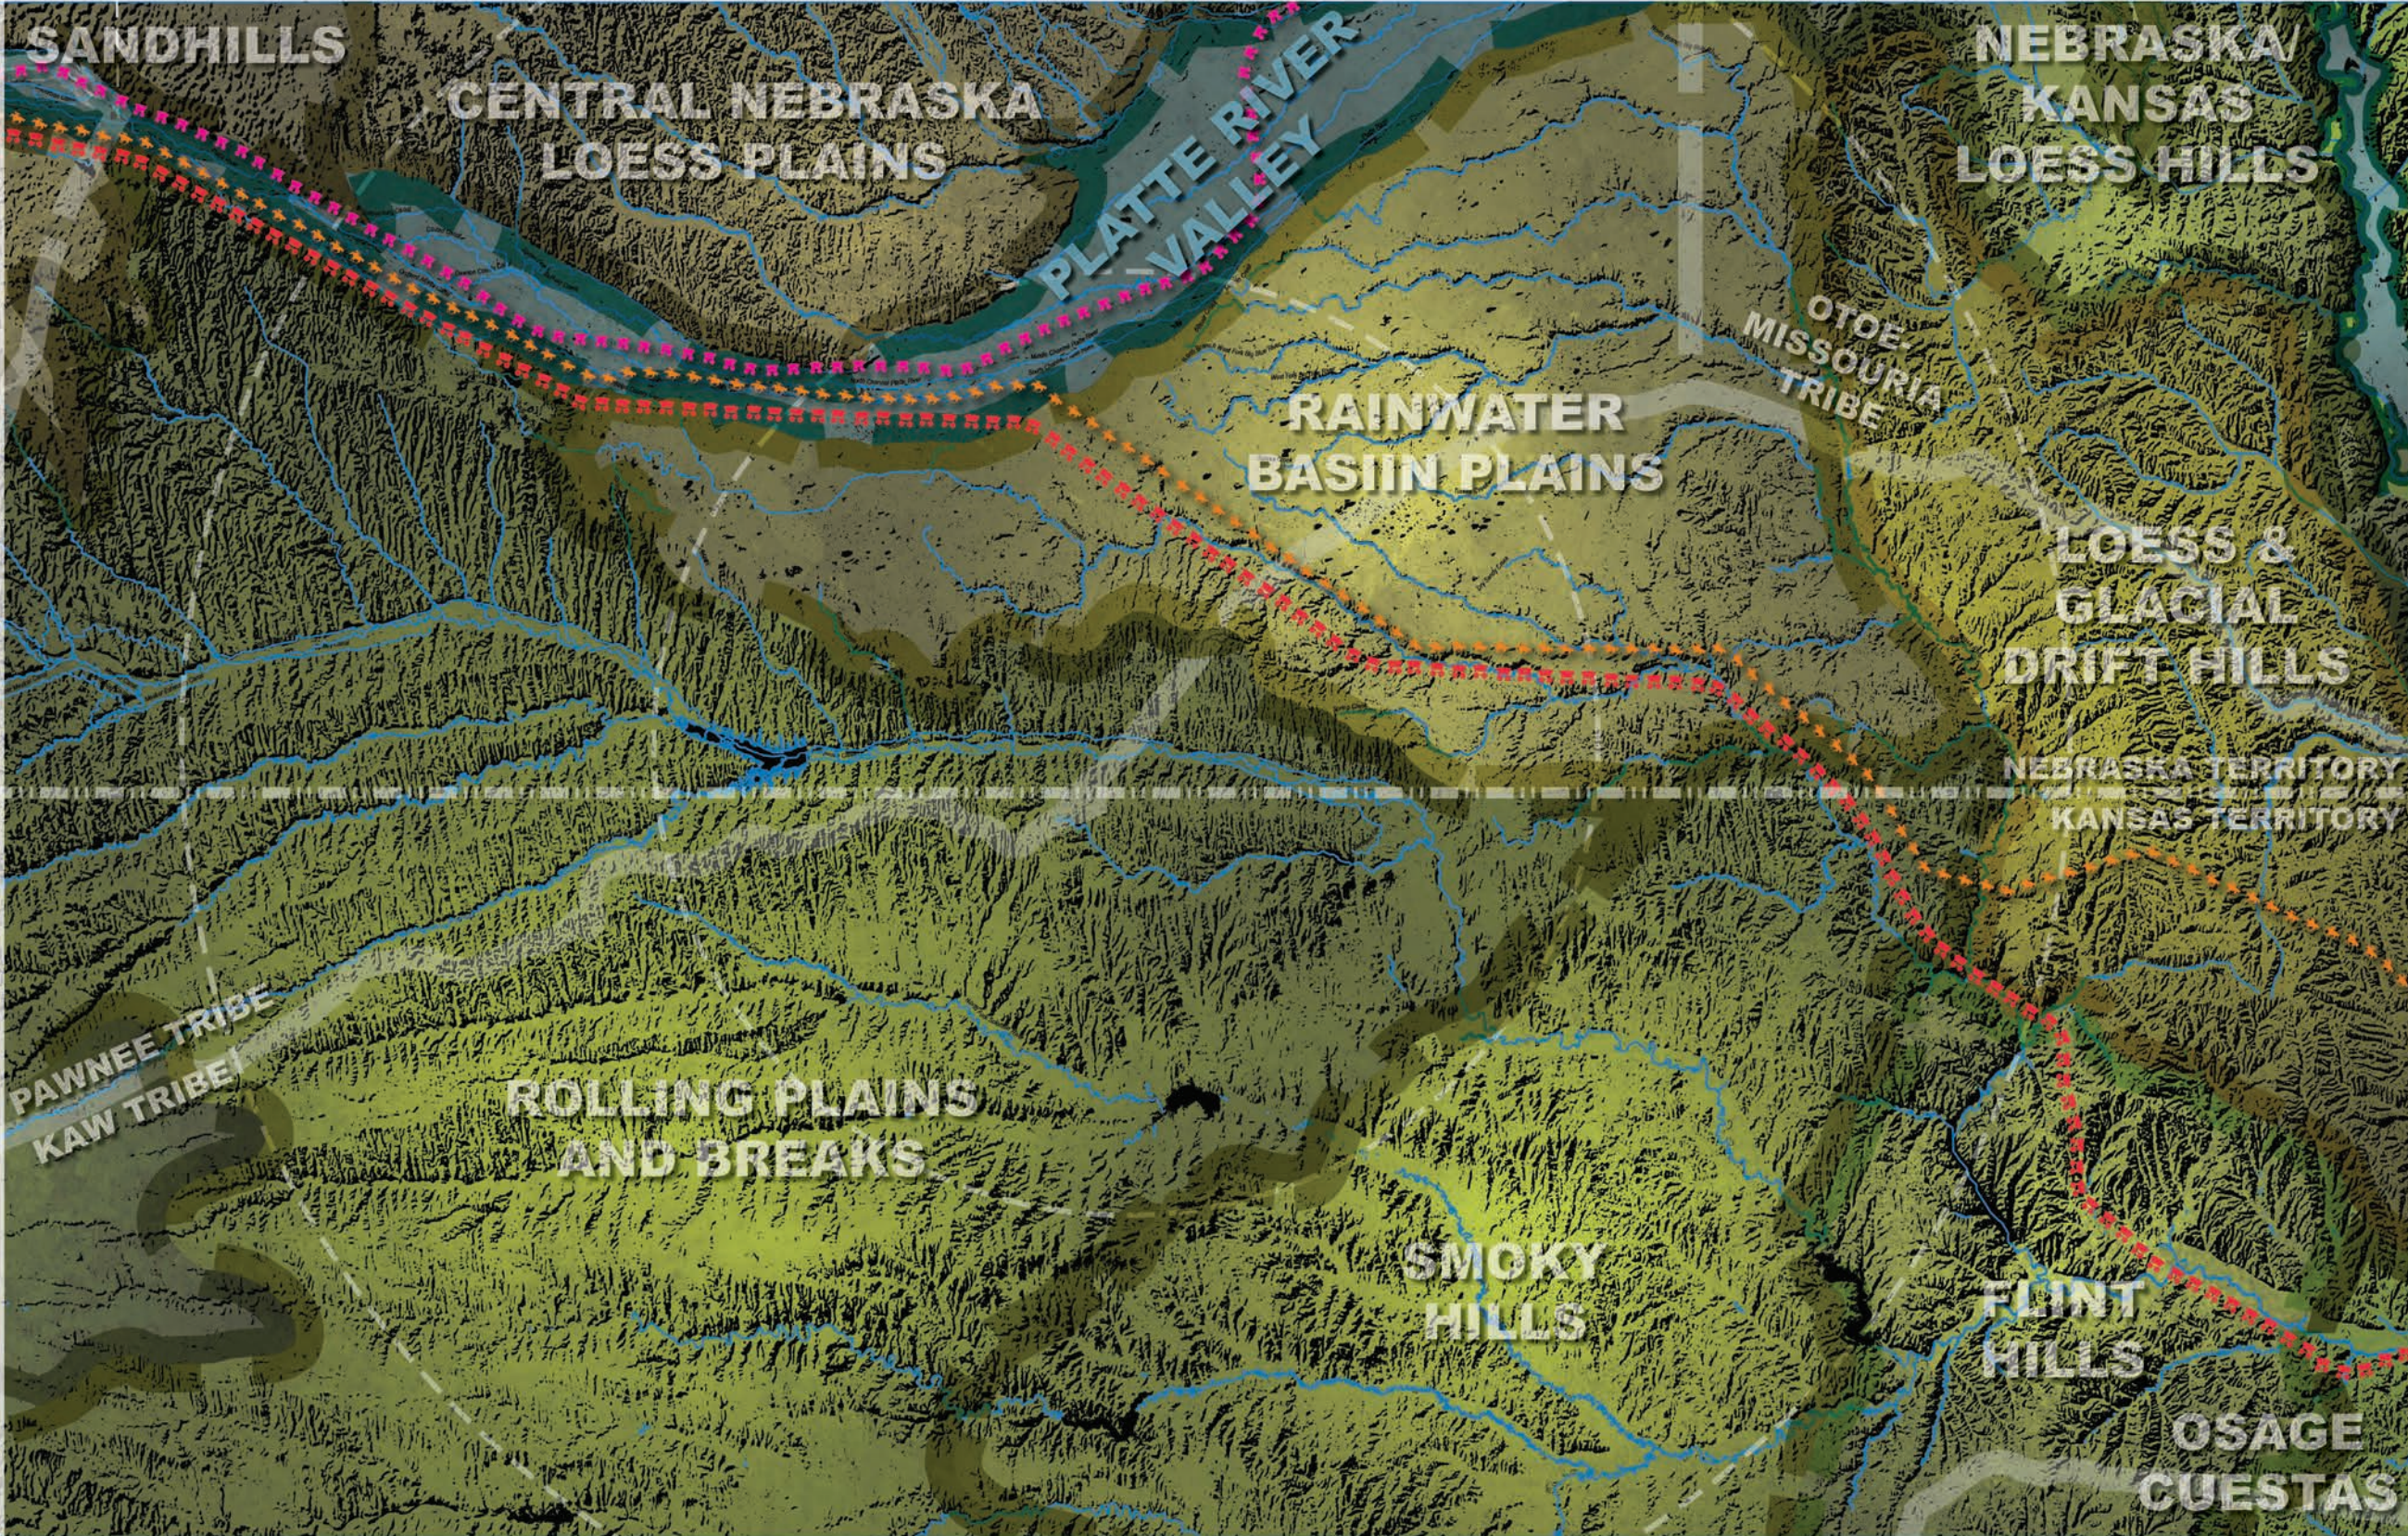

**Osage Cuestas**  
Square miles: 8,988  
Description: Cuestas and gentle undulating plains. Perennial streams.

**Sand hills**  
Square miles: 14,726  
Description: Sand sheets and extensive fields of barchanoid, parabolic, and domal sand dunes. High water table.

**Vegetation:**

During the predevelopment period, native vegetation flourished throughout the land of Nebraska and Kansas. The Great Plains was split into 3 areas: the tallgrass prairie, the mixedgrass prairie, and the shortgrass prairie. Throughout these areas, one would come across big bluestem.

**Wildlife:**

# PLAINS, TRAINS, AND CRANES: A LIVING HISTORY IN RURAL AMERICA

## Environmental: Cultural Influence (1860s - 1910s)

### People/Policy

#### Nebraska:

Immigrants  
Usually arrived in groups of the same ethnicity, so a whole Swedish community, for instance, might settle in a certain area.

Population  
1860  
- About 30,000  
1920  
- Around 1,296,000

#### Kansas:

Population  
Kansas immigrant population is not large by national standards, nor by the standards of most states, standing at just over 62,000 in 1990 - a mere 2.5 percent of the state's total.

The composition of the immigrant population in Kansas in 1990 is shown in figure 4.1. Interestingly, Asians are the largest immigrant group, constituting 38 percent of the state's foreign-born population. This is followed by Mexicans (23.7 percent) and Europeans (19.4 percent). Like other states, the proportion of foreign-born residents who are white has dropped drastically since 1965, from over 90 percent to less than half in 1990.

### Culture

#### Nebraska:

African Americans  
- Were in Nebraska before the Civil War  
- Many more arrived in the late nineteenth century, especially in the Omaha area.

American Indians  
- Had largely been dispossessed of their Nebraska lands and removed to present-day Oklahoma by 1880  
- Santee Sioux, Omaha, and Winnebago Indians still live on two small reservations in the state.

Germans  
- Made up the largest percentage of immigrants  
- "the most harassed people during World War I."

Local anti-German sentiment  
- Was so strong about that time in Nebraska  
- German immigrants were prohibited from speaking their language on the phone or in schools  
- Town names were changed (New Berlin, for example, became Garland)  
- The Ku Klux Klan became active as an anti-immigrant, anti-Catholic and anti-German anti-black and anti-college-educated organization.  
- More than 50 newspapers were once published in German; today there are none.

#### Kansas:

German  
By the end of the 1800s, German-speaking people formed the largest group of new immigrants to Kansas. Many came from Germany but many others were living near the Volga River in Russia. They called themselves Volga-German or German-Russian.

Swedish  
Swedish pioneers who moved to central Kansas in the mid-1800s called their new home "framidslandet," the land of the future. Many left Sweden when famine threatened starvation. The Swedish immigrants, in turn, encouraged their friends and family to join them.

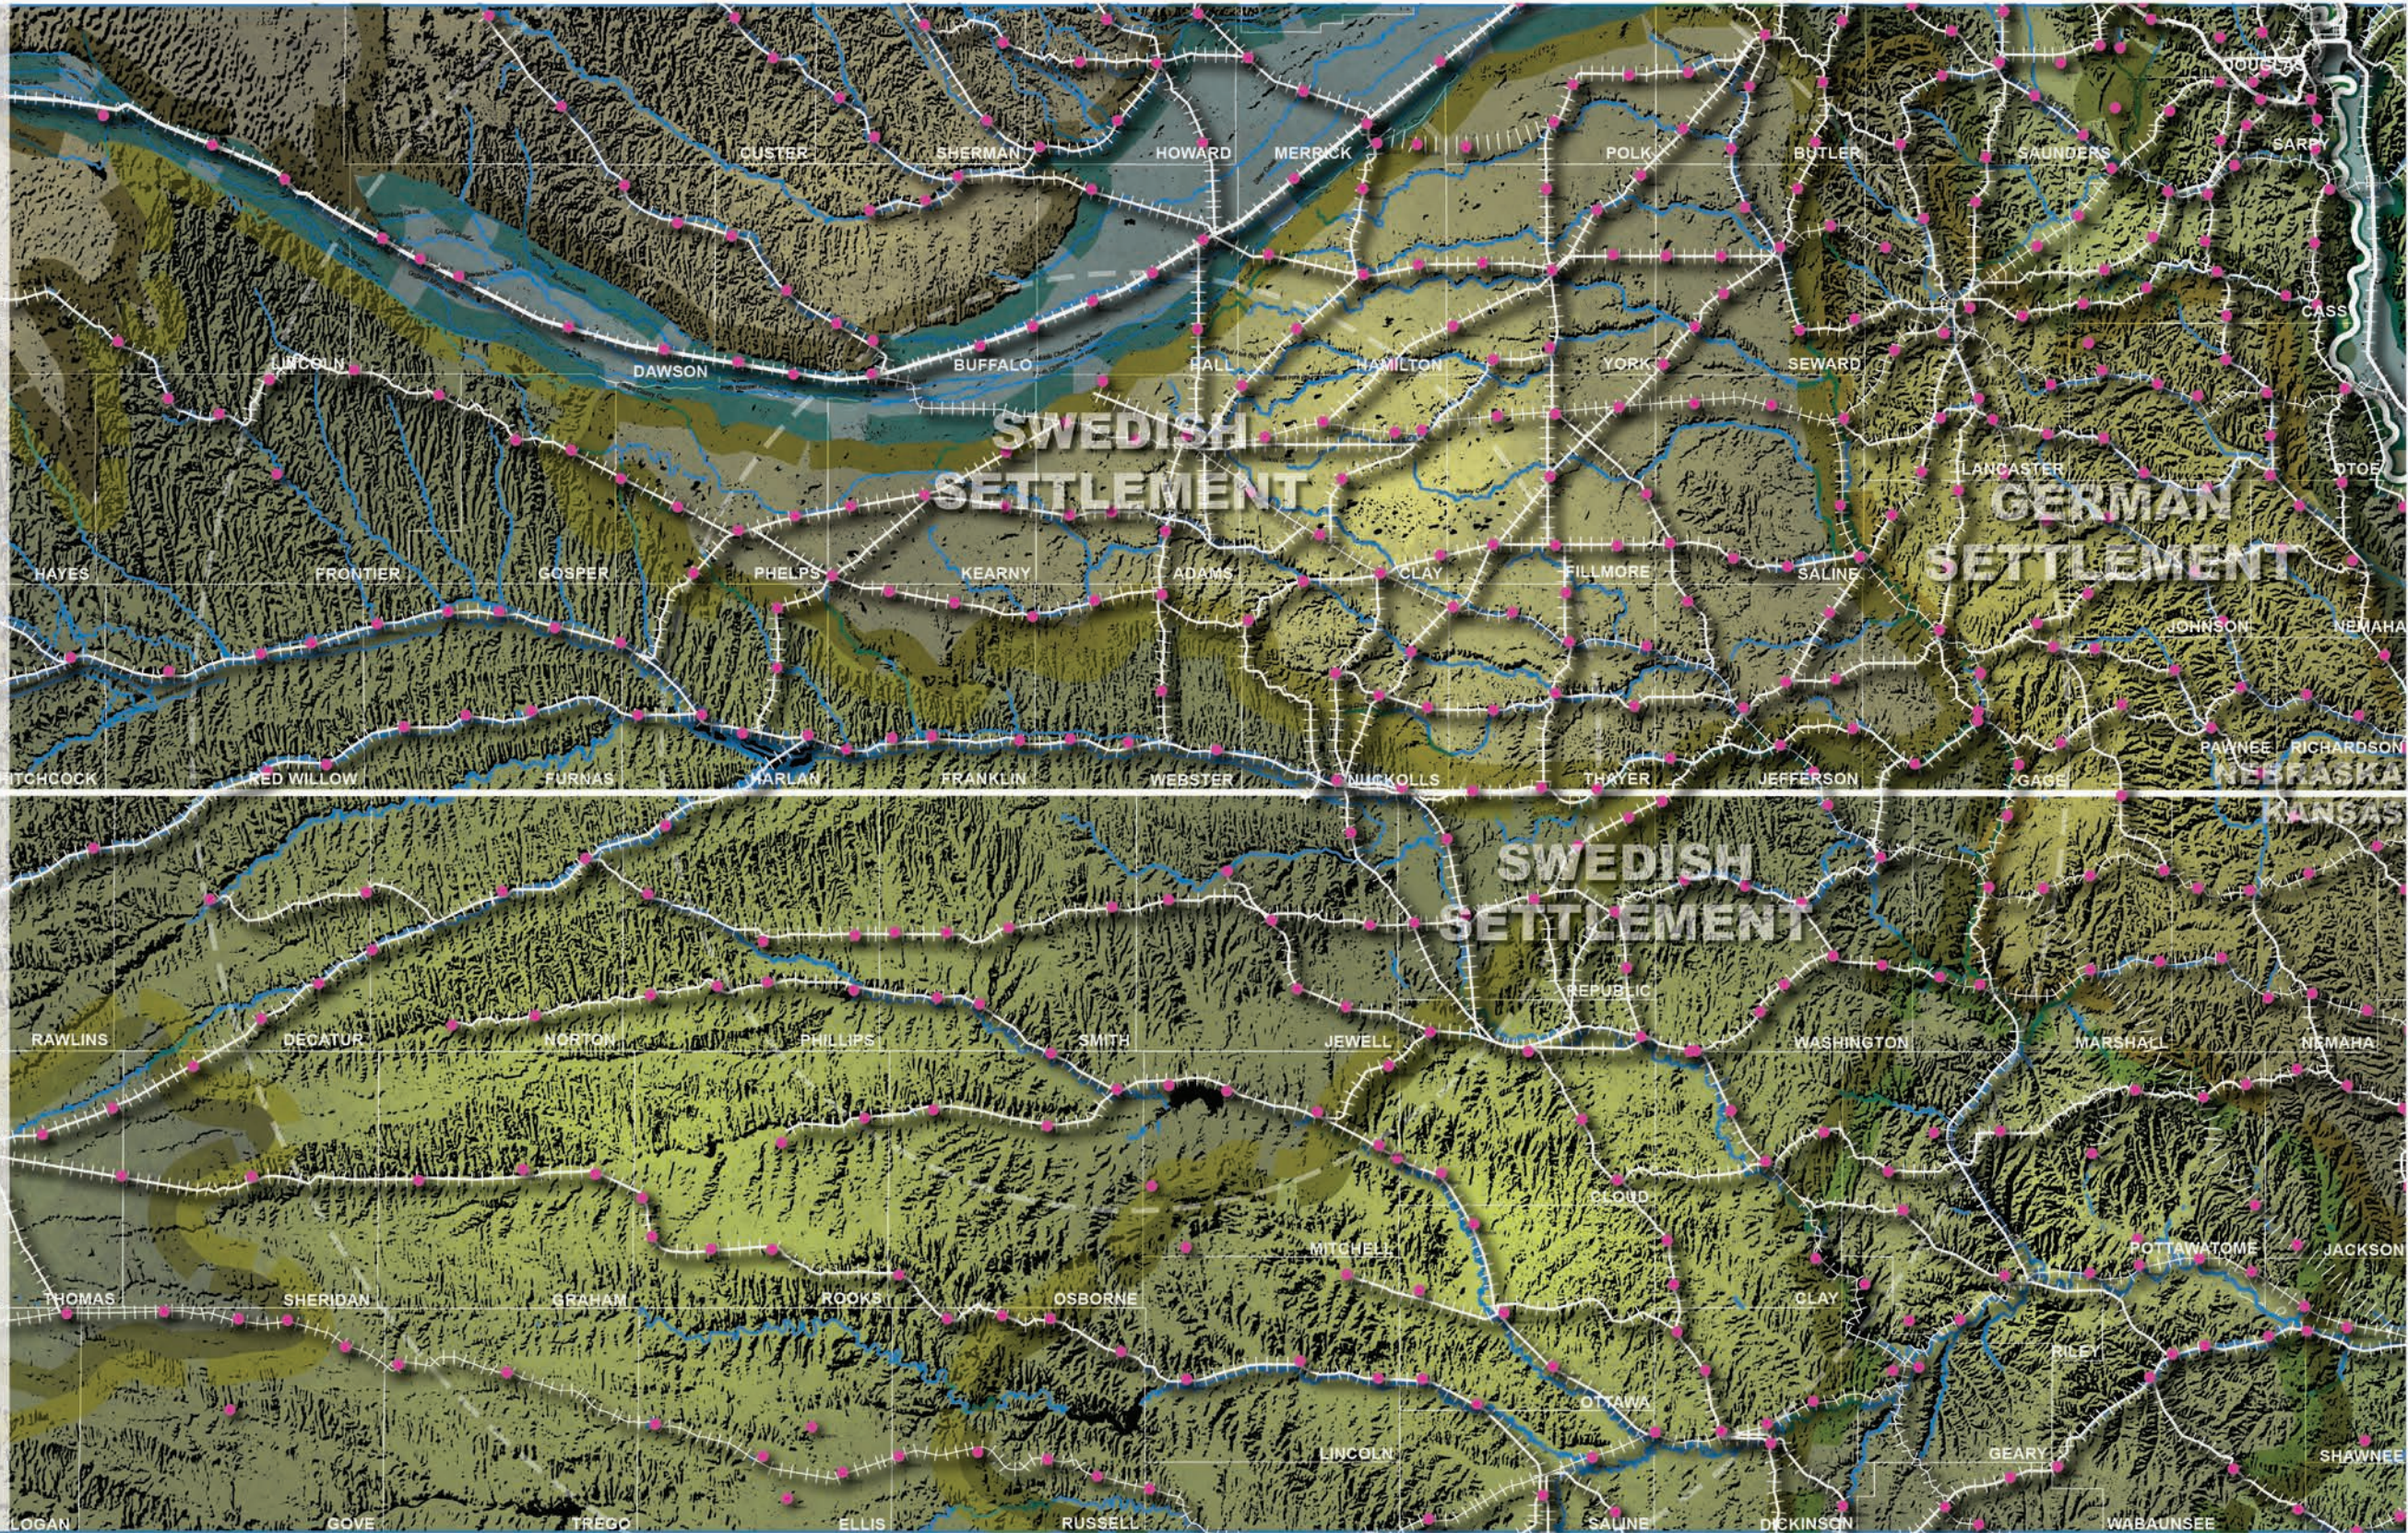

Mexican  
Mexican workers came to Kansas during the construction of the railroads. They also found work in sugar beet production and later in manufacturing. Mexican immigrants settled in the southwest part of the state and in other areas where they found employment opportunities.

Hmong  
The Hmong originally lived in the mountains of southern China. They were pushed into inhospitable lands with the growth of the Han Chinese civilization that eventually resulted in an exodus of Hmong into nations to the south. The Hmong of Laos fled the country after the Vietnam War and some settled in southwest and other parts of Kansas in the 1970s.

### Infrastructure

#### Nebraska:

The railroads in Nebraska  
- Heavily influenced where people settled  
- The railroads carried these people to a town depot, which was the hub in communities served by the railroad.  
- If a certain area of the state needed railroad workers, recruiters for the railroad would meet ships in New York and bring the immigrants to Nebraska on the train.

# PLAINS, TRAINS, AND CRANES: A LIVING HISTORY IN RURAL AMERICA

## Sense of Place: Subregions

### Rolling Prairie Rangeland

Exceeds Expectations

- 1. Strong rolling topography
- 2. Minimal evidence of land management
- 3. Well extending views of prairie

Meets Expectations

- 1. Undulating to rolling topography
- 2. Minimal evidence of land management
- 3. Evidence of grazing activity, fences, windmills, country houses or farms, wells, main made barns

Below Expectations

- 1. Undulating to rolling topography
- 2. High land management
- 3. Limited prairie land cover. Evidence of clearing, evidence of plowing, land tracks and evidence of grazing and agricultural land use

### Flat Agricultural Land

Exceeds Expectations

- 1. Flat to slightly undulating topography
- 2. High management of land with repeated plowing and clearing
- 3. Drainage swales, hedgerows, use of pivot irrigation, healthy looking crops

Meets Expectations

- 1. Flat to slightly undulating topography
- 2. High management of land but evidence of individual ownership and differences in cropping techniques
- 3. Shelterbelts define field edges and views. For miles, one can only see agricultural land

Below Expectations

- 1. Inconsistent flat to slightly undulating topography
- 2. Little to no management of land
- 3. Open prairie, no irrigation, crops look disorganized, housing development

### Undulating Agricultural Land

Exceeds Expectations

- 1. Natural undulating topography
- 2. Homogeneous land management for the use of row cropping
- 3. Drainage swales, hedgerows, use of pivot irrigation, healthy looking crops

Meets Expectations

- 1. Natural undulating topography
- 2. Homogeneous land management for the use of row cropping
- 3. Evidence of row crops, irrigation, multiple types of crops

Below Expectations

- 1. Terraced, contrasted, man made topography
- 2. Little to no homogeneous land management for row cropping
- 3. Open prairie, no irrigation, crops look disorganized, housing development

### Rolling Agricultural Land

Exceeds Expectations

- 1. Rolling agricultural topography
- 2. High management of land with repeated plowing and clearing of crops
- 3. Drainage swales, hedgerows, use of pivot irrigation, healthy looking crops

Meets Expectations

- 1. Natural undulating topography
- 2. High management of land with repeated plowing and clearing of crops
- 3. Evidence of crops being plowed, agricultural machinery, irrigation

Below Expectations

- 1. Terraced, contrasted, man made topography
- 2. Little to no land management with repeated plowing and clearing of crops
- 3. Open prairie, no irrigation, crops don't look taken care of, suffering crops

### Platte River and Republican River Valley

Exceeds Expectations

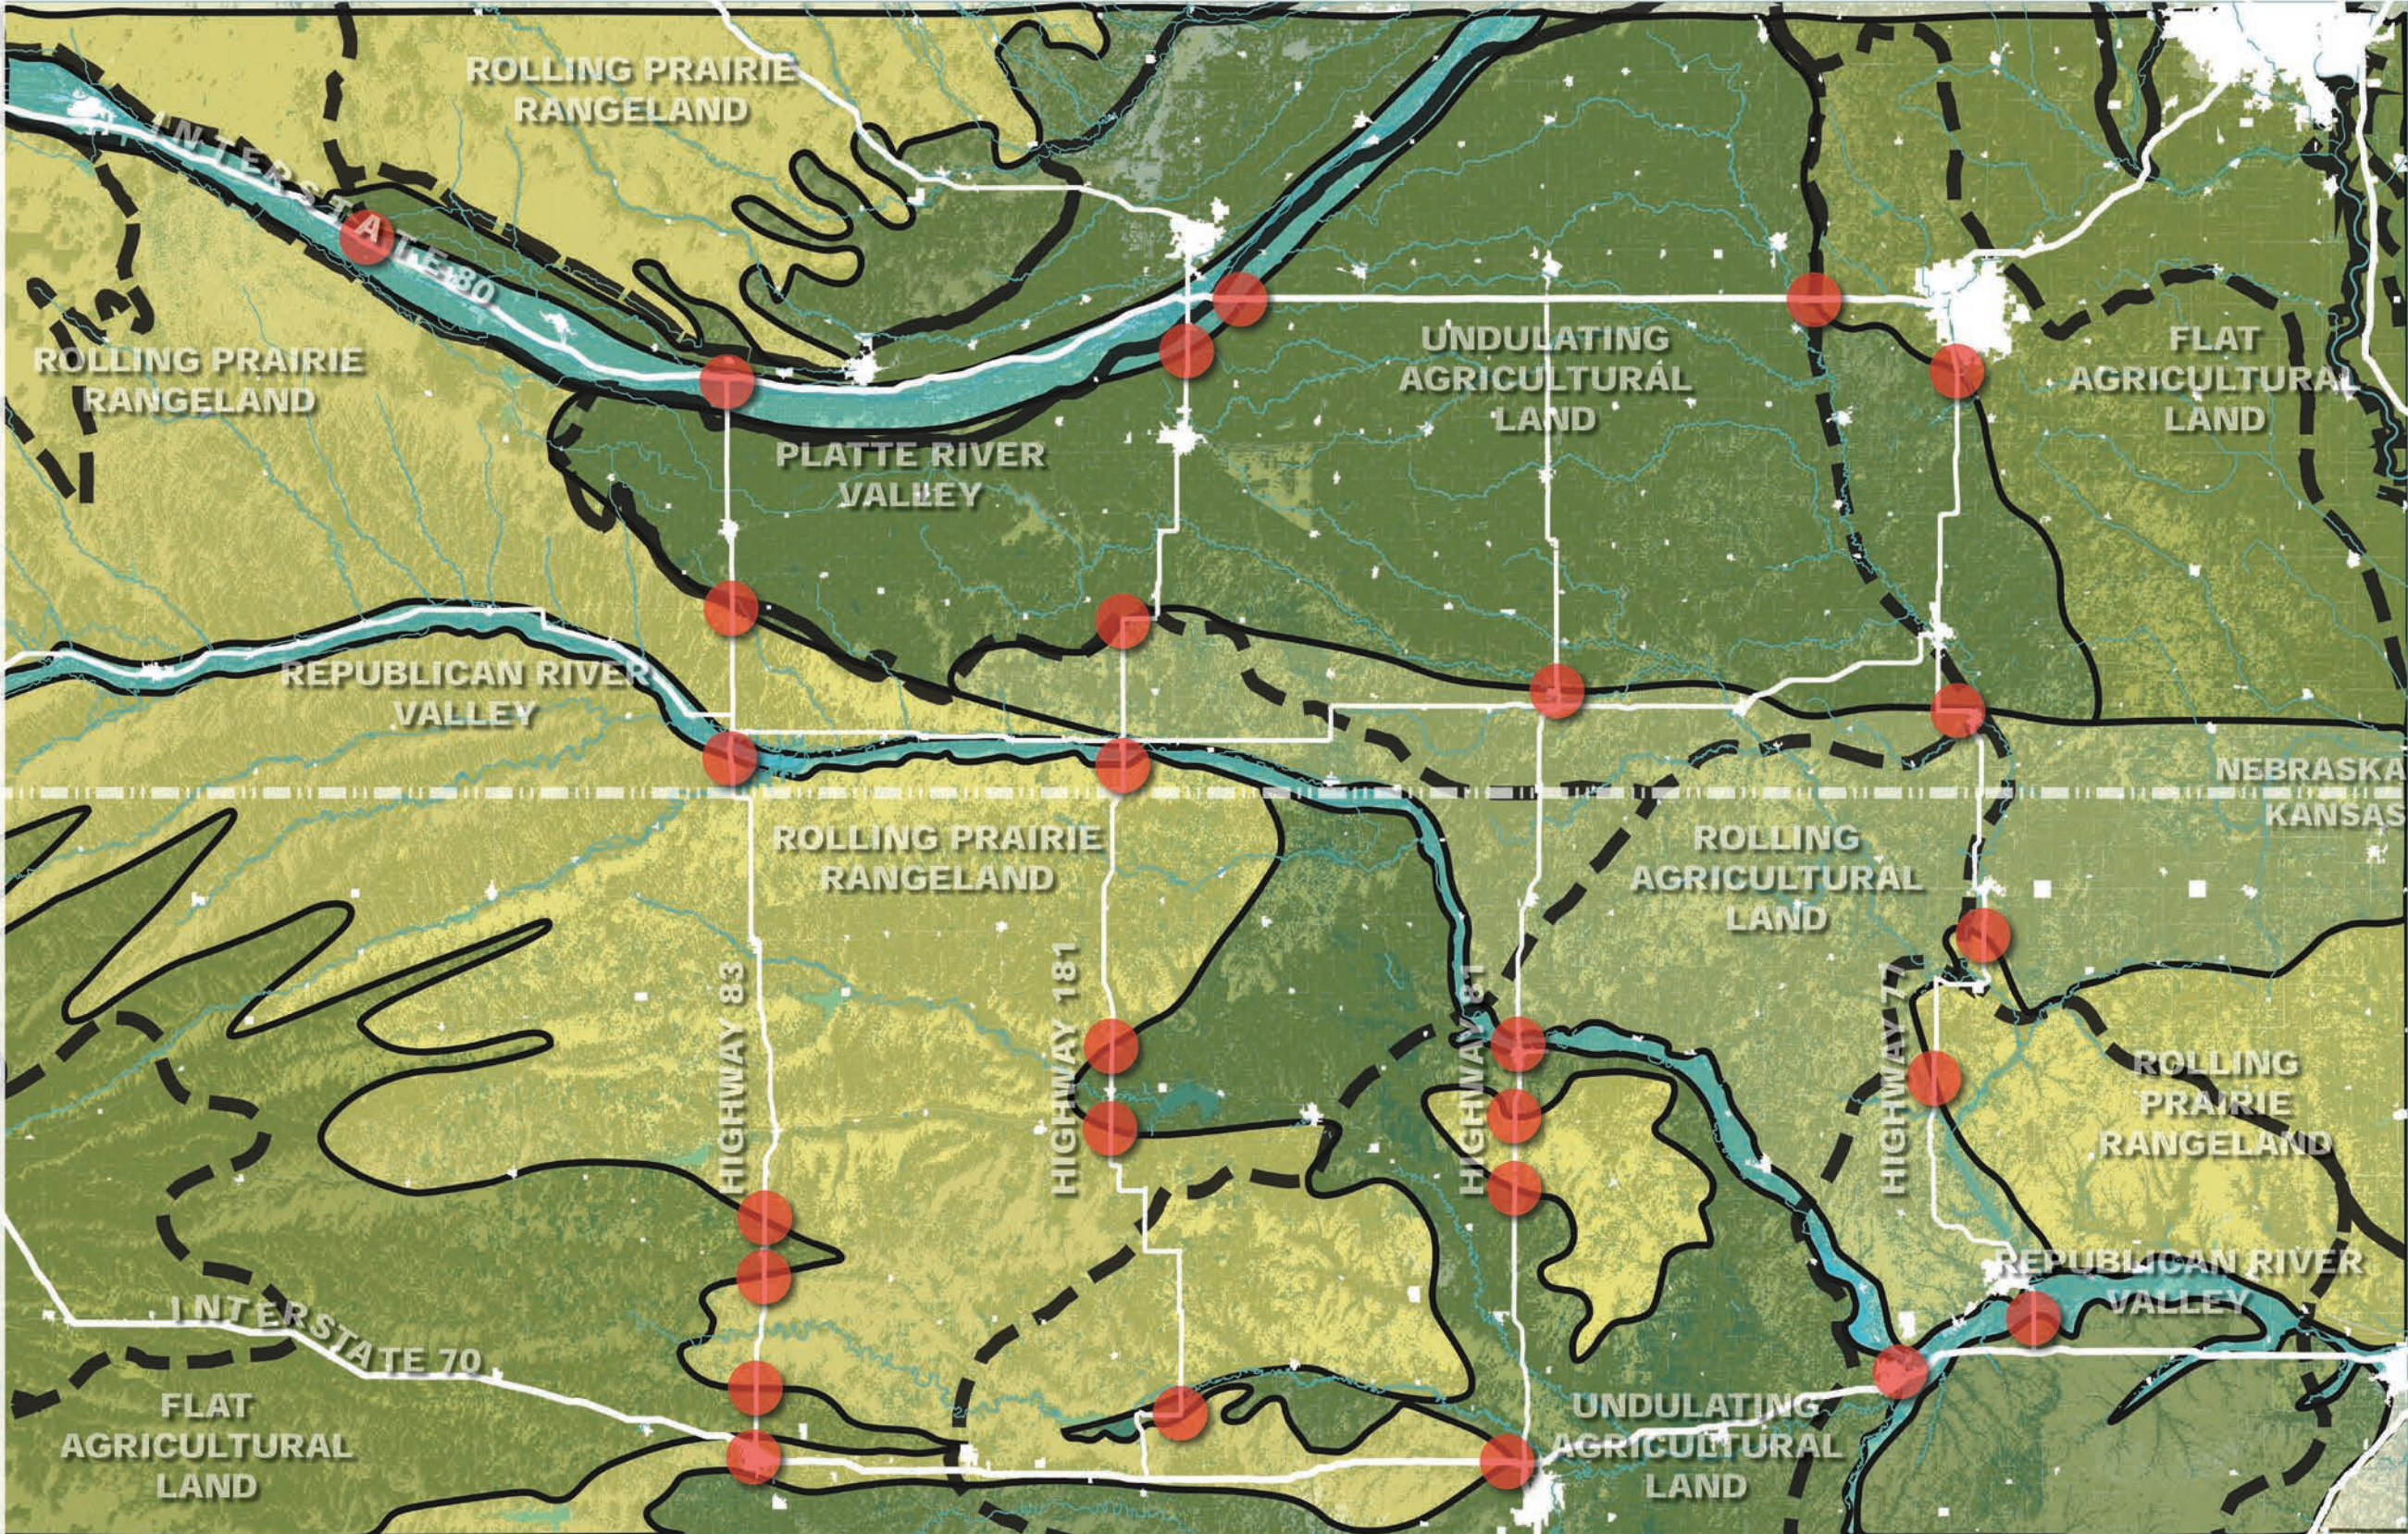

- 1. Flat, shallow, and wide river
- 2. Edges of river are surrounded by forested and agricultural land
- 3. No development around river

Meets Expectations

- 1. Flat, shallow, and wide river
- 2. Managed edges along river
- 3. Evidence of deciduous woodland as well as agricultural land

Below Expectations

- 1. Flat, shallow, and wide river
- 2. Crops of river are eroded and have no trees
- 3. No evidence of deciduous woodland, agricultural land

# PLAINS, TRAINS, AND CRANES: A LIVING HISTORY IN RURAL AMERICA

## Sense of Place: Subregion Descriptions

### 1. Rolling Prairie Rangeland

**Description:**  
This area contains rolling topography, cliff outcroppings, and primarily grass cover ranging from mixed to tall grass prairie plants. The land is managed minimally without intensive irrigation or plowing practices. The area is rural, mostly populated by farmers and then in small towns which occur at railroad depot points.

**Key Characteristics:**  
- Rolling Topography  
- Low Land Management Practices  
- Mostly covered by prairie plants

**Existing Condition/Scale:**  
The landscape is peaceful and objectively scenic in quality. The road experience consists of open to expansive views over the prairie land with many points of build up, climax, and release when traveling over hills to reveal valley vistas below. The land is grazed by cattle and contains clumps of trees that line small streams that meander through the region

**Topography:**  
Predominantly undulating to rolling in nature

Southern NE Prairie      Expansive Views

**Vegetation:**  
NATIVE:  
Mixed Grass Prairie Grasses  
Tall Grass Prairie Grasses  
Wildflowers  
Various Shrubby Trees

NON-NATIVE  
Hay

**Wildlife/Habitat:**  
Deer, Raccoon, Prairie Chicken, Crane (seasonal), Opossum, Field Birds, Cattle, Coyote, Pheasant

### Sense of Place Criteria:

#### Exceeds Expectations

1. Striking rolling topography, outcroppings
2. No evidence of land management
3. Vast extending views of prairie

#### Meets Expectations

1. Undualting to rolling topography
2. Minimal but evident land management
  - Evidence of grazing activity, fences, windmills, country houses or farms, wells, man made trails
3. Prairie like foliage with areas of clearing. Evidence of private land tracks and evidence of grazing and agricultural land use

#### Below Expectations

1. Undulating to rolling topography
2. High land management
  - Evidence of grazing activity, fences, windmills, country houses or farms, wells, man made trails
3. Limited prairie land cover. Evidence of prairie removal and agricultural land adaptation

### 2. Flat Agricultural Land

**Description:**  
This area contains predominantly flat topography with some slightly undulating areas. The land is predominantly used for intensive plowed agriculture. In Nebraska, the land is heavily irrigated in some areas. The area is rural with the industry heavily agriculturally related. Shelterbelts break the fields.

**Key Characteristics:**  
- Flat to slightly Undulating Topography  
- High Management of the land with repeated plowing and clearing  
- Shelterbelts define field edges

**Existing Condition/Scale:**  
The landscape is monotonous and the colors muted. The views from the road are highly dependent on seasons. In the winter and spring the views are vast and continuous, in the summer and fall, the views are constrained by taller crops and linear rows which direct views through the fields as you pass through. The major roads are straight and fast through the subregion.

**Topography:**  
Flat to slightly undulating

Unplowed Crop Residue      Irrigation Structures in Fields

**Vegetation:**  
NATIVE:  
Some Prairie Plants on Field Edges  
Cedar, Oak, Pine, Spruce Windbreaks  
Native Trees along Stream Banks

NON-NATIVE  
Hay, Corn, Soybeans, Alfalfa, Wheat

**Wildlife/Habitat:**  
Deer, Raccoon, Prairie Chicken, Crane (seasonal), Opossum, Field Birds, Turkey, Coyote, Pheasant, Fox

### Sense of Place Criteria:

#### Exceeds Expectations

1. Flat to slightly Undulating Topography
2. Little to no management of the land with repeated ploughing and clearing
  - Drainage swales, hedgerows, use of pivot irrigation, healthy looking crops
3. Shelterbelts define field edges and views. For miles, one can only see agricultural land

#### Meets Expectations

1. Flat to slightly Undulating Topography
2. High management of land but evidence of individual ownership and differences in cropping techniques
3. Shelterbelts define field edges and views. For miles, one can only see agricultural land

#### Below Expectations

1. Inconsistent flat to slightly undulating topography
2. Little to no management of land
  - Open prairie, no irrigation, crops look displeasing, housing development
3. No defined edges and views of agricultural land

### 3. Undulating Agricultural Land

**Description:**  
The land is undulating in nature with cover of mostly corn and soybeans. The land is heavily irrigated and plowed and cropped yearly. The region is supported heavily by agriculture. The colors remain homogenous pertaining to the season with little variation year to year.

**Key Characteristics:**  
- Undulating in nature  
- Homogenous land management for the use of row crops  
- Topographic interest and continuous in the winter

**Existing Condition/Scale:**  
The landscape is homogenous in both the landscape and form with long sweeping hills blanketing the area. Views are sweeping and continuous with little variation as agriculture dominates the view from the road which vanes from sweeping to open in the fall and winter to constrained and directed in the summer. Little remains of the prairie with most of the land devoted to large scale farming practices.

**Topography:**  
Undulating to Slightly Rolling

Corn Fields Over Undulating Land      Corn Fields in the Distance

**Vegetation:**  
NATIVE:  
Some Prairie Plants on Field Edges  
Cedar, Oak, Pine, Spruce Windbreaks  
Native Trees along Stream Banks

NON-NATIVE  
Hay, Corn, Soybeans, Alfalfa

**Wildlife/Habitat:**  
Deer, Raccoon, Prairie Chicken, Crane (seasonal), Opossum, Field Birds, Cattle, Turkey, Coyote, Pheasant, Fox

### Sense of Place Criteria:

#### Exceeds Expectations

1. Natural undulating topography
2. Homogeneous land management for the use of row cropping
  - Drainage swales, hedgerows, use of pivot irrigation, healthy looking crops
3. Topographic seasonal interest

#### Meets Expectations

1. Natural undulating topography
2. Homogeneous land management for the use of row cropping
  - Evidence of row crops, irrigation, multiple types of crops
3. Topographic seasonal interest

#### Below Expectations

1. Terraced, controlled, man made topography
2. Little to no homogeneous land management for row cropping
  - Open prairie, no irrigation, crops look displeasing, housing development
3. No defined edges and views of agricultural land

### 4. Rolling Agricultural Land

**Description:**  
The land is highly undulating to rolling with field crops continuing over fields and into valleys. The land is less irrigated than in other regions, yet there is still intensive cropping and clearing of the land. Row crops dominate the landscape with occasionally large sections of forest shelterbelts that break the fields.

**Key Characteristics:**  
- Rolling topography  
- High Management of the land with repeated plowing and clearing  
- Mixture of scenic quality and views of intensive agriculture

**Existing Condition/Scale:**  
The landscape is homogenous in management yet varied in form. Rolling topography covered with row crops tells the narrative of conquering and using the land. Plowing and clearing the land creates highly seasonable views ranging from sweeping to open in the fall and winter harvest period, to constrained and directed in the summer. Some remnants of prairie in steep sloping areas.

**Topography:**  
Rolling

Corn Fields on Rolling Hills      Hay Harvest

**Vegetation:**  
NATIVE:  
Some Prairie Plants on Field Edges  
Cedar, Oak, Pine, Spruce Windbreaks  
Native Trees along Stream Banks

NON-NATIVE  
Hay, Corn, Soybeans, Alfalfa

**Wildlife/Habitat:**  
Deer, Raccoon, Prairie Chicken, Crane (seasonal), Opossum, Field Birds, Cattle, Turkey, Coyote, Pheasant, Fox

### Sense of Place Criteria:

#### Exceeds Expectations

1. Rolling agricultural topography
2. Little to no land management with repeated ploughing and clearing of crops
  - Drainage swales, hedgerows, use of pivot irrigation, healthy looking crops
3. Mixture of scenic quality and views of intensive agriculture

#### Meets Expectations

1. Natural undulating topography
2. High management of land with repeated ploughing and clearing of crops
  - Evidence of crops being ploughed, agricultural machinery, irrigation
3. Mixture of scenic quality and views of intensive agriculture

#### Below Expectations

1. Terraced, controlled, man made topography
2. Little to no land management with repeated ploughing and clearing of crops
  - Open prairie, no irrigation, crops don't look taken care of, suffering crops
3. No scenic views of intensive agriculture

### 5. Platte River Valley

**Description:**  
The land is characterized by the wide Platte River Channel. The river is slow and shallow providing fertile banks for agriculture. The area surrounded is highly cultural yet more forested in many locations along the iconic sand bar banks. The area is highly scenic and critical for the crane migration.

**Key Characteristics:**  
- Flat, shallow, and wide river  
- Forested edges in many sections  
- Fertile agricultural fields surrounding the river

**Existing Condition/Scale:**  
The subregion is highly scenic and homogenous in character with I-80 revealing the river along parts of its path. The land surrounding is intensively used and does not reflect that natural ecosystem, yet the flat, shifting, and shallow nature of the river has limited river travel and development.

**Topography:**  
Sloping banks to a wide river channel, surrounding region is flat

Wide Scale of the River      Tree-less River Banks

**Vegetation:**  
NATIVE:  
Cottonwood, Honey Locust, Willow, Oak  
Prairie Plants, Phragmites along the edges

NON-NATIVE  
Corn, Soybeans, off of the River

**Wildlife/Habitat:**  
Deer, Raccoon, Crane (seasonal), Opossum, Water Birds, Cattle, Turkey, Coyote, Fox, Turtle, Fish

### Sense of Place Criteria:

#### Exceeding Expectations

1. Flat, shallow, and wide river
2. Edges of river are surrounded by forested and agricultural land
3. No development around river

#### Meets Expectations

1. Flat, shallow, and wide river
2. Maintained edges along river
  - Evidence of deciduous woodland as well as agricultural land
3. Minimal development areas around river
  - Little to no evidence of farms, houses, industries, and urban areas

#### Below Expectations

1. Flat, shallow, and wide river
2. Edges of river are eroded and have no trees
  - No evidence of deciduous woodland, agricultural land,
3. High use of infrastructure surrounding river
  - Evidence of farms, houses, industries, urban areas,

### 6. Republican River Valley

**Description:**  
The Republican River Valley is characterized as highly agricultural in nature, which has greatly diminished the flow of water coursing through its narrow channel. The river is highly tapped for irrigation purposes and supports intensive irrigation practices in areas with natural precipitation deficits.

**Key Characteristics:**  
- Forested banks and a narrow channel  
- Fertile agricultural land that surrounds the river  
- diminished in flow due to agricultural tapping

**Existing Condition/Scale:**  
The landscape is varied ranging from cropland to rolling prairie. The river is narrow and definable in regionality. The region tells the narrative of water scarcity for field crops and the challenges associated in farming this midwestern region of America. The population is rural, living mostly in small towns and farms.

**Topography:**  
Narrow sloping banks to the river corridor. Western areas have a wide valley

Narrow River Scale      Widest River Area

**Vegetation:**  
NATIVE:  
Cottonwood, Honey Locust, Willow, Oak  
Prairie Plants, Phragmites along the edges

NON-NATIVE:  
Corn, Soybeans away from the river

**Wildlife/Habitat:**  
Deer, Raccoon, Crane (seasonal), Opossum, Water Birds, Cattle, Turkey, Coyote, Fox, Turtle, Fish

### Sense of Place Criteria:

#### Exceeding Expectations

1. Narrow, sloping river banks
2. Edges of river are surrounded by forested and agricultural land
3. No development around river

#### Meets Expectations

1. Narrow, sloping river banks
2. Maintained edges along river
  - Evidence of deciduous woodland as well as agricultural land
3. Minimal development areas around river
  - Little to no evidence of farms, houses, industries, urban areas and irrigation methods

#### Below Expectations

1. Narrow, sloping river banks
2. Edges of river are eroded and have no trees
  - No evidence of deciduous woodland, agricultural land,
3. High use of infrastructure surrounding river
  - Evidence of farms, houses, industries, urban areas and irrigation methods.

# PLAINS, TRAINS AND CRANES: A LIVING HISTORY OF RURAL AMERICA

## Travel Routes Analysis : Introduction

### Abstract

**Definition**

**Road Experience:** The road experience can now be described as being a sequence played to the eyes of a captive, somewhat fearful, but partially inattentive audience. It is a sequence which must be long, yet reversible and interruptible. The sensation of driving a car is primarily one of motion and space, felt in a continuous sequence. Vision, rather than sound or smell, is the principal sense. Touch is a secondary contributor to the experience, via the response of the car to hands and feet.

**Related Terms**

**VRM:** Visual resource management (VRM) is a system for minimizing the visual impacts of surface-disturbing activities and maintaining scenic values for the future.

**BLM:** Bureau of Land Management (BLM) is committed to sound management of the scenic values on public lands in order to ensure that these benefits are realized and the scenic values are protected.

**Principles**

1. Sustained progression to a final goal interwoven with approaches to preliminary goals.
2. Establishment of a basic rhythm, transmuted but not broken.
3. The use of elevation to give distant views, and of curves to give sideways views.
4. The contrast of rural and urban development, or of open and closed space.
5. The regular repetition of such features as contact with a river, announcing a view by a prior symbol, or entering a nodal point via a descending turn.
6. The gradient of activity which leads up to each climax, but which is interrupted by a moment of hesitation or suspense before the culmination.

**Characteristics**

1. Visual Resource	Scenic Quality
Efficiency	Sensitivity Level
2. Route Sequence	Roadside Details
	Meaning
The Sense of Motion and Space	

**Goals & Objectives**

1. The first is to present the viewer with a rich, coherent sequential form, a form which has continuity and rhythm and development, which provides contrasts, well-joined transitions, and a moving balance. This form may be built out of the sensations of space or those of motion (both of self or the external environment). It may be constructed from modulations in light, color, or texture, from roadside detail, or perhaps even via secondary senses such as sound, smell, or touch.
2. The second objective of the design is to clarify and strengthen the driver's image of the environment, to give him a picture which is well-structured, distinct, and as far-ranging as possible. He should be able to locate himself, the road, and the major features of the landscape, to recognize those features with surety, and to sense how he is moving by or approaching them.
3. The third objective is to deepen the observer's grasp of the meaning of his environment: to give him an understanding of the use, history, nature, or symbolism of the highway and its surrounding landscape. The roadside should be a fascinating book to read on the run. Ideally, all three objectives should be achieved by means which interlock at every level.

### Visual Resource Inventory

**1. Scenic Quality Evaluation**

Scenic quality is a measure of the visual appeal of a tract of land. In the visual resource inventory process, public lands are given an A, B, or C rating based on the apparent scenic quality which is determined using seven key factors.

**landform**

**Vegetation**

**Water**

**Color**

**adjacent scenery**

**scarcity**

**cultural modifications**

**2. Sensitivity Level Analysis**

Sensitivity levels are a measure of public concern for scenic quality. Public lands are assigned high, medium, or low sensitivity levels by analyzing the various indicators of public concern. The factors we need to consider are type of users, amount of use, public interest, adjacent land uses, special areas, other factors.

1. **Type of Users**  
Maintenance of visual quality:
  - High: a major concern for most users
  - Moderate: a moderate concern for most users
  - Low: a low concern for most users
2. **Amount of Use**  
Maintenance of visual quality becomes more importance as the level of use increases:
  - High: high level of use
  - Moderate: moderate level of use
  - Low: low level of use
3. **Public Interest**  
Maintenance of visual quality:
  - High: a major public issue
  - Moderate: a moderate public issue
  - Low: a minor public issue
4. **Adjacent Land Uses**  
Maintenance of visual quality to sustain adjacent land use objectives is:
  - High: very important
  - Moderate: moderately important
  - Low: slightly important
5. **Special Areas**  
Maintenance of visual quality to sustain Special Area management objectives is:
  - High: very important
  - Moderate: moderately important
  - Low: slightly important

**3. Distance Zones**

<3.5 miles      3.5-15 miles      >15 miles

foreground-middleground      background      seldom seen

**4. Efficiency**

**Speed**

Traffic speed is influenced by volume, capacity, design, weather, traffic control devices, posted speed limit, and individual driver preference. For design purposes, the following definitions apply:

- Low-speed is 45 mph [70 km/h] and below
- High-speed is 50 mph [80 km/h] and above

**Lane Width and Number**

The usual and minimum lane width is 13 ft [4 m]. The number of lanes required to accommodate the anticipated traffic in the design year is determined by the level of service evaluation as discussed in the Highway Capacity Manual.

**Shoulders**

The minimum shoulder width is 12 ft [3.6 m]. This width applies to both inside and outside shoulders, regardless of the number of main lanes of the facility. Shoulders should be continuously surfaced and be maintained along all speed change lanes.

**Median**

In rural areas, median sections are normally wider than in urban areas. For multi-lane rural highways without access control, a median width of 76 ft [22.8 m] is desirable to provide complete shelter for trucks at median openings (crossovers). Urban freeways generally include narrower, flush medians with continuous longitudinal barriers. Median widths vary up to 30 ft [9.0 m], with 24 ft [7.2 m] commonly used.

**Signage**

Traffic signs are devices placed to guide, warn, and regulate the flow of traffic. Signs should be placed only where warranted by facts and engineering studies, as necessary for safety and proper regulation of traffic. They must meet five fundamental requirements:

- Fulfill a need
- Command attention
- Convey a clear, simple meaning
- Command respect from travelers
- Give adequate time for proper response

Signage      Shoulder >12 ft      Median 4 ft - 76 ft      Lanes >13 ft

### Route Sequence Analysis

**1. The sequence of Roadside Details**

The sequence of roadside details that are significant at the scale of the entire road-changes in lights, signs, rails, or paving texture is easily recorded.

Lights      Signs      Rails      Paving Texture

**2. The Sequence of Meaning**

For analysis, developing techniques for communication of:

- Locational orientation.
- The experience of motion (both of self and of surroundings) through a changing, light-filled spatial form.

The Meaning of the Surrounding landscape:

- Activity and Use
- Topography Natural Features
- Structures at Medium Distance

**3.1. The sence of Motion**

1. The passage of roadside detail, the apparent rotation of near objects around far objects

2. The seeming outward radiation of detail and textures from the point dead ahead.

3. And the illusion of growth as objects approach.

**Models for Transition in Sequence**

1. one characteristic may gradually melt into the other, like a movie dissolve.

2. Or the first may disappear before the second builds up.

3. Being embellished by an alternation of character before the new character is fully established, by use of hints and echoes.

4. The transition may be abrupt and shocking

5. The change may be mediated by a minor connecting link of a different kind.

6. Contrariwise, connection may be maintained by a continuous invariant characteristic, or ground.

**3. The sense of Motion and Space**

• Apparent self-motion: speed, direction, and their changes (stop-go, accelerate-decelerate, up-down, right-left).

• Apparent motion of the visual field passing alongside, overhead, or underneath, rotation, translation, spreading or shrinking of outline or texture, general stability or instability, apparent velocity or lack of it.

• Spatial characteristics:

- a. Presence, position, solidity and degree of enclosure
- b. General proportions of the space enclosed
- c. Quality of the light: intensity and direction.
- d. Relationship of spaces in sequence jointing and overlapping.
- e. Direction of principal views.

**3.2 The sence of Space**

A space can be narrow or wide, with solid or jagged, opaque, netted, or transparent walls. It may open out in front or to the side.

1. Narrow

2. Various

3. Open

4. Closed

### Approach and evaluation criteria

**User Experience**

**Landform**

**Vegetation**

**Water**

**Color**

**adjacent scenery**

**Scarcity**

**Cultural modifications**

**High Value**

Detail features dominant and exceptionally striking and intriguing topography.

A variety of vegetative types as expressed in interesting forms, textures, and patterns.

Clear and clean appearing, still, or cascading white water, any of which are a dominant factor in the landscape.

Rich color combinations, variety or vivid color, or pleasing contrasts in the soil, rock, vegetation, water or snow fields.

Adjacent scenery greatly enhances visual quality.

One of a kind; or unusually memorable, or very rare within region. Consistent chance for exceptional wildlife or wildflower viewing, etc.

Modifications add favorably to visual variety while promoting visual harmony.

**Medium Value**

Interesting erosional patterns or variety in size and shape of landforms; or detail features which are interesting though not dominant or exceptional.

Some variety of vegetation, but only one or two major types.

Flowing, or still, but not dominant in the landscape.

Some intensity or variety in colors and contrast of the soil, rock and vegetation, but not a dominant scenic element.

Adjacent scenery moderately enhances overall visual quality.

Distinctive, though somewhat similar to others within the region.

Modifications add little or no visual variety to the area, and introduce no discordant elements.

**Low Value**

Few or no interesting landscape features.

Little or no variety or contrast in vegetation.

Absent, or present, but not noticeable.

Subtle color variations, contrast, or interest; generally mute tones.

Adjacent scenery has little or no influence on overall visual quality.

Interesting within its setting, but fairly common within the region.

Modifications add variety but are very discordant and promote strong disharmony.

**Exceed Expectation**

1. Rolling Prairie Rangeland

2. Flat Agricultural Land

3. Undulating Agricultural Land

4. Rolling Agricultural Land

5. Platte River Valley

6. Republican River Valley

**Meet Expectation**

**Below Expectation**

## PLAINS, TRAINS AND CRANES: A LIVING HISTORY OF RURAL AMERICA

## Travel Routes Analysis : Interstate 80

## Interstate 80

Running through our region going east to west from Omaha to North Platte, I-80 for the most part follows the course of the Platte River, mirroring the Oregon, California, and Mormon Trails that cut through the Great Plains in the mid-1800s.

## Speed

The interstate was designed to move as many people as possible from coast to coast so the speed rarely drops, except around larger metropolitan areas like Lincoln and Omaha-Council Bluffs where a slower speed allows users to get off at any of the closely-packed exits instead of missing a few while at higher speeds.

### Traffic Flow

Interstate 80 is 2 lanes each way for most of its length, changing to 3 just west of Lincoln to accommodate larger numbers of users in the more populous east of the State, which sees more than double the traffic flow of the area west of Grand Island.

## Wayfinding

There are rest stops along the interstate, the majority being between Lincoln and Grand Island. Signs on route come in two colors, green for driving information such as distances and exits, and blue for what is available at each exit such as food and drink, lodging, and gas stations.

### Ecological Zones and Transitions

Just east of Grand Island the interstate passes over four of the channels of the Platte River. West of North Platte, along either side of the road, the Sandhills are visible.

## Framework

Interstate 80 is used as an efficiency road meaning people use it to get across Nebraska quickly. There are interesting and unique landscapes along the drive though. There are two types inside our region one being agriculture and the other being the Platte River Valley. The major punctuation points are at the Kearney Archway Museum and each time the interstate crosses the Platte River.

# PLAINS, TRAINS AND CRANES: A LIVING HISTORY OF RURAL AMERICA

## Travel Routes Analysis : Interstate 70

**Interstate 70**  
I-70 marks the southern boundary of our region, going from east to west through central Kansas. From WaKeeney on the west to Manhattan on the east, the interstate is the main route through the Central Plains.

**Speed**  
The interstate is 75 mph for its entire length without slowing, because no towns are directly along it, accessed only through interchanges.

**Traffic Flow**  
Interstate 70 is 2 lanes each way, with a low to moderate traffic flow except where it nears Salina, and then again close to Kansas City.

**Wayfinding**  
The rest stops are spaced fairly evenly along the east portion, while in the west there is a gap of 90 miles. Signage is detailed and regularly spaced, before and after each interchange and in the area inbetween.

**Ecological Zones and Transitions**  
Passing through three ecological zones - flat agricultural land, rolling prairie rangeland, and undulating agricultural land - showcases some of the most common landscapes in Kansas

**Framework**  
Interstate 70 is about efficiency across Kansas. People travel it to move quickly through the state. There are significant landscapes along it that can be capitalized on though. These happen in the area where the windmills sit at the top of the ridges between Salina and Russel. Also the Republican River Valley crosses over the interstate on the eastern end of our area.

# PLAINS, TRAINS AND CRANES: A LIVING HISTORY OF RURAL AMERICA

## Travel Routes Analysis : Highway 136

**Highway 136**  
Highway 136 follows the Republican River valley for 2/3 of its length, passing through McCook, Alma, Red Cloud, Hebron, Fairbury, and Beatrice.

**Speed**  
Cruising through the region at 65 mph in the west, it changes to 60 mph after the turn south to Edison, Nebraska.

**Traffic Flow**  
In the middle of the route the traffic flow is very low, increasing at either end near the largest cities: Beatrice with its proximity to Lincoln, and McCook with its closeness to Denver.

**Wayfinding**  
The signage is seen only at the interchanges, and very rarely between towns.

**Ecological Zones and Transitions**  
The highway has the largest variety of ecologies in any of our region's routes, passing through, rolling prairie rangeland, the Republican River valley, rolling agricultural land, and undulating agricultural land. Flatter in the east, the west contains good examples of the dissected plains.

**Framework**  
Highway 135 is the the east to west corridor that is not an interstate. This road is for the more patient and curious drivers that want to experience a various landscape changing experience. There are four types of landscapes that happen along the experience. Much of it involves the Republican River Valley but at the same time there is prairie, agricultural land and rolling hills.

# PLAINS, TRAINS AND CRANES: A LIVING HISTORY OF RURAL AMERICA

## Travel Routes Analysis : Highway 183

**Highway 183**  
Running through our region going north to south from Holdrege to Hays, highway 183 goes across rolling agricultural land, undulating agricultural land, , rolling agricultural land and flat agricultural land.

**Speed**  
The speed of highway 183 is unchangeable with 65 miles every hour, which gives users constant road experience.

**Traffic Flow**  
Highway 183 is also unchangeable, which is 2 lanes without median. It has a relative small number of users while the part around Hays has the highest traffic flow.

**Wayfinding**  
Highway 183 has enough and well-distributed signs for wayfinding. When people go through Holdrege to Hays, they may find each destination or rest stop easily.

**Ecological Zones and Transitions**  
The three types of agriculture land are all landscape characteristics. From Holdrege to Hays, the transitions are alternation of character, with connection , alternation of character and without connection.

**Framework**  
Highway 183 is the fastest of our minor national roads. It is also the furthest west road with the least amount of traffic. This road goes through three landscape types with the most significant being the Republican River Valley as it is the Harlan County Reservoir.

# PLAINS, TRAINS AND CRANES: A LIVING HISTORY OF RURAL AMERICA

## Travel Routes Analysis : Highway 281

### Highway 281

Running through our region from north to south from Interstate 80 to Interstate 70, Highway 281 goes across prairie and agricultural land, which gives tourists a more complete sense of place.

### Speed

The highway was designed to connect interstates 70 and 80, but because of the numerous towns along its length the speed regularly drops to 50 mph. While the lower speed makes driving the route less efficient, it allows the users more of a chance to see their surroundings, exit the road, and see more attractions.

### Traffic Flow

Highway 281 is 1 lane each way for most of its length, changing to 2 lanes just north of Hastings to accommodate large numbers of users in the northern part of our region, which sees 3 times the traffic of the area immediately to the south.

### Wayfinding

In the middle of highway 281, Red Cloud serves as a location to stop and rest, get a bite to eat, and orient yourself in their surroundings, the blue and green signs of roadside information helping direct users to nearby amenities.

### Ecological Zones and Transitions

Along the southern half of highway 281, prairie rangeland dominates on either side of the road. On the north end, the sandhills start to become visible from the road.

### Framework

Along 281 there are two different landscape types with a total of five subsections in each of these landscape types. These sections are created by separation in the landscape by rivers, valleys, and infrastructure. The north portion of 281 is used as an agricultural area whereas the southern portion is rolling rangeland.

# PLAINS, TRAINS AND CRANES: A LIVING HISTORY OF RURAL AMERICA

## Travel Routes Analysis : Highway 81

### Highway 81

Crossing our region north to south, highway 81 serves mostly as a link between the interstates. It has a high speed to experience different landscape with river and agriculture.

### Speed

On the south there are fewer towns to lower the speed limit, making a standard of 75 and then 70 mph. The north, with more towns, has a slightly slower speed limit at 65 mph.

### Traffic Flow

Acting as the main north-south link for I-70 and I-80, the traffic flow is somewhat high but consistent.

### Wayfinding

The wide availability of clear road signage enhances the experience of the route, as locations for lodging, food and drink, and gas stations are easily spotted and found.

### Ecological Zones and Transitions

There is little change in the landscape from north to south, with agricultural land being the mainstay of the view from the road. Around Concordia, the landscape changes briefly to rolling prairie before returning to rolling rangeland and farmland.

### Framework

Highway 81 as a whole is a flat road that connects I80 and I70 as its primary function. While traveling along its path though you come through three landscape types. The northern portion is more of agricultural use. After passing into Kansas it begins to turn into a prairie rangeland use but this change is gradual with areas of agriculture as well. The Republican River Valley is very significant right before Concordia and after Minneapolis there are short lengths of road that occur next to wetlands.

# PLAINS, TRAINS AND CRANES: A LIVING HISTORY OF RURAL AMERICA

## Travel Routes Analysis : Highway 77

**Highway 77**  
Running through our region going north to south from Lincoln to Manhattan, highway 77 goes across flat agricultural land, undulating agricultural land, rolling agricultural land, rolling prairie rangeland and republican river valley.

**Speed**  
The speed of highway 77 is dominated by 65 miles every hour, and 25 miles close to Beatrice is 60 miles every hour.

**Traffic Flow**  
Highway 77 is 4 lanes with median from Lincoln to Beatrice, changing to 2 lanes without median from Beatrice to Manhattan because of the larger number of users around Lincoln.

**Wayfinding**  
Highway 77 has well-distributed signs for wayfinding. But it should add one more sign between Wxaterville and Manhattan to find Cottage Hill more easily.

**Ecological Zones and Transitions**  
The three types of agriculture land are the major landscape characteristics. From Marysville to Manhattan, they transfer to rangeland and river valley. The transitions are alternation of character, without connection and with connection.

**Framework**  
Highway 77 connects two of our largest population hubs. These cities contain the majority of people we want to bring west into our Cultural Heritage Tourism. Driving the path you would encounter three landscape types with the most significant being the Republican River Valley near Manhattan. There is also several other significant historical places along 77 such as Alcove Springs and Homestead National Monument in Beatrice.

PLAINS, TRAINS AND CRANES: A LIVING HISTORY OF RURAL AMERICA

User Analysis: Queensland, Australia

What is QHTN?

Queensland Heritage Trails: Themed Routes

- 1 The Pacific Coast Way
- 2 The Tropical North
- 3 The Mulka Highway
- 4 The Overlanders Way
- 5 The Great South East
- Capricorn Highway
- Great Inland Way

Background

The trails include a variety of attractions of which cultural heritage is the most prominent, spanning coastal and inland routes that link larger cities and small villages to heritage attractions and themes extending thousands of kilometers (QHTN, 2006).

The program LINKS TOGETHER AUTHENTIC HERITAGE EXPERIENCES, such as the new Qantas Founders Outback Museum, making it easier for visitors to discover more of Australia's unique history, culture and natural wonders

Relationship with Red Cloud

- Both planning are auto-based tourism. Meanwhile, the state of Queensland relies heavily on the drive market, accounts for 85 percent of the total market.
- Both planning focus on increasing the overall appeal of a destination, bringing lesser-known attractions and features into the tourism business.
- Both planning pay attention to the feature of the customers and their favorites.

Defining Routes Tourism

- To diffuse visitors and disperse income from tourism;
- To bring lesser-known attractions and features into the tourism business/products
- To increase the overall appeal of a destination
- To increase length of stay and spending by tourists
- To attract new tourists and to attract repeat visitors
- To increase the sustainability of the tourism product

Chinese Heritage Trail

This trail is long and stretches across the whole province. Depending on what you are seeing, there are different trails at different lengths.

Atherton Tablelands to Innisfail (Remnants)

Distance: 6.0 miles Places: 3 stops

Features

- Chinese remnants
- Chinese industry
- Chinese shops
- Remnants of Chinese occupations including Hou Wang Miau Temple and the marked out of streets cape of the old Chinatown

Cairns City (Spirit)

Distance: 3.3 miles Places: 3 stops

Features

- Nature and migration
- Great Barrier Reef
- Wet Tropics Rainforest

Cairns to Cooktown (Spirit)

Distance: 56.2 miles Places: 5 stops

Features

- Port and Chinese culture
- Temples
- Many Chinese graves and shrines

Nature Heritage Trail

This trail is beauty and can easy see the Rainforest and Great ocean scenic and volcanic landscape.

Cassowary Coast (Litoral Rainforest trail)

Distance: 8.8 miles Places: 4 stops

Features

- Forest
- Great Barrier Reef
- Story of the first settlers

Cassowary Coast (Regional trail)

Distance: 18.5 miles Places: 14 stops

Features

- Combine nature resource with history about immigrants

Port Douglas trail

Distance: 3.0 miles Places: 4 Stops

Feature

- Great Barrier
- Great Ocean Road for its beauty.

Gold Coast trail

Distance: 20.0 miles Places: 15 Stops

Feature

- The most prominent, spanning coastal

Sunshine Coast

Distance: 40.0 miles Places: 22 Stops

Features

- Sunshine caffee and coast
- The most prominent, spanning coastal

Towns Heritage Trail

This trail is short and easy to see the whole province. Each trail will tell you the history of this town from the settler or celebrities or monuments.

Bruke Trail (History remnant)

Distance: 2.0 miles Places: 3 stops

Features

- Mixed population

Cairns Trail (Local Architecture Style)

Distance: 22.1 miles Places: 35 stops

Features

- Local architecture style
- Plantation

Cook trail (History)

Distance: 22.1 miles Places: 17 stops

Features

- Mixture with chinese culture

Mossman trail (History)

Distance: 8.0 miles Places: 5 stops

Features

- History of this town

Tablelands (Regional trail)

Distance: 10.6 Places: 13 stops

Features

- History of grazing and mining

Tablelands (Regional trail)

Distance: 10.6 Places: 13 stops

Features

- Towns history about the first pastoral
- History of grazing and mining

Lesson Learned

Success of QHTN

- Leading to a co-dependent relationship involving the scale of an attraction and the degree of its remoteness. Planners use the word 'theme' to describe a unifying concept that guides a series of interpretive contacts. The stories can be 'big picture' themes that highlight human achievement in Queensland, or they can be a series of local stories aimed at featuring people's lives. The new site brings together Queensland's 13 international tourism websites into a single platform for the first time.

Limits of QHTN

- Failure to consider the displacement effect of QHTN projects on existing attractions.
- The project selection process including in some cases a failure to consider issues of authenticity versus commodification. Supply issues are relevant-in the year to Dec 2000, the average room occupancy rate and average daily room rates were lowest for all regions in Queensland.
- The demand for visitors to heritage sites will be spread over a larger number of attractions thereby weakening the demand for individual sites, thus the emphasis on museums is an area of concern after visits to multiple sites.

10 Factors Affecting Demand

Users

Specialization level of heritage tourists

Patterns of consumers

Cost of trail

Sites

Distance and Site pulling power

Peripherality

Level of significance of the site

Location of competing attractions

Tourism market situation

Interest groups typified by school children

Different marketing practices

Users

The understanding of different demand of user group is the most important part in the whole trail planning, as what we planned eventually to meet tourists' demand. What Queensland did gives us a good precedent on tourists habitat in general, which can be drawn on in our thinking.

Drive Market Segmentation (Queensland)

Segment	Visor Numbers			Value/Total		
	Number (2000)	%	Growth 1990/2000	Total expenditure (2000) (\$AU\$)	Growth 1990/2000	Average Spend per Traveler (\$AU\$)
Grand Tour(22 nights)	308	2.8%	1.7%	298m	6.9	962
Big Tour(9-21 nights)	1314	12.3%	1.6%	1.39m	9.7	1062
Short Tour(4-7 nights)	2379	20.4%	15.4%	1.09m	25.1	460
Short Break(1-3 nights)	6581	64.8%	6.5%	1.39m	1.0	204
Total Drive Market (Queensland)	10700	100%	7.5%	6.46m	12.0	412

Total per annum \$ 4.4 billion

Big tour \$ 3.1 billion

Grand tour \$

Short tour \$

- This chart shows that 85 percentage users prefer 1-3 nights short break and the visitor number decrease with length of trip increase.
- Tourism-themed routes were most popular with the "big tour" and "grand tour" segments, but also with segments of the short tour market.

Specialization Level of users

Specialization is a common factor for identifying specific groups of visitors. The specialization level of heritage tourists influence their demand for a specific attraction.

Specialization Lead to...

Affect the theme of the routes

Under the analysis of aimed specialist heritage tourists, they thought that an attractive organized trip should be:

- Multi-theme, multi-choice
- Clear destination
- Novelty
- Recreational
- High-quality
- Educational

In correspondence to that, they classify 6 different types including 15 routes, based on the history and remnant of this town and region.

Perfectionism, high-quality: Coast trail

Novelty: Chinese remnants trail vs rainforest trail

Educational: towns heritage trail, local celebrity, vs local architecture style

Patterns of Users

A better understanding of travel behavior could assist in the marketing of secondary trips, staging areas, and minor attractions located in the vicinity of larger, more popular destinations. So they segmented tourists by their modes of travel. In addition to nationality, such as modes of travel, use of transport, accommodation and some socio-demographic variables were tasked.

- Strategies for future analysis of travelers and destination based on these findings will also be focused.
- There's difference between personal travel and friends and relatives tour mode.
- Geographical space and time models are also highlighted, like acceptable distance to travel, days tourists are supposed to stay on average, both these points are of high importance to the trail planning and those marketing areas.
- It influence the number and location of many parts of the tourist business: accommodation establishments, services, entertainment and recreational facilities.

Where They Come From

Normally international tourists are:

- From continental Europe, the United Kingdom (UK) or New Zealand (NZ)
- Overall the International Touring Market grew over the decade. Although not a significant part of the market, visitors from Asia have steadily increased.
- Generally, international tourists spend most of their trip to Queensland in Brisbane, TNQ and the Gold Coast.

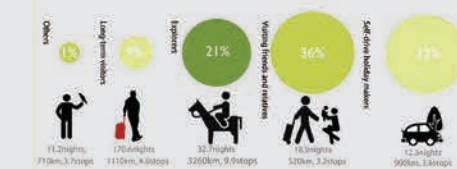

Normally domestic tourists are:

- Two thirds of domestic tourists are from interstate, mainly NSW.
- During the early 2000s the number of domestic tourists visiting Queensland increased.
- Brisbane, the Gold Coast and the Sunshine Coast are the most popular regions visited by the Domestic Touring Market.

Different Types of Visitors

Five different types of tourists were identified within Queensland International Touring market. The typical profile and travel habits of the five types of tourists are described below.

According to the statistics, visiting friends and relatives, self-drive holiday makers, explorers and self-driving holiday makers, most of them stop over in NSW on their way to Queensland, travel around in rental vehicles, visit more regions, which leads to more auto-based services on the road.

Specific Route Planning

Coming to the major visitor groups, as a great proportion of tourists coming to Queensland are couples, and lots of young people, trails should be more:

- Family friendly
- Culture & history related
- Close to nature
- Novelty

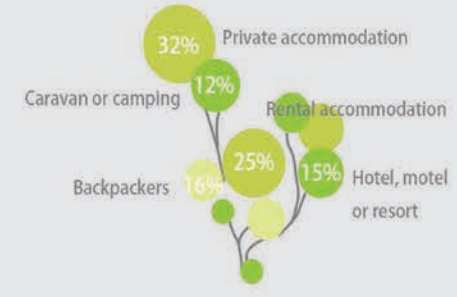

According to the average stops, still trails should not be too long and also not too much stops linked in one trail.

Major visitors groups:

Average stops, distances, nights:

Influence on Accommodation

According to visitors accommodation patterns, only 15% of tourists will choose hotel, motel or resort, so the number of hotels is to control, and camping, rental and other novelty ways of accommodation is to enhance in Queensland.

Travel cost

The cost of travel to destinations, which is a function of distance and the transport system, is a factor in destination selection. Tourists will amend their itinerary by deleting attractions that are difficult to visit because of a peripheral location.

- Enhance the public transportation services
- Peripheral asset are better to in a subgroup, not a single one
- Make it flexible of peripheral assets on the trail

# PLAINS, TRAINS AND CRANES: A LIVING HISTORY OF RURAL AMERICA

## User Analysis: Auto-Based Tourism

### Importance of Users

The user groups are important because they help to pinpoint the exact approach that should be taken when creating the specific cultural heritage tourism routes in our region.

Different users are going to want to take different routes, and see different attractions in the region. So using the information that we have gathered about each user will help to determine which cluster of assets that they will visit in the region on their cultural heritage tourism trip.

Analyzing these different user groups, the different lifestyles that are being led can start to be seen. Using these different lifestyles we can determine the route that a user would ideally use and how their experience can be optimized along this route.

The information that has been gathered about the different user groups will also help us to cater to the different budget levels of the users. A high-end user is going to have more money and time to spend compared to a low-end budget user.

### Auto Based Tourism

**Definition:** Traveling away from home for at least one night, on holidays or visiting friends and relatives, in their own, a rented or borrowed vehicle as the primary mode of transport.

#### Movement Types:

Auto-based tourism focuses more on the sequence of the trip from a multidestination approach, rather than a singular trip. The two movement types of territoriality and linearity, and they each occur in tourist movements. Each path is significant to the characteristics of the tourist as well as the geography of the place.

#### Territoriality

- Convenience-Based**  
Tourist is restricted by their familiarity of the place, transportation, and time budget. Visits destinations close to their place of accommodation.
- Concentric Exploration**  
Tourist is has a longer time budget and is somewhat familiar with destination. They venture out in phases so they have a back up location for when they are finished.
- Unrestricted Destination-Wide**  
Tourist is familiar with the place. There is no restriction of movement within the spatial boundary, transportation, or time budget. Can move around freely for entire trip.

#### Linearity

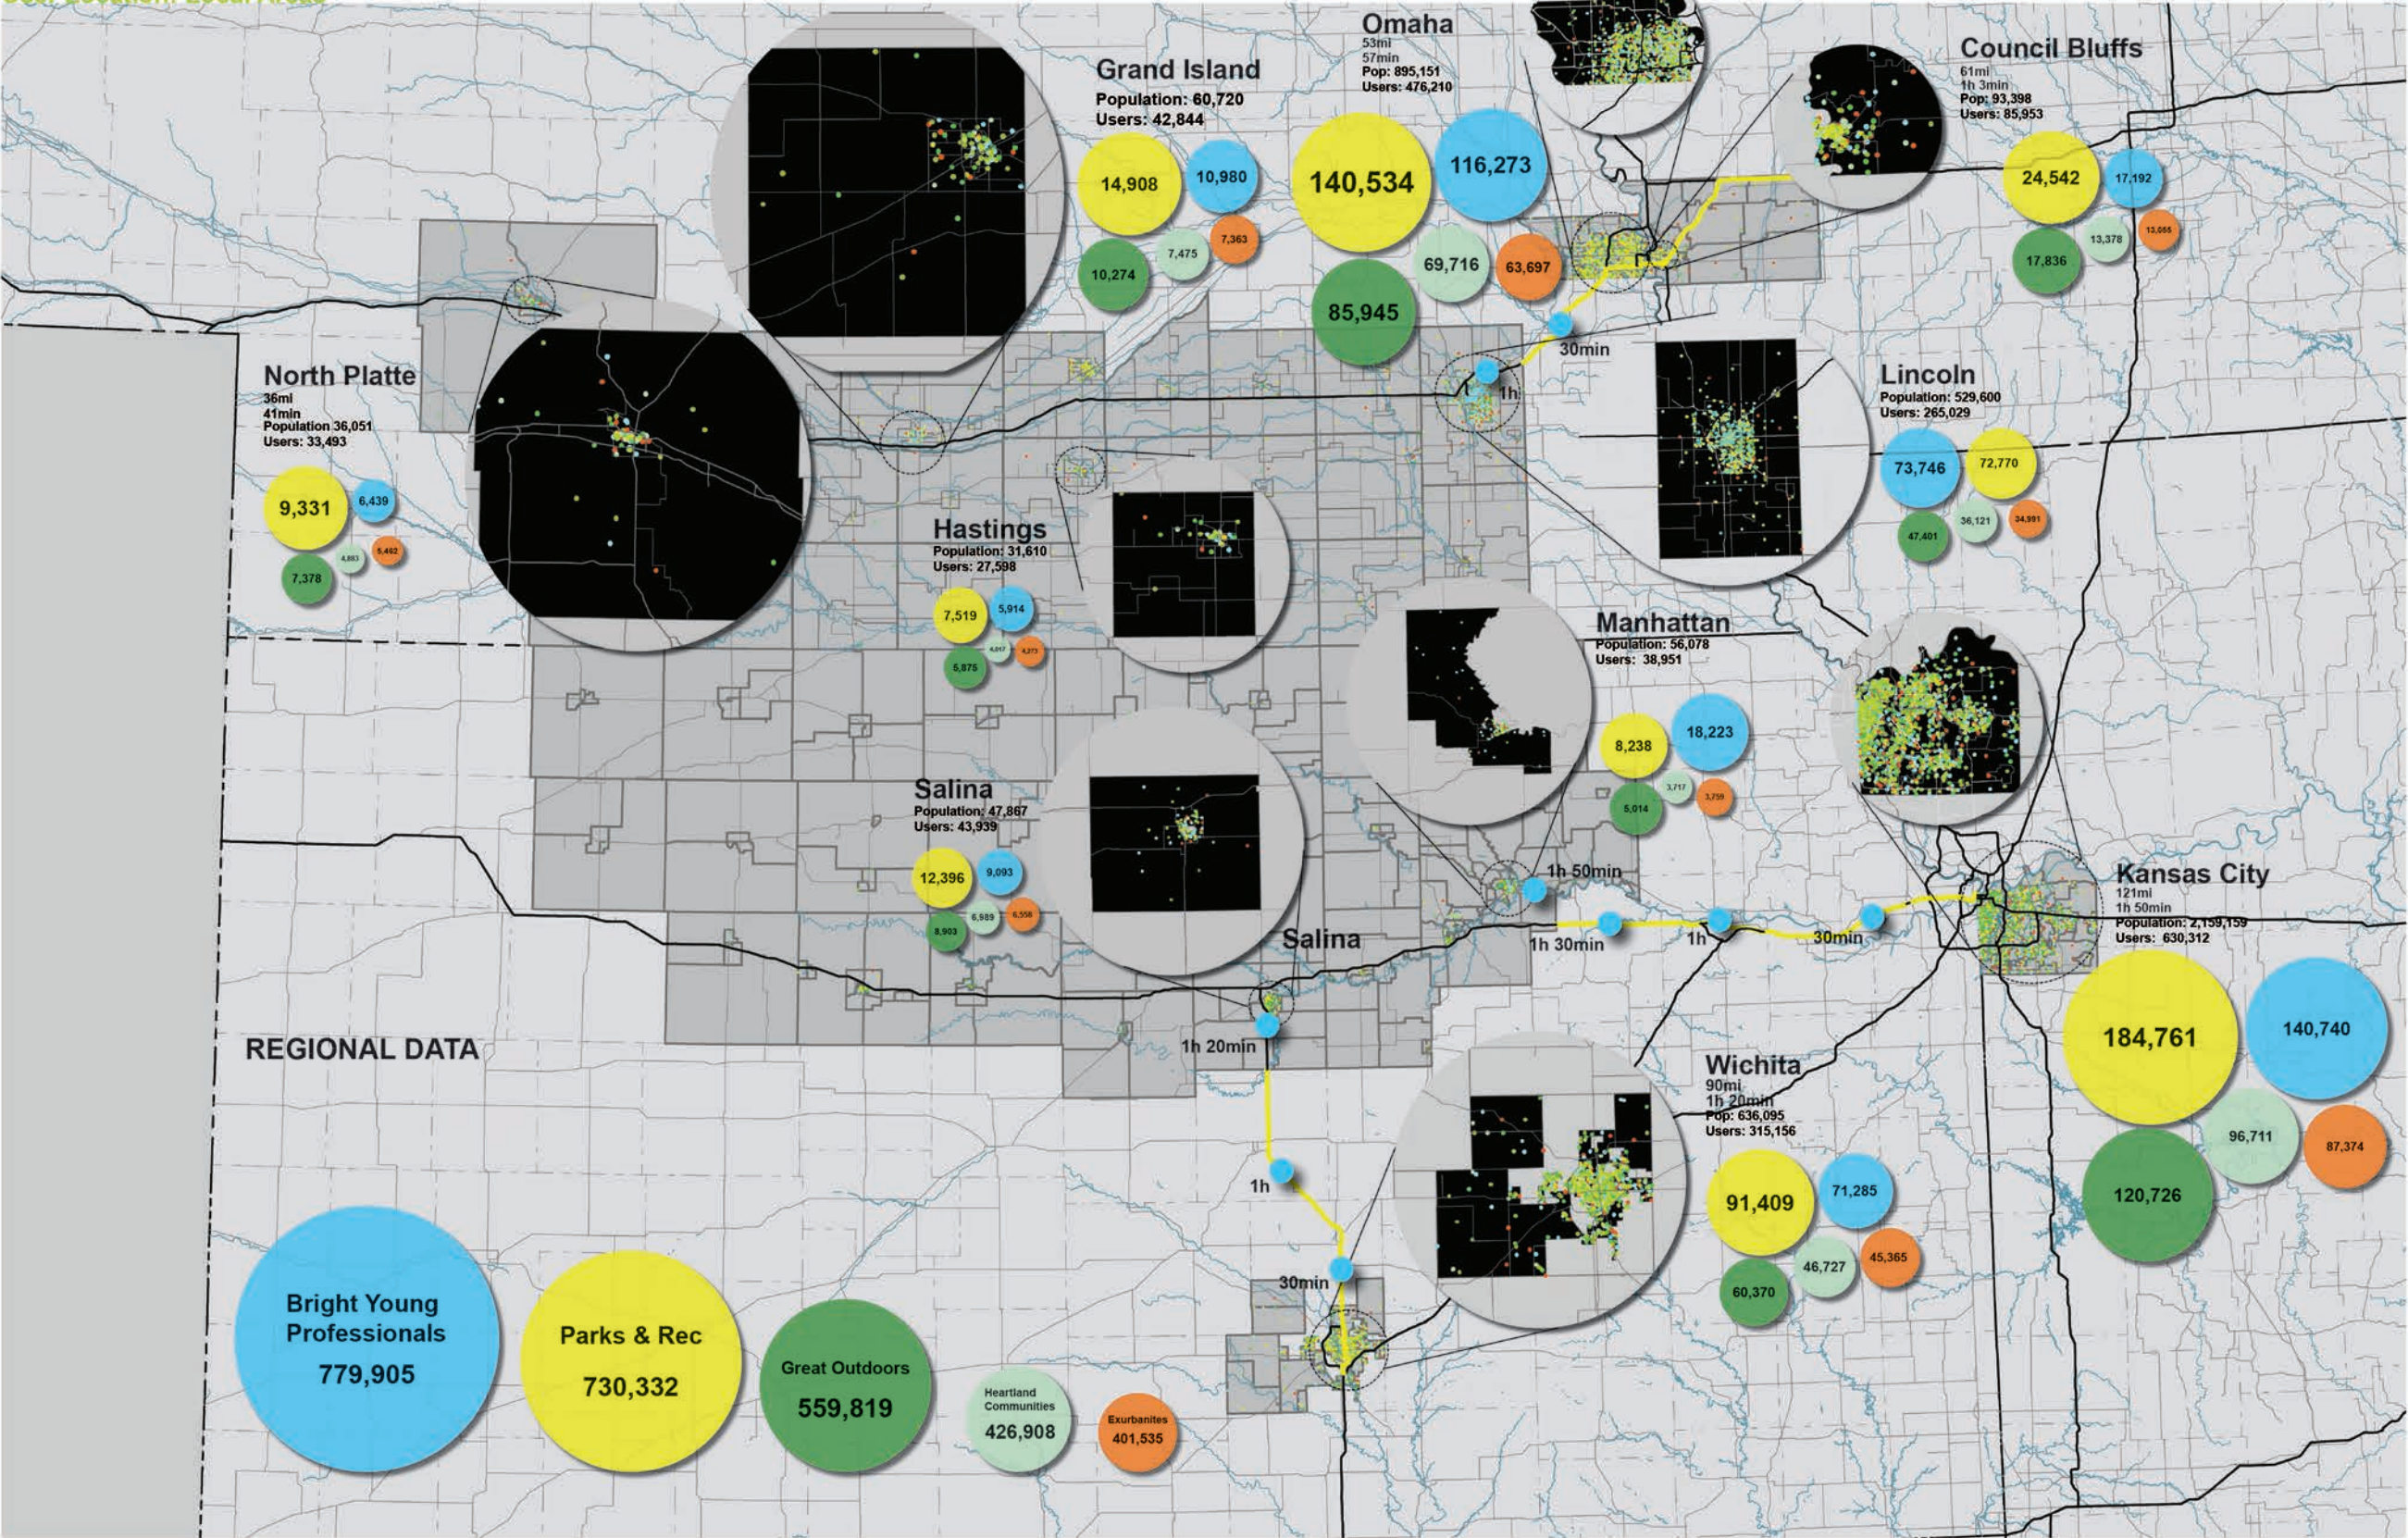

- Point to Point**  
Tourist is constrained by their accommodation focus. They visit multiple destinations, and take the same route returning to the focus.
- Touring Point**  
Tourist visits multiple destinations in different spatial boundaries and along the same route, but returns to new accommodation place on the same route they look to get there.
- Random Exploratory**  
Tourist is very familiar with the areas they are visiting. Path that is traveled has a distinct sequence and purpose. May look chaotic, but there is an underlying logic to travel routes.

#### Orientation

- Betweenness**  
The distance that each asset lies in relation to one another in the same spatial boundary. Controls interactions between pairs of assets in the regional network.
- Peripherality**  
Assets that are located on the edge of one spatial boundary that act as a connector to another one in the regional network.
- Centrality**  
The centrality of a town can help with accessibility on a regional level. The more accessible a group of towns with important assets, the more successful they will be.

## User Analysis: Bright Young Professionals Profile

## User Profile

### Who are they?

**Description:** Young, educated and working professionals either single or a couple.

Age: 20-34

Gender; Male and Female

Race: Over 60% white

Education: Bachelor's, Associates Degree or in progress

**Characteristics:**

- Like going to bars/clubs
- Eat out often at fast food or family restaurants
- Participate in a variety of sports
- Physically active and up to date on technology

**Hobbies:**

### How do they live?

Neighborhood: Urban outskirts

**Family Size:** About 2 people per home

Average Income: \$50,000

House: Small single family home or multi-unit

**Home Ownership:** Rent rather than own

Vehicle: May own vehicle but take public transport

## Support

**Lodging:**

PLAINS, TRAINS AND CRANES: A NATIONAL HERITAGE AREA
National Heritage Area

"A new kind of national park. One that married heritage conservation, recreation and economic development." - Ronald Reagan

National Heritage Area

What is a National Heritage Area

National Heritage Areas are places where historic, cultural, and natural resources combine to form cohesive, nationally important landscapes. Unlike national parks, National Heritage Areas are large lived-in landscapes. Consequently, National Heritage Areas entitles collaborate with communities to determine how to make heritage relevant to local interests and needs.

In 1984, the first National Heritage Area, Illinois and Michigan Canal National Heritage Area, was signed into law by President Ronald Reagan.

A National Heritage Area is not a unit of the National Park Service, nor is any land owned or managed by the NPS. National Park Service involvement is always advisory in nature.

National Heritage Area Activities

National Heritage Areas appeal to all ages and interests. Some have opportunities for walking, hiking, biking and paddling. Some have festivals to attend and museums to visit. Many Areas provide volunteer opportunities, group tours, and multiple-day excursions and can also be visited in combination with National Park units.

Heritage Areas vs. Parks

A National Heritage Area is not a unit of the National Park Service, nor is any land owned or managed by the NPS. National Park Service involvement is always advisory in nature.

The National Park Service provides technical, planning and limited financial assistance to National Heritage Areas. The NPS is a partner and advisor, leaving decision-making authority in the hands of local people and organizations. While National Parks are federally owned by the government, National Heritage Areas have their own organizations designated to manage and support them financially. These organizations request grants to help pay for what the heritage areas need.

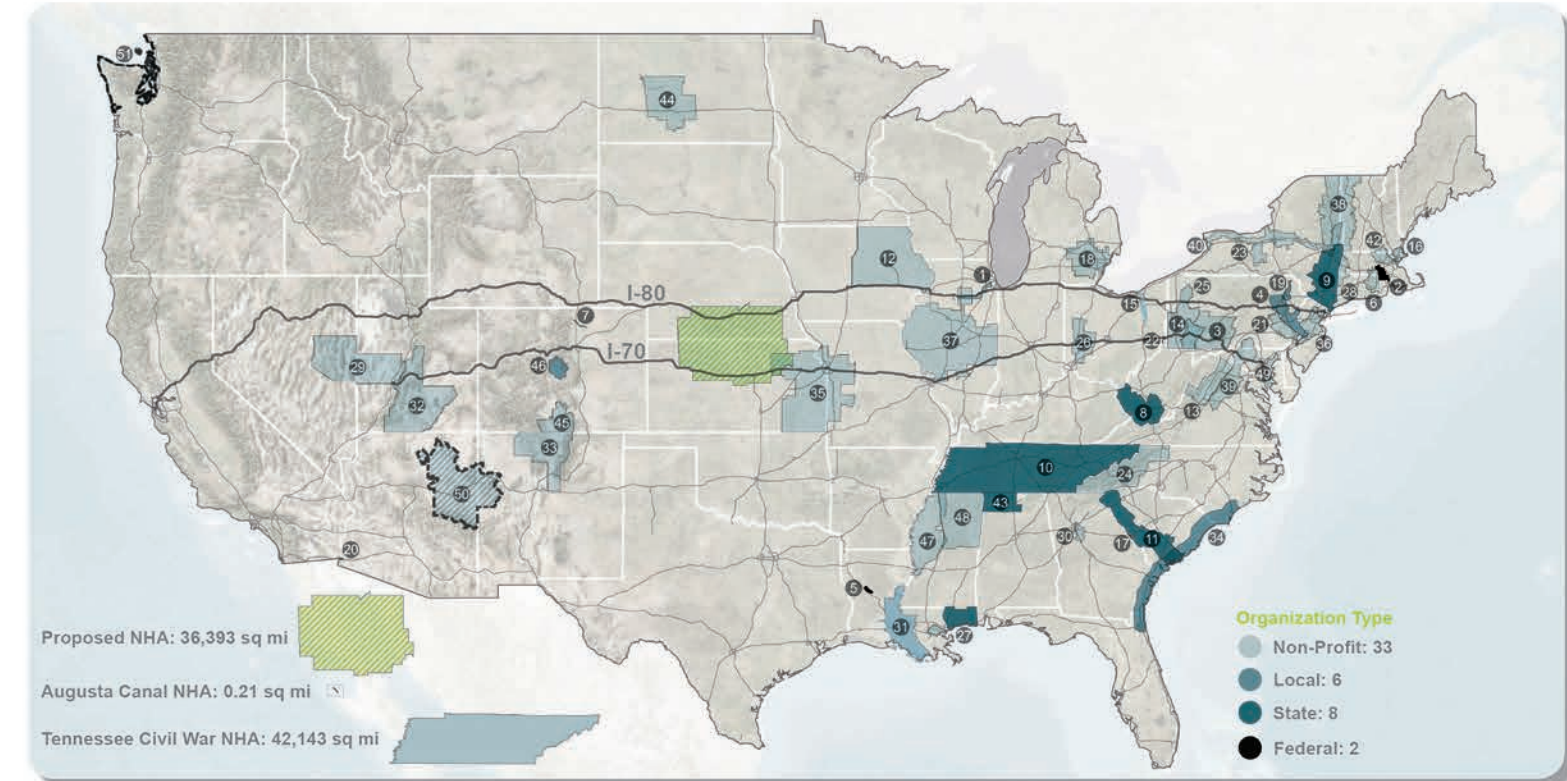

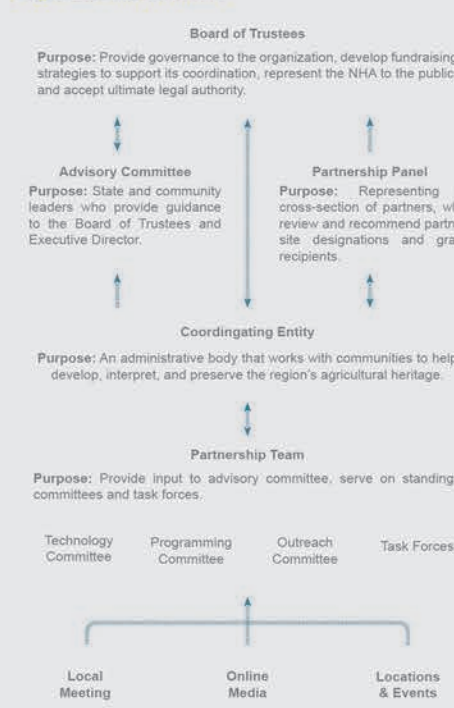

Benefits of National Heritage Areas

- Sustainable Economic Development
- Healthy Environment and People
- Improved Quality of Life
- Education and Stewardship
- Community Engagement and Pride

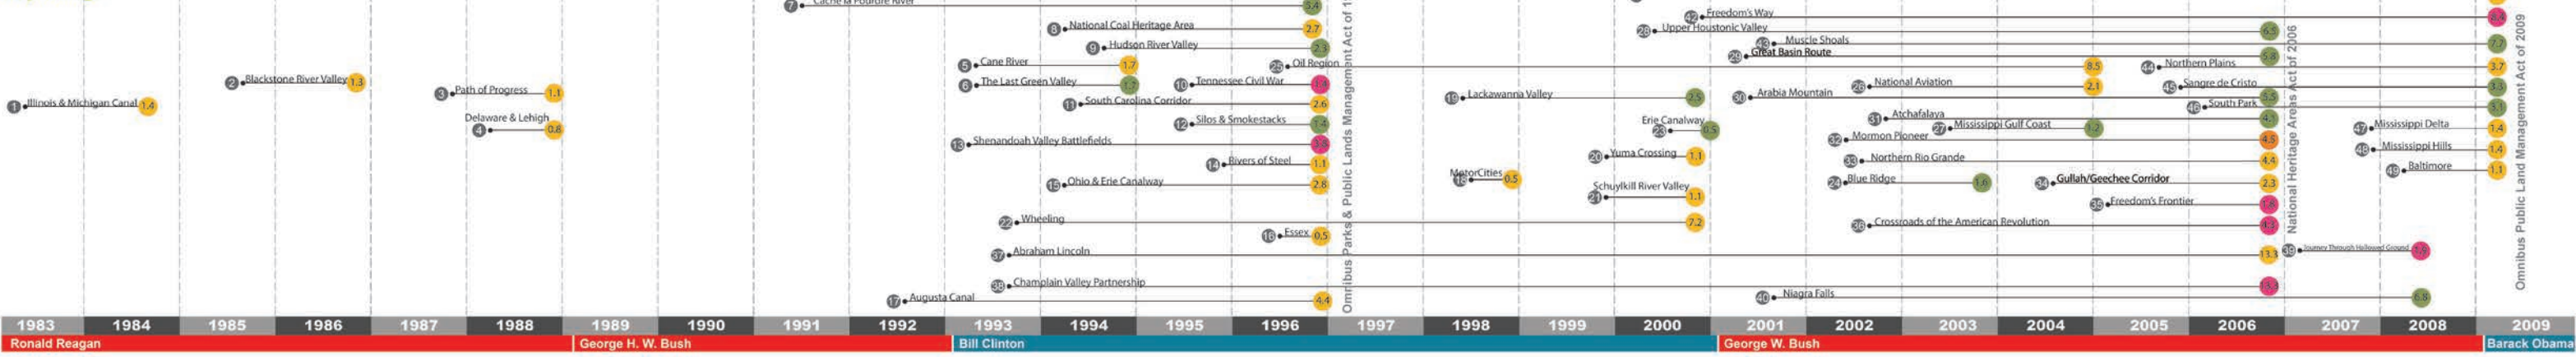

Criteria for Designating a National Heritage Area

- 1 Unified Assets
The area has an assemblage of natural, historic, or cultural resources that together represent distinctive aspects of American heritage worthy of recognition conservation, interpretation, and continuing use.
- 2 National Culture Story
The area reflects traditions, customs, beliefs, and folk life that are a valuable part of the national story.
- 3 Conservation
The area provides outstanding opportunities to conserve natural, cultural, historic, and/or scenic features.
- 4 Education & Recreation
The area provides outstanding recreational and educational opportunities.
- 5 Asset Value
Resources that are important to the identified theme or themes of the area retain a degree of integrity capable of supporting interpretation.
- 6 Financial Planning and Media
Residents, business interests, non-profit organizations, and governments within the proposed area, have developed a financial plan outlining roles for participants including the federal government.
- 7 Partnerships
The proposed facilitating entity and units of government supporting the designation are willing to commit to working in partnership to develop the Heritage Area.
- 8 Aligned Economic Plan
The proposal is consistent with continued economic activity in the area.
- 9 Conceptual Boundary
A conceptual boundary map is supported by the public.
- 10 Framework Plan
The facilitating entity proposed to plan and implement the project is described.

# PLANES, TRAINS AND CRANES: A NATIONAL HERITAGE AREA

## Precedent

- ### Principles
1. We will be tolerant and respectful of diverse stories from multiple perspectives.
  2. We will respect property rights.
  3. We will focus on authentic and engaging experiences.
  4. We will honor the region's peoples, past and present.
  5. We will appreciate the unique cultural and historic assets within the nationally important landscape.
  6. We will invest in community engagement, education and empowerment.
  7. We will sustain and grow sense of place.
  8. We will value and protect the natural environment.
  9. We will consider future generations in everything we do.
- ### Goals
1. Build awareness of the struggles for freedom that took place within the boundaries of Freedom's Frontier for current and future generations.
  2. Enhance, sustain, and preserve the unique cultural and historic assets within our nationally important physical and cultural landscapes that fostered these stories.
  3. Inspire tolerance and respect for multiple perspectives.
  4. Empower residents to preserve and share our nationally important authentic stories in an engaging way.

## Community Engagement

### Community Engagement Goal

Citizen participation is a key element of the Freedom's Frontier story. Stories of citizen participation contribute to the main theme of this National Heritage Area, with free staters, populists, civil rights advocates, and many others standing up and making their voices heard to affect change in their society. Citizen participation is a key to the history of this region and a key to its future.

### Community Engagement Importance

Citizen engagement is not only part of the Freedom's Frontier story, it is part of the organization's foundation. The Freedom's Frontier network began out of a coalition of citizens interested in preserving their history for future generations. Citizen engagement is mandated in the Freedom's Frontier enabling legislation and is woven in its citizen-created Vision, Mission, and Guiding Principles. The Freedom's Frontier goals cannot be achieved without active participation by an ever-growing group of interested residents.

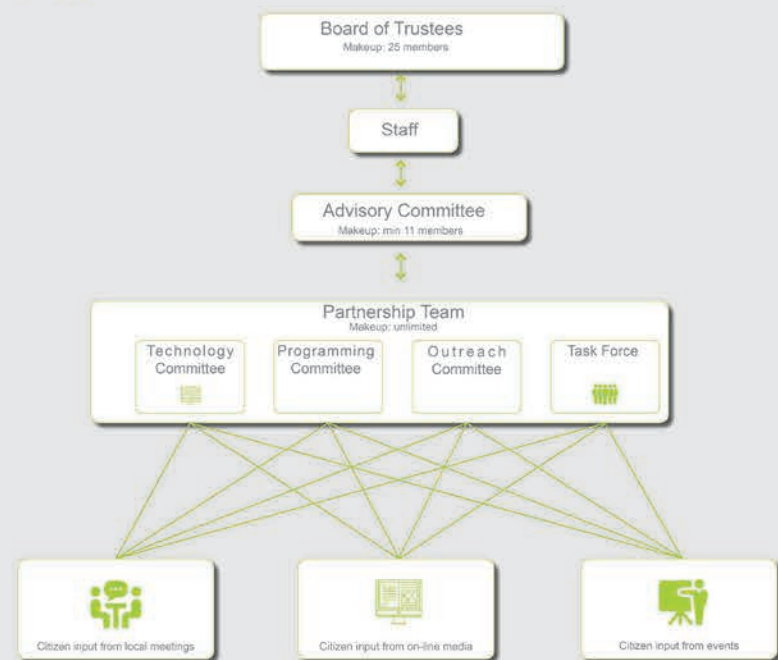

### Public Engagement Strategies Used

### Community Engagement Strategy

### Community Engagement Structure

## Alliance of National Heritage Areas

### Mission

The Alliance of National Heritage Areas works collectively to protect and promote the people and the places that tell America's stories. They are a membership organization of congressionally designated National Heritage Areas and partner/affiliated organizations promoting the professionalism and benefits of the program through education and advocacy. Together, they facilitate and celebrate partnerships that improve their effectiveness and impact. The ANHA hosts three meetings a year where they share best practices, decide strategic direction and hear from industry leaders on issues facing large-scale landscape stewardship. Their annual meeting is held each year in Washington, DC.

### Partnership

- Their goals:
- Serve as one voice on interests related to all NHAs
  - Educate key constituencies about success and image of the NHA program
  - Facilitate strategic links among NHAs and partners
  - Enhance the organizational capacity of its members
  - Provide a network for sharing best practices regarding a variety of disciplines

### Current Board

#### Board Member

- Sarah Watson, Mera Cardenas, Dayton L. Sherrouse, Angie Chandler, Kathleen Benedict, Jim Brangan, Elissa Garofalo, Andy Kitzmann, Annie C. Harris, Julie McPike, Brandi Roberts, J. Herman Blake, Ph.D., William Sellers, Sara Capen, Thomas A. Romero, Daniel M. Rice, Marilyn Black, Charles W. Flynn

### Representing

- Abraham Lincoln NHA, Arabia Mountain NHA, Augusta Canal NHA, Blue Ridge NHA, Cache la Poudre River NHA, Champlain Valley NHA, Delaware & Lehigh NHC, Erie Canalway NHC, Essex NHA, Freedom's Frontier NHA, Great Basin NHA, Gullah Geechee Cultural Heritage Corridor, Journey Through Hallowed Ground NHA, Niagara Falls NHA, Northern Rio Grande NHA, Ohio & Erie Canalway NHA, Oil Region NHA, Yuma Crossing NHA

### Benefits of Partnership

- Network for Education
- Representation
- Facilitates Connections

### Challenges of Partnership

- Splitting Funds between NHA's
- Difficult To Become Established
- Distance Between Areas

### History

The ANHA was started in 1984 after Ronald Reagan (R) designated the first National Heritage Area, Illinois and Michigan Canal National Heritage Area. National Heritage Areas are places where historic, cultural, and natural resources combine to form cohesive, nationally important landscapes. Unlike national parks, National Heritage Areas are large lived-in landscapes. Consequently, National Heritage Areas entities collaborate with communities to determine how to make heritage relevant to local interests and needs.

### Present

The Alliance of National Heritage Areas (ANHA), a collaboration of the management entities for the federally designated NHAs, working through its Heritage Development Institute initiative, provides training to practitioners of heritage development. The ANHA also operates a resource center for heritage areas, organizes educational workshops and programs, and promotes heritage tourism.

### Future

The ANHA meets three times a year with the National Park Service to discuss legislation propositions and federal funding requests. They accept membership from Congressionally-designated National Heritage Areas, areas undertaking the designation process and allied organizations that have common interest in conservation, environmental stewardship, historic preservation and outdoor recreation among others.

# PLAINS, TRAINS AND CRANES: A NATIONAL HERITAGE AREA

## Alignment Analysis

Unified Assets

The assets in this region create communities of similar themed ideas and goals. Each of the assets in some way showcases how the American Heritage developed from the time people migrated here to the present day.

There are many types of assets that we inventoried such as Environmental, Industrial, Military, Historic, Religious, Museums and even Events that each have Cultural Heritage as their focus. Each of these types of assets affected the current state of the prairie land in Nebraska and Kansas. Through the unified value of all of them they fulfill the first criteria of National Heritage Area.

Pony Express Station Museum  
Hastings Museum  
Rock Island Train Depot  
National Orphan Train Complex  
Red Cloud Train Depot  
Marysville Union Pacific Depot  
Significant Landscapes  
Native Scenery and Views

National Culture Story

As seen in Phase 2.2 of the Inventory, you can see that our national culture developed over time. The Prairie culture begins with the formation of the land over thousands of years as the glaciers swept across the area carving out the hills, valleys, and rivers.

Then the first dwellers built here. We know them as Native Americans and they were nomadic people that followed their resources across the plains. When the Homestead Act was put into place many settlers came westward which brought new cultures of European descent.

The current culture is one of dense urban settings with little remembrance of the natural setting that surrounds each of the large urban areas.

Monument to the Ice Age  
Wymore Welsh Society  
Historic Houses  
Historic Trails  
Starke Round Barn  
Veteran Memorials

Conservation

The region currently has lots of land set aside for conservation of resources. This not only is a conservation of wildlife but also a conservation of scenic quality and beauty of areas that have had little to no impact on the land.

In this area there is:  
1 National Park  
2 National Wildlife Refuges  
2 State Fish Hatcheries  
2 Reservoirs and Dams  
4 National Wildlife Areas  
27 State Wildlife Areas  
43 State Parks  
46 State Wildlife Management areas

Significant Views  
Unique Landscape  
Various Ecologies

Education & Recreation

The recreation of the area consists of people using the land for leisure. Visitors often use the parks for weekend get aways. While visiting the parks different activities are available for people to partake such as fishing, boating, swimming, bird watching, hiking and many more depending on the park and amenities present.

There is also an educational aspect to this criteria which is often not very apparent outside of the assets. Each individual asset teaches about what they are but often times does not teach about the setting or other assets nearby. A broader knowledge will be needed for all stakeholders to actively engage with this idea of National Heritage Area.

Road Side Monuments  
Recreation Areas

Asset Value

In each National Heritage Area there are several assets that are the most significant and are the leaders of the area. There are many assets in this region that have the potential and currently bring in a significant flow of visitors which would allow them to support this area as a National Heritage Area financially.

In our region, based upon the authenticity value analysis, we have thirty-two assets that are authentic. This is using the ten criteria we researched through our phase one of this two year process.

Willia Cather Foundation  
Homestead National Monument  
Dwight Eisenhower Presidential Library  
Pioneer Village  
Great Platte River Road Archway Museum  
Stuhr Museum  
Wessels Living History Farm  
National Orphan Train Complex  
The Landscape of the Region

Financial Plan

Currently each asset relies on their own financial plan. Becoming a National Heritage Area would mean there is more money that will be made and brought into the area.

Everytime the federal government puts one dollar into the National Heritage Area about five dollars are made in the area. The region we are analyzing would become a National Heritage Area if the assets began to collaborate together and create a financial plan to start the process. The first step will be determining the leaders then creating an organization help develop a financial plan.

Willia Cather Foundation  
Homestead National Monument  
Dwight Eisenhower Presidential Library  
Rowe Sanctuary-Audubon

Partnerships

Currently there are few partnerships within the region. Within individual communities assets interact with each other and help each other to be successful. This needs to be broadened at a more cohesive regional scale to make this area more successful. Partnerships will link each of the assets in a way to benefit the entire region.

When visitors enjoy an experience at a train depot in one town they will move to another town to visit another depot. Through the partnerships in National Heritage Area each partner would then be able to direct visitors to other train depots.

South Platte United Chamber of Commerce  
Concordia, Kansas Tourism Relationships  
Stuhr Museum and Hastings Museum

Aligned Economic Activity

The economic impact of this region presently relies on the agriculture industry. This is an opportunity to educate people of both the historical significance of agriculture as well as the current significance. Agriculture is a main theme of both Kansas and Nebraska and will be both an educational tool and economic tool for the National Heritage Area.

Many of these small towns also rely on small tourism of the passing through tourist. These small rural communities do have their own assets that could generate more income and value if they were apart of a whole idea of a National Heritage Area.

CRANE TRUST

Both States

1 - Education  
2 - Public Awareness  
3 - Economic Plan  
4 - Organizational Leadership

Nebraska Tourism

1 - Content and Services  
2 - Education  
3 - Public Awareness  
4 - Financial Resources  
5 - Human Resources  
6 - Technology  
7 - Governance

Kansas Tourism

1 - Educate and Engage  
2 - Carry the Kansas Image  
3 - Build Awareness  
4 - Motivate Consumers  
5 - Stimulate Planning  
6 - Public Relations and Group Travel  
7 - Cooperative Marketing

Conceptual Boundary

The boundary that is currently being analyzed is based upon a road based tourism scheme. Where the tourist experience is 50% scenic road views and 50% asset experience. The boundary to the north is Interstate 80 and in the south is Interstate 70. The eastern most road is highway 77 from Lincoln to Manhattan and the western road is 183 from Elm Creek to Hays.

Each of the roads has its own sense of place as determined in Phase 3.1 as well as each road has a gateway city. These gateway cities are where most of the visitors will be drawn away from to experience the landscape and culture of this proposed NHA.

Little Colorado River National Heritage Area Initiative

The framework for this initiative is an example that can be used to begin the initiative for the Heritage Area we are proposing.

Principles

Heritage Education  
Voluntary Preservation  
Security of Property Rights  
Local Management

Goals

1 - Development and Increase of Heritage Tourism, and a Resulting Boost in Economic Revenues and Value of Local Lifestyles

2 - Additional Source of Funding for Locally Important Projects Pertaining to Cultural Education and Resource Conservation

3 - Increased Ability to Effectively Network with Multiple Organizations on a Regional Scale and Pool Resources to Complete Tourism, Educational, and Conservation Projects

4 - Increased Support for Local, Rural Economies

5 - Expanded Opportunities and Resources for Volunteer Stewardship of Natural Resources and Elements of the Region's Heritage

6 - Balanced Preservation and Promotion

Framework Plan

The Framework Plan has been started through the collaboration of the University of Nebraska's College of Architecture Landscape Architecture Vertical Studio and key stakeholders within the area that have a keen interest in the idea of becoming a National Heritage Area. Each of these stakeholders has been vocal in their opinions during each phase of the process which helps further the future framework of the area becoming a National Heritage Area.

The status of the framework is in development and would need further collaboration to meet the requirements of a NHA.

# PLANES, TRAINS AND CRANES: A NATIONAL HERITAGE AREA

## Synergies

### Museums

**Mission**  
Preserve and portray the inspiring era of the pioneer town builders who created the first communities in Nebraska. - Stuhr Museum

**Partnership**  
Associations Involved:  
- Stuhr Museum  
- Hastings Museum

Visitors gain free admission to one museum after buying a membership for the other. For example, if someone buys a membership to the Hastings Museum they receive free admission into the Stuhr Museum.

**How was it formed?**  
The realization to create this came when they decided they should work together instead of competing. This has been in place for more than 20 years and they sometimes work with the MONA in Kearney.

Location of museums in region

#### Benefits of Partnership

- Come together to form a bigger product
- Promotes each business
- Allows users to make a case to come to the area

#### Challenges of Partnership

- Restructuring agreements
- Hard to coordinate different events
- Communication

### History

**Past**  
The Stuhr Museum has tried to work with other organizations in the past but they have not worked or were unable to continue them. These are the places they worked with in the past:

- MONA
- Grand Island Library
- Grand Island Historical Society

**Present**  
Currently the Stuhr Museum works with the Hastings Museum but they also have discounts at other Living History Museums across the nation including:

- Adirondack Museum
- Connor Prairie
- George Ranch
- Strawberry Banke
- Old World Wisconsin
- Old Salem

**Future**  
The Stuhr Museum would like to partner with other organizations. These include:

- Willa Cather Foundation

**Sources:**  
Hastings Museum, [hastingsmuseum.org/](http://hastingsmuseum.org/), Accessed 20 Apr. 2017.  
Stuhr Museum of the Prairie Pioneer, [www.stuhrmuseum.org/](http://www.stuhrmuseum.org/), Accessed 20 Apr. 2017.

Grand Island Library

Museum of Nebraska Art

Old Salem Tavern

Old World Wisconsin

Willa Cather's Childhood Home

Red Cloud's Opera House

### Bird Trifecta

**Mission**  
Working together to create an experience for bird lovers.

**Partnership**  
Associations Involved:  
- Harlan County Tourism  
- Audubon Rowe Sanctuary  
- Nebraska Tourism Commission  
- Kearney Visitors Bureau  
- McCook Visitors Bureau

Each establishment advertises the other so people interested in birds can see all of them when they migrate to this area.

**How was it formed?**  
They formed this in response to bird watchers want to see multiple types of birds. The people who see cranes want to see more and very few know about the prairie chickens. This is a very recent partnership.

Location of bird trifecta organizations

#### Benefits of Partnership

- Marketing partnership
- Tourist Increase
- Attracted press attention

#### Challenges of Partnership

- Marketing partnership
- Coordination
- Unpredictable weather conditions

### History

**Past**  
Since the Bird Trifecta was created within the last year, they haven't worked with anyone else in the past.

**Present**  
The McCook Visitors Bureau works with other organizations to create the Bird Trifecta. They include these organizations:

- Harlan County Tourism
- Audubon Rowe Sanctuary
- Nebraska Tourism Commission
- Kearney Visitors Bureau

**Future**  
While it is new, many places don't know they can join this partnership. They have been approached by other places and are seeking others to join as well. These include:

- South Platte region
- Funk Lagoons
- Reservoirs owned by Game and Parks

**Sources:**  
Nebraska Spring Birding Trifecta, [www.nebraskaspringbirding.com/](http://www.nebraskaspringbirding.com/), Accessed 19 Apr. 2017.

Kearney Visitors Bureau

Swanson Reservoir in Trenton, Nebraska

Funk Lagoon

### SPUCC

**Mission**  
South Platte United Chamber of Commerce works diligently to improve opportunities for our youth to return to their home towns to live, prosper, and raise families.

**Partnership**  
Associations Involved:  
- Arapahoe Chamber of Commerce  
- Axtell Area Chamber of Commerce  
- Black Hills Energy  
- City of Curtis  
- Farm Bureau Federation  
- First Bank and Trust Company  
- GROW Nebraska  
- Hastings Area Chamber of Commerce  
- Kearney Area Chamber of Commerce  
- McCook Area Chamber of Commerce  
- and more!

Location of SPUCC organizations

#### Benefits of Partnership

- Marketing strategies
- Community involvement
- Being seen from outside leads people to be members

#### Challenges of Partnership

- Difficult to get younger people involved
- Low donor involvement
- Membership commitment

### History

**Past**  
This organization was started in the 1930s with only a few city communities and started with tourism in the early 50s.

**Present**  
Currently, they are working with city communities, local companies, and even education systems. Some of the tourist areas being promoted were started by SPUCC.

**Future**  
SPUCC is having difficulty trying to expand because current members are older. They are looking at other areas in the region.

# PLAINS, TRAINS, AND CRANES: A LIVING HISTORY IN RURAL AMERICA

## Sense of Place: Framework

**Maya Lin: Confluence**

Confluence is a community supported nonprofit that connects people to place through art and education. They work in collaboration with Northwest communities, tribes and celebrated artist Maya Lin to create reflective moments that can shape the future of the Columbia River system. Lin created a series of seven large art/landscape installations along the Columbia river, based on the cultural history of the sites. Five of them in Washington, and two of them in Oregon, but one of them not been built. And now, they share stories of this river through six public art installations, educational programs, community engagement and a rich digital experience.

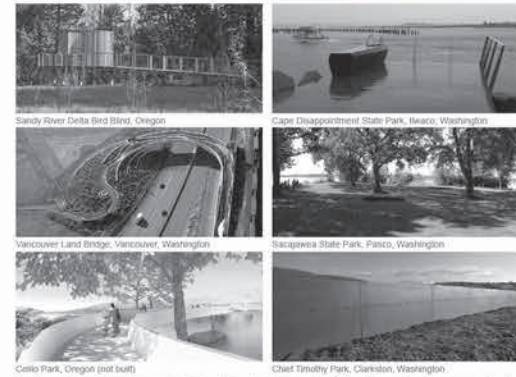

CONFLUENCE

Ecology

Culture

Education

History

Each work references a passage from the Lewis and Clark journals as a snapshot in time, while comparing it with the deeper story. It encompasses work in over 15,000 acres of state and federal land that is now being restored as an integral part of the project.

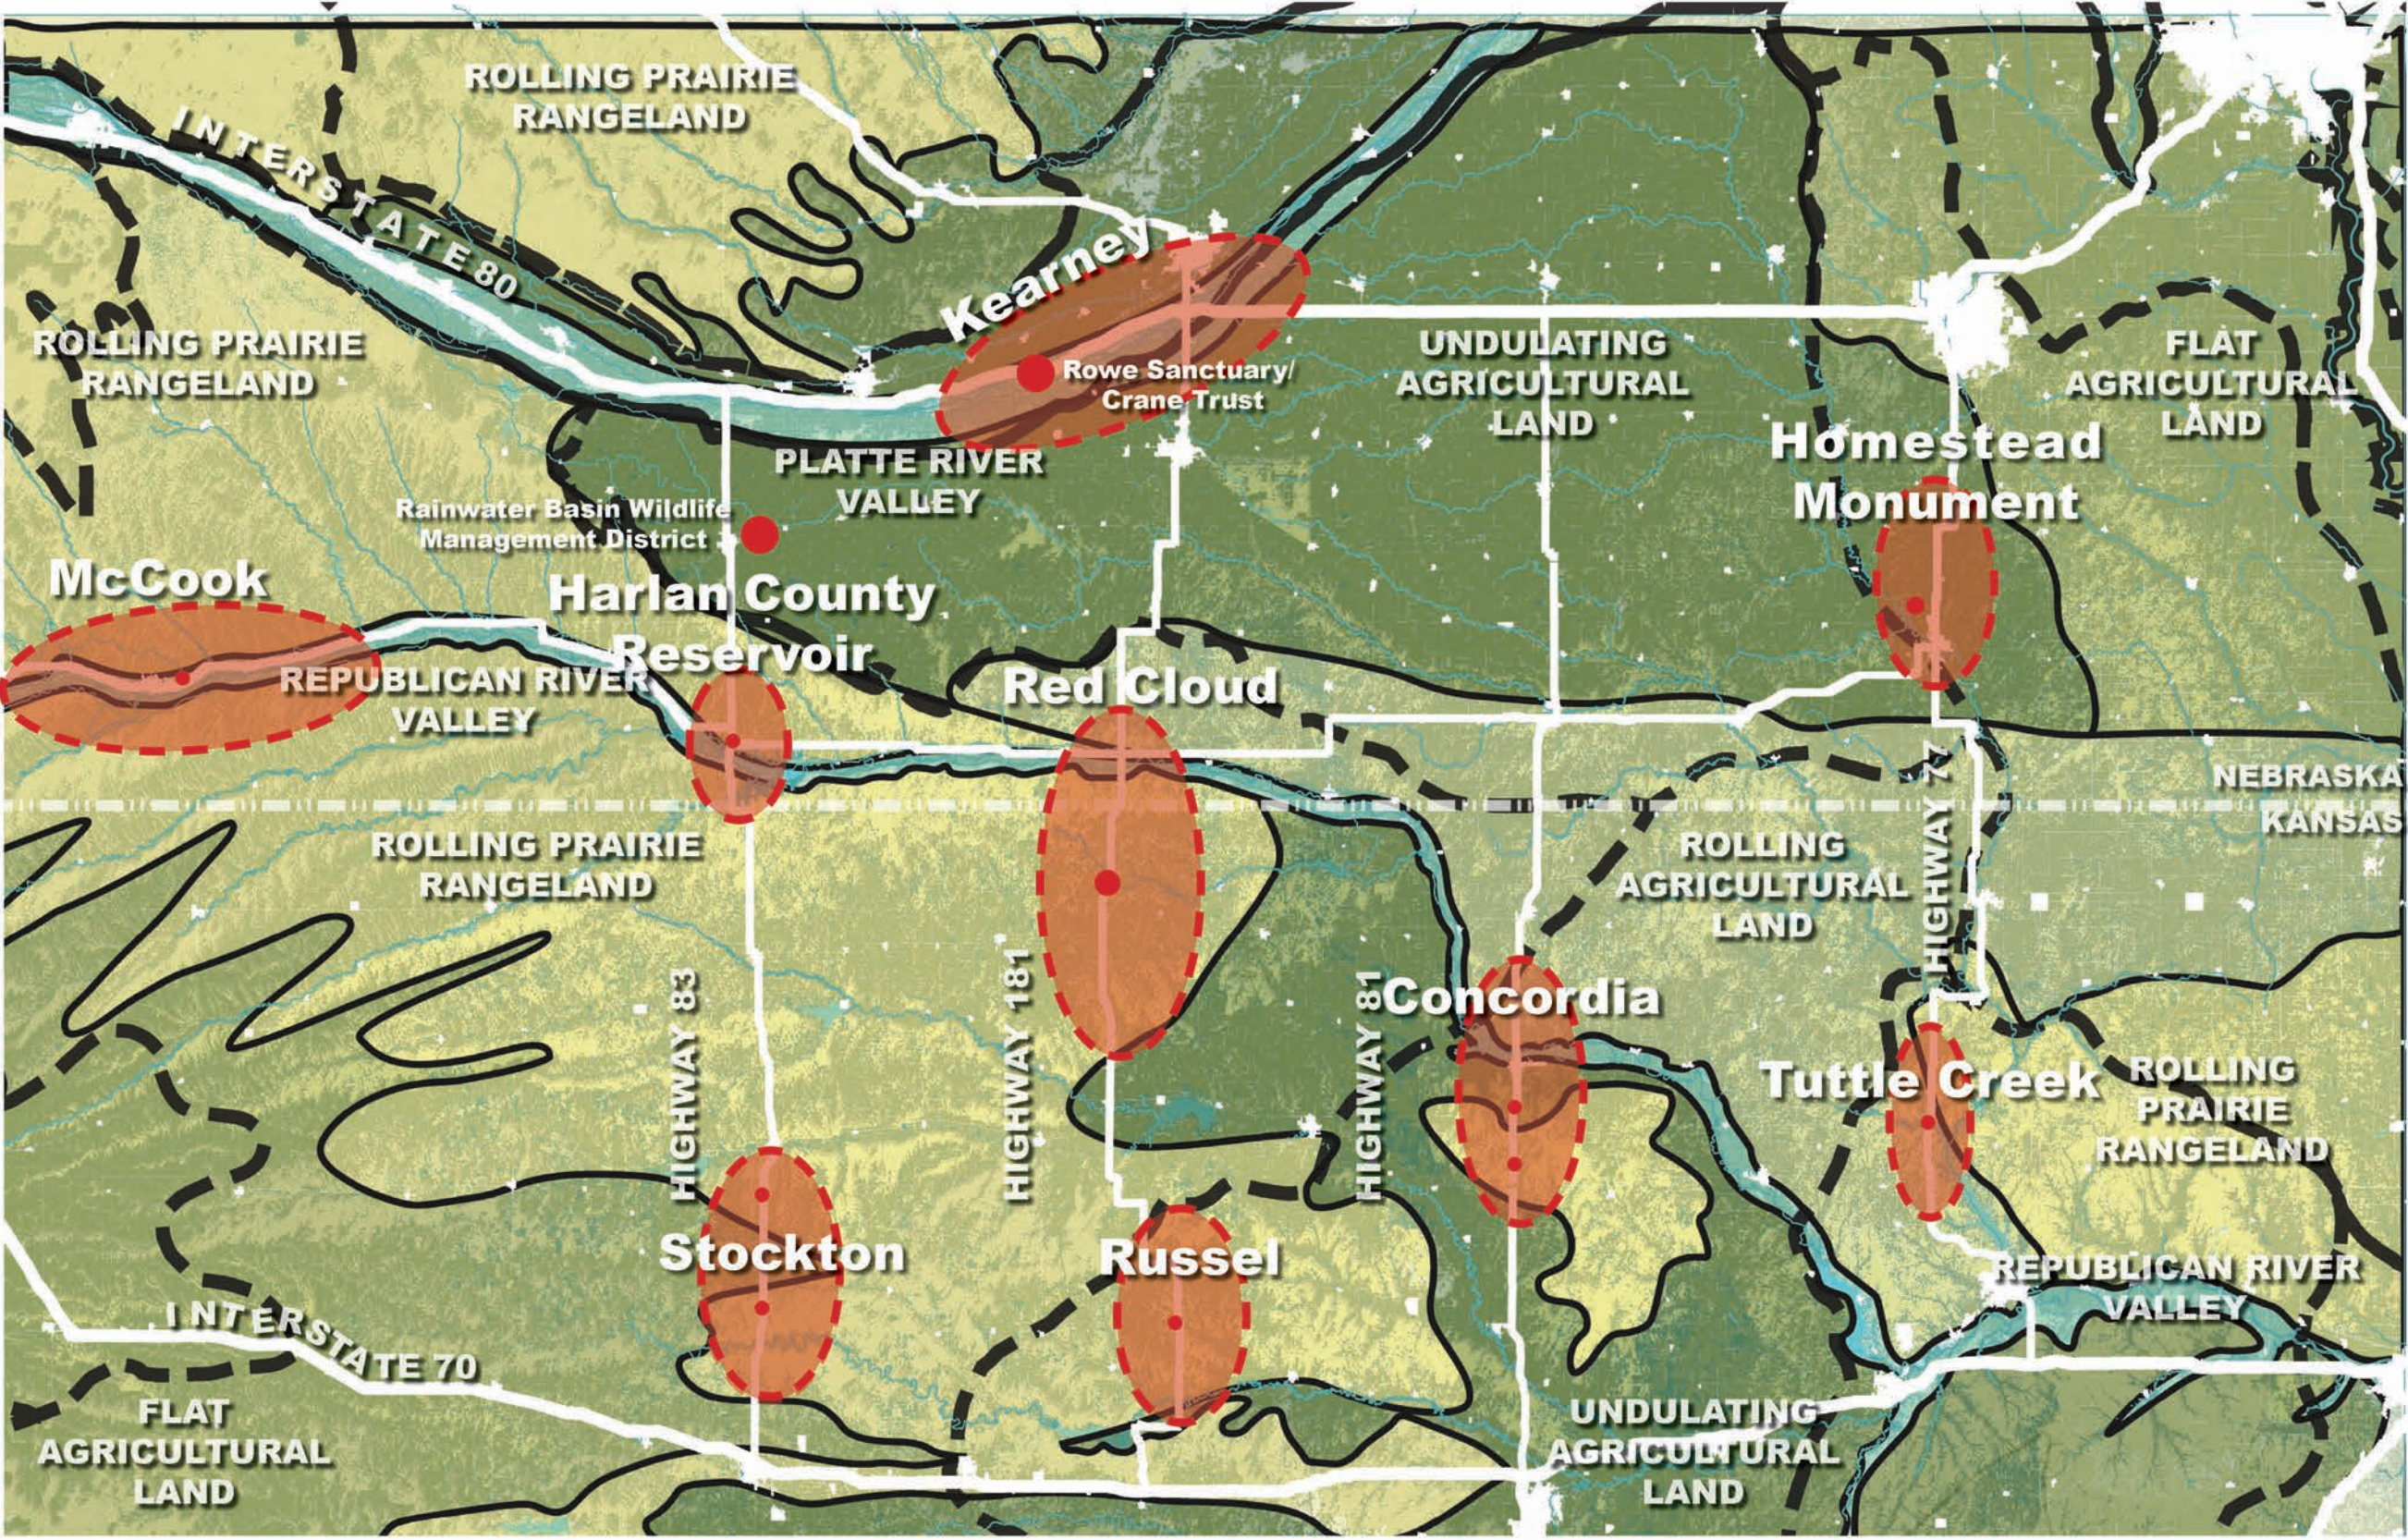

- Principles:**
- 1. Using sites to reveal native landscapes in an immersive experience to engage visitors an immediate and powerful connection with the land
  - 2. Using the historical and cultural histories of a common region to give regional context while also informing individual sites
  - 3. Using collaboration with local communities and peoples to create "teachable places," transformed and reimagined to explore the confluence of history, culture and ecology in a region.

**National Heritage Area (NHA):**

National Heritage Areas (NHAs) are designated by Congress as places where natural, cultural, and historic resources combine to form a cohesive, nationally important landscape. Through their resources, NHAs tell nationally important stories that celebrate our nation's diverse heritage. NHAs are lived-in landscapes. Consequently, NHA entities collaborate with communities to determine how to make heritage relevant to local interests and needs.

- Benefits of a NHA:**
- 1. **Sustainable economic development** – NHAs leverage federal funds (NHAs average \$5.50 for every \$1.00 of federal investment) to create jobs, generate revenue for local governments, and sustain local communities through revitalization and heritage tourism
  - 2. **Healthy environment and people** – Many NHAs improve water and air quality in their regions through restoration projects, and encourage people to enjoy natural and cultural sites by providing new recreational opportunities.
  - 3. **Improved Quality of Life** – Through new or improved amenities, unique settings, and educational and volunteer opportunities, NHAs improve local quality of life.
  - 4. **Education and Stewardship** – NHAs connect communities to natural, historic, and cultural sites through educational activities, which promote awareness and foster interest in and stewardship of heritage resources.
  - 5. **Community Engagement and Pride** – By engaging community members in heritage conservation activities, NHAs strengthen sense of place and community pride.
- Goals of a NHA:**
- 1. History and Heritage Development
  - 2. Conservation
  - 3. Recreation
  - 4. Education

PLAINS, TRAINS, AND CRANES: A MOSAIC OF CULTURE & HISTORY

A Framework for Revealing Our National Heritage Area

Prairie

History and Heritage Development

- Telling the stories of homesteaders and early settlers
- Provide a window into the lands of native peoples prior to Ameri-European Settlement
- Recreating the sense of place that existed during early settlement
- Connecting local communities to local heritage and history of settlement

Conservation

- Conserving Prairie Ecosystems
- Working to boost populations of threatened prairie species
- Use tourism as an education tool to spread conservation efforts
- Work with local landowners to promote conservation and sustainable land stewardship processes

Agriculture

History and Heritage Development

- Telling the stories of homesteaders and early settlers
- Giving a history of agriculture's role in the region and the larger great plains dynamics
- Create a narrative of changing farming techniques, machinery, and social dynamics
- Look to agriculture as a common landuse that binds this region together and helps visitors understand the way of life and sense of place within the region

Conservation

- Use tourism as an education tool to spread soil and water conservation efforts
- Work with local landowners to promote conservation and sustainable land stewardship processes
- Use an agricultural history to show the role the region has historically played in food production for the United States and how conservation practices have changed over time

Platte River

History and Heritage Development

- Show the relationship of the Platte River to the rail network and thus settlement throughout the region
- Convey the significance of the Platte River to agricultural settlement and land production along the river
- Use the Platte River as a way to add interest and draw parallels between historical and modern routes throughout the region that have developed and evolved over time

Conservation

- Show the River's importance to the crane migration to encourage conservation efforts of the river
- Work with local agricultural interests to promote better water stewardship practices
- Connect with entities such as the Rowe Audobon Center and the Crane Trust to capitalize off of tourist money for conservation efforts

Recreation

- Provide an amenity that is available for the public as well as tourist visitors
- Provide immersive experiences that allow people to understand the sense of place in the prairie ecosystem
- Create opportunities for recreational activities that relate to a common settlement history and regional heritage

Education

- Provide resources for community members and visitors to spread conservation and prairie preservation initiatives
- Use prairie landscapes as a research space
- Use recreation and storytelling as a way to connect people to the sense of place of this area within a larger heritage framework

Recreation

- Provide an amenity that is available for the public as well as tourist visitors for recreational activities
- Provide immersive experiences that allow people to understand the role of agriculture on the native landscape and shaping the region
- Create opportunities for recreational activities that relate to a common settlement history and regional heritagex

Education

- Provide resources for community members and visitors to spread conservation initiatives
- Use the landscape to help educate visitors on the common agricultural background of many of the areas communities
- Provide an area to continue agricultural reseach and extension to help preserve the farming industry and history of the region

Recreation

- Provide an amenity that is available for the public as well as tourist visitors for recreational activities
- Provide immersive experiences that allow people to understand the role of the Platte River in ecological, historical, and cultural realms
- Create opportunities for recreational activities that relate people to a common settlement history and regional sense of place

Education

- Provide resources for community members and visitors to spread conservation initiatives
- Use the landscape to help educate visitors on the importance of the Platte River to the cranes and other fauna while also telling the settlement history enabled by the Platte River
- Link with area assets that are telling the story of the Platte River to provide a varied tourist experience for visitors

# PLAINS, TRAINS, AND CRANES: A NATIONAL HERITAGE AREA

## Prototype for a National Heritage Area

### Willa Cather Memorial Prairie:

In August 1974, The Nature Conservancy purchased, with the help of the Woods Charitable Fund, roughly 612 acres of native prairie in southern Webster County, Nebraska. In 1975, the prairie was dedicated as the Willa Cather Memorial Prairie. Over-grazing and the use of herbicides has reduced the biological diversity of not just the Cather Prairie, but nearly all of the Great Plains grassland areas. The Willa Cather Foundation continues to dedicate significant time and effort to restoring the Prairie to its pre-1900s condition.

The preservation of the Cather Prairie is part of a holistic approach to the study of American art, history, and culture through the works of Willa Cather, who championed the prairie and its "fierce strength, its peculiar, savage kind of beauty, its uninterrupted mournfulness."

### Sense of Place and Landscape Character

- Exceeds Expectations
- Rolling Prairie Rangeland
- Rolling topography
- Restored prairie land with no agricultural management
- Sweeping views from the road

### Goals and Objectives

**1. Give a sense of "brand identity."**  
The site reflects a strong narrative that fits within the National Heritage Area's national cultural story.

**2. Integrate, guide, and focus place management**

**3. Establish connection between landscape character and assets**  
The landscape character of the site is communicated and works to orient users to areas surrounding with a similar sense of place.

**4. Be able to experience the natural landscape**  
Provides immersive recreational opportunities.

**5. Identify and communicate qualities of place**  
Site design facilitates user understanding of the sense of place and its relationship to the surrounding context and national cultural story.

## Community Engagement

## Facilitators

**Description:** The process of facilitating is a way of providing leadership without taking the lead.

## Task Force

**Description:** Groups selected for their expertise, their history in the organization, and their interest in the project.

**Possible Contributors:** Rowe Sanctuary-Audubon, Willa Cather Foundation, Eisenhower Presidential Library, Museum and Boyhood Home, Homestead National Monument, Stuhr Museum,

## 119 Stakeholders

**Description:** A stakeholder is any person, organization, social group, or society at large that has a stake in the business.
